*The Healing Bond* Susan Budd, Ursula Sharma, 1994 This book combines the expertise of practitioners and researchers to address the wide range of debates currently taking place in relation to the politics of the practitioner client relationship

The Healing Bond Susan Budd, Ursula Sharma, 2002-09-11 The growing popularity of alternative therapies poses challenging questions for the medical establishment and the state By confronting these questions *The Healing Bond* makes an important contribution to current debates about health care The contributors who are all experts in the fields of health care social science and the law focus on the relationship between patient and healer in both orthodox and non orthodox forms of healing practice They consider whether different forms of healing involve widely differing conceptions of the role and responsibilities of the healer and deal with topical issues such as medical litigation codes of ethics for complementary practitioners and co operation between orthodox and complementary medicine

**Recordkeeping, Ethics and Law** Livia Iacovino, 2006-07-20 Distributed networks such as the Internet have altered the fundamental way a record is created captured accessed and managed over time and therefore who controls has access to and is responsible for its authenticity Law and ethics provide the major sources of regulatory controls over participants in such networks This book analyses the interrelationship of recordkeeping ethics and law in terms of existing regulatory models and their application to the Internet environment It proposes the legal and social relationship model as an analytical tool for identifying the rights and obligations of recordkeeping participants in networked business transactions within communities of common interest based on trust The model is also used to examine the legal concepts of property access privacy and evidence with particular reference to its Internet context As legal relationships have their basis in the law of obligations found in both common and civil law systems as well as archival science the model has a broad based application The approach in this book has been to reconcile a number of archival traditions the common strands rather than the differences in particular concepts of identity trust acts actors and social relationships as fundamental concepts to social regulation It is therefore primarily directed to archives and records academics and practitioners especially those working within the realm of electronic records in order to provide them with a sound theoretical and practical knowledge of the legal and ethical dimensions of records created in distributed environments

**Complementary Medicine and Health Psychology** Anna van Wersch, Mark Forshaw, Tina Cartwright, 2009-10-16 This unique book is the first to bring together the world of health psychology with that of complementary and alternative medicine CAM The authors draw on their wealth of experience as health psychologists to explore the relationship between health psychology and CAM and look at how an understanding of one can be used to inform the other Through an open minded but rigorous approach to CAM the authors identify where psychology can help to answer some crucial questions such as why CAM sometimes appears to work why sometimes it does not and why some people are drawn to it and others not Key topics covered include models of the person health beliefs and

experimental psychology placebo research methods in CAM stress coping and stress management pain and chronic illness communications and interactions between client and therapist While CAM has often been dismissed out of hand by scientists the authors maintain that it deserves attention as a psychological phenomenon alone regardless of the actual efficacy as understood by existing research This book s insightful observations on contemporary meanings of health and illness and the future of CAM and health psychology make it important reading for all psychologists and health professionals Toward an Integrative Medicine Hans A. in contemporary American life      Nature, Technology and the Sacred Bronislaw Szerszynski, 2008-04-15 This provocative and timely book argues that contemporary ideas and practices concerning nature and technology remain closely bound up with religious ways of thinking and acting Using examples from North America Europe and elsewhere it reinterprets a range of secular phenomena in terms of their conditioning by a complex series of transformations of the sacred in Western history The contemporary practices of environmental politics technological risk behaviour alternative medicine vegetarianism and ethical consumption take on new significance as sites of struggle between different sacral orderings *Nature Technology and the Sacred* introduces a radically new direction for today's critical discourse concerning nature and technology one that reinstates it as a moment within the ongoing religious history of the West      *Plural Medicine, Tradition and Modernity, 1800-2000* Waltraud Ernst, 2002-11 This book brings together current critical research into medical pluralism during the last two centuries It includes a rich selection of historical anthropological and sociological case studies      Analyst of the Imagination Jenny Pearson, 2018-06-04 Charles Rycroft's lucid jargon free approach to psychoanalysis inspired a whole generation Taking inspiration from many fields outside psychoanalysis including history literature linguistics and ethology he established the important link between mental health and the imagination creating a broader perspective and encouraging free thinking This solitary and creative rebel rarely received the recognition he deserved but this collection of articles and papers by people who felt the benefit of his ever curious expanding wealth of knowledge goes some way to acknowledging the debt owed to him and introducing a new generation to this innovative analyst      **Teratologies** Jackie Stacey, 2013-07-23 Stories of cancer are full of monster and marvels the monstrosity of the disease and the treatments the marvels of the cures and the saved lives Still one of the most dreaded diseases to haunt our imaginations cancer is more than an illness it is a cultural phenomenon People who have cancer are bombarded with competing explanations of their conditions it is genetically inherited it is environmentally produced it is the result of their personality *Teratologies A Cultural Study of Cancer* investigates how this disease is perceived experienced and theorised in contemporary society It explores changing beliefs about the causes of and the cures for cancer in both biomedicine and its increasingly popular alternative counterparts Analysing conventional and alternative medical accounts self help manuals and patients personal stories Jackie Stacey takes a critical look at the place of heroes metaphors the self and the body in these competing bids to produce the authoritative definition of the meaning of cancer today Interspersed with these detailed textual investigations are discussions of broader issues such as the feminist debates about the history of science the place of consumer culture in health practices and the status of patients and of health professionals in postmodern society Combining autobiographical narratives with contemporary theoretical debates the author carves out a specifically feminist analysis of the cultural dimensions of cancer She brings accounts of her own illness under the critical lens of academic scrutiny and situates these personal stories within a discussion of contemporary cultural change
