*Evolution That Anyone Can Understand* Bernard Marcus, 2011-11-06 The function of scientific research is promoting the understanding of the world around us In theory anyway the more we learn the more potential we have of making our lives better Thus we have seen research in electronics provide us with computers research in chemistry provide us with all manner of synthetics and research in agriculture provide us with more food Periodically scientific research uncovers something that makes some of us uncomfortable The discovery of the link between smoking and lung cancer and heart disease was not received well by the tobacco industry and the link between global climate change and fossil fuel use has not been well received by the petroleum industry to cite just two examples Usually the response of those whose world has been disrupted by science is denial often followed by attack on or ridicule of the science that has challenged them In the long term however science usually turns out to be correct

**Mean and Lowly Things** Kate Jackson, 2010-05-01 In 2005 Kate Jackson ventured into the remote swamp forests of the northern Congo to collect reptiles and amphibians Her camping equipment was rudimentary her knowledge of Congolese customs even more so She knew how to string a net and set a pitfall trap but she never imagined the physical and cultural difficulties that awaited her Culled from the mud splattered pages of her journals *Mean and Lowly Things* reads like a fast paced adventure story It is Jackson's unvarnished account of her research on the front lines of the global biodiversity crisis coping with interminable delays in obtaining permits learning to outrun advancing army ants subsisting on a diet of Spam and

manioc and ultimately falling in love with the strangely beautiful flooded forest The reptile fauna of the Republic of Congo was all but undescribed and Jackson's mission was to carry out the most basic study of the amphibians and reptiles of the swamp forest to create a simple list of the species that exist there a crucial first step toward efforts to protect them When the snakes evaded her carefully set traps Jackson enlisted people from the villages to bring her specimens She trained her guide to tag frogs and skinks and to fix them in formalin As her expensive camera rusted and her Western soap melted Jackson learned what it took to swim with the snakes and that there's a right way and a wrong way to get a baby cobra out of a bottle

*Ain't Love Grand!* Marty Crump, 2013-06-18 The natural world is filled with diverse not to mention quirky and odd animal behaviors Consider the male praying mantis that continues to mate after being beheaded the insects insects and birds that offer gifts of food in return for sex the male hip pocket frog that carries his own tadpoles the baby spiders that dine on their mother or the starfish that sheds an arm or two to escape a predator's grasp In *Ain't Love Grand* Marty Crump a tropical field biologist well known for her work with the reproductive behavior of amphibians examines the bizarre conduct of animals as they mate parent feed defend themselves and communicate More importantly Crump points out that diverse and unrelated animals often share seemingly erratic behaviors evidence Crump argues that these natural histories though outwardly weird are actually successful ways of living

*A Year with Nature* Marty Crump, 2018-11-11 *A Year with Nature* is an almanac like none you've ever seen combining science and aesthetics it is a daily affirmation of the extraordinary richness of biodiversity and our enduring beguilement by its beauty With a text by herpetologist and natural history writer Marty Crump and a cornucopia of original illustrations by Bronwyn McIvor this quirky quotidian reverie gazes across the globe media and time as it celebrates date appropriate natural topics ranging from the founding of the National Park Service to annual strawberry garlic shrimp hummingbird and black bear festivals With Crump we mark the publication of classics like Carson's *Silent Spring* and White's *Charlotte's Web* and even the musical premiere of Tchaikovsky's *Swan Lake* We note the discovery of the structure of DNA and the mountain gorilla the rise of citizen science projects and the work of people who've shaped how we view and protect nature from Aristotle to E. O. Wilson Some days feature US celebrations like National Poinsettia Day and National Cat Day others highlight country specific celebrations like Australia's Wombat Day and Thailand's Monkey Buffet Festival during which thousands of macaques feast on an ornately arranged spread of fruits and vegetables Crump also highlights celebrations that span borders from World Wildlife Conservation Day to International Mountain Day and global festivities for snakes sea turtles and chocolate Interweaving fascinating facts on everything from jellyfish bodies to monthly birth flowers with folkloric entries featuring the Loch Ness Monster unicorns and ancient Greek Roman and Egyptian mythology the almanac is as exhaustive as it is enchanting *A Year with Nature* celebrates the wonder and beauty of our natural world as we have expressed it in visual arts music literature science natural history and everyday experience But more than this the almanac's vignettes encourage us to contemplate how we can help ensure that future generations will be

able to enjoy the landscapes and rich biodiversity we so deeply cherish      *The Future of Post-Human Sexuality* Peter Baofu, 2009-12-14 What precisely resides in sexuality which warrants the popular discourse on sexuality as part of our world freedom or something as an inspiring source for our own creation of new forms of relationships or new forms of love never before possible in human history This popular treatment of sexual freedom has become so politically correct in this day and age of ours that it fast degenerates into a seductive ideology which has impoverished our understanding of sexuality by blinding us from its dark sides Contrary to this intoxicating conventional wisdom the dark sides of this seductive ideology have yet to be systematically understood and that its very creative freedom is neither possible nor desirable to the extent that its advocates would like us to believe Of course this is not to suggest that sexuality should not be about freedom nor creativity or that the literature in sexual studies and other related fields like gender studies queer studies and cultural studies for example should be ignored because of their scholarly nonsense Needless to say neither of these two extreme views is reasonable either Instead the purpose of this book is to provide an alternative better way to understand the nature of sexuality in special relation to the sexual body and spirit in conjunction with the mind while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other This seminal project if successful will fundamentally change the way that we think about the nature of sexuality from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its post human fate      **Eye of Newt and Toe of Frog, Adder's Fork and**
