**in History** L. S. Jacyna,Stephen T. Casper,2012 Parkinson s Alzheimer s Tourette s multiple sclerosis stroke all are neurological illnesses that create dysfunction distress and disability With their symptoms ranging from impaired movement and paralysis to hallucinations and dementia neurological patients present myriad puzzling disorders and medical challenges Throughout the nineteenth and twentieth centuries countless stories about neurological patients appeared in newspapers books medical papers and films Often the patients were romanticized indeed it was common for physicians to cast neurological patients in a grand performance allegedly giving audiences access to deep philosophical insights about the

meaning of life and being Beyond these romanticized images however the neurological patient was difficult to diagnose Experiments often approached unethical realms and treatment created challenges for patients courts caregivers and even for patient advocacy organizations In this kaleidoscopic study the contributors illustrate how the neurological patient was constructed in history and came to occupy its role in Western culture Stephen T Casper is Assistant Professor in Humanities and Social Sciences at Clarkson University L Stephen Jacyna is reader in the History of Medicine and Director of the Centre for the History of Medicine at University College London [Called Out of Darkness Into Marvelous Light](#) Jeremy Bonner,2009-01-23 In the conflicted world that is today s Episcopal Church the diocese of Pittsburgh stands both as a symbol of dissent and schism to the liberal majority within the American Church and as a beacon of light and hope to conservative Anglicans across the United States Set in the unlikely surroundings of America s Rust Belt Pittsburgh s Episcopalians have over the past half century undergone a dramatic reordering of priorities to embrace a novel though hardly unprecedented vision of Anglican confessionalism Called out of Darkness into Marvelous Light traces the development of an Anglican presence in western Pennsylvania from the missionary activity of the late eighteenth century through the triumphs of post Civil War Anglo Catholicism and the first stirrings of the Social Gospel to the unprecedented religious revival of the 1950s Championed by such men as Bishop Austin Pardue and Samuel Moor Shoemaker the founder of the Pittsburgh Experiment a prayer centered spirituality developed in the Pittsburgh diocese and brought a generation of active evangelicals to the region during the 1960s and 1970s The founding of Trinity Episcopal School for Ministry in the mid 1970s consolidated the evangelical presence in the diocese and provoked a commitment to spiritual renewal that sat uneasily with many in the wider Episcopal Church Grounded in local research this study seeks to explore the process by which Pittsburgh acquired its present evangelical identity and to reveal the increasingly intricate web of relationships that it now enjoys beyond America s borders *Companion Encyclopedia of the History of Medicine* William F. **Lifestyle and Medicine in the Enlightenment** James Kennaway,Rina Knoeff,2020-03-09 The biggest challenges in public health today are often related to attitudes diet and exercise In many ways this marks a return to the state of medicine in the eighteenth century when ideals of healthy living were a much more central part of the European consciousness than they have become since the advent of modern clinical medicine Enlightenment advice on healthy lifestyle was often still discussed in terms of the six non naturals airs and places food and drink exercise excretion and retention and sleep and emotions This volume examines what it meant to live healthily in the Enlightenment in the context of those non naturals showing both the profound continuities from Antiquity and the impact of newer conceptions of the body Chapter 8 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No

It brings together scholars from disciplines including history, literature, psychology, philosophy and the social sciences to create the first large scale review of recent research on the history of infertility. Through exploring an unparalleled range of chronological periods and geographical regions, it develops historical perspectives on an apparently transhistorical experience. It shows how experiences of infertility, access to treatment and medical perspectives on this condition have been mediated by social, political and cultural discourses. The handbook reflects on and interrogates different approaches to the history of infertility, including the potential of cross disciplinary perspectives and the uses of different kinds of historical source material, and includes lists of research resources to aid teachers and researchers. It is an essential go to point for anyone interested in infertility and its history. Chapter 19 is open access under a CC BY 4.0 license via [link.springer.com](http://link.springer.com).
