Origins of American Health Insurance John E. Murray, 2007-01-01 How did the United States come to have its distinctive workplace based health insurance system Why did Progressive initiatives to establish a government system fail This book explores the history of health insurance in the United States from its roots in the nineteenth century sickness funds offered by industrial employers fraternal organizations and labor unions to the rise of such group plans as Blue Cross and Blue Shield in the mid twentieth century Historians generally view the failure to establish universal health insurance during

the first half of the twentieth century as an indicator of the political clout of insurers employers unions and physicians who thwarted Progressive efforts But the explanation is actually simpler John Murray contends in this book Careful analysis of the workings of industrial sickness funds suggests that workers rejected plans for compulsory state insurance because they were largely content with existing private plans Murray revises our understanding of the evolution of health care insurance in the United States and discusses the implications of that history for the ongoing debates of today Understanding Environmental Health Nancy Irwin Maxwell,2014 Rather than organizing topics around the traditional regulatory fields air and water pollution hazardous wastes radiation etc this book is structured around the choices we make as individuals and societies that result in environmental health hazards The author details the hazards of energy production industry food production and the modern lifestyle while exploring our place within the local and global community *Maxwell's Understanding Environmental Health: How We Live in the World* Deborah Alma Falta,2021-03-25 Offering a unique approach to presenting environmental health Maxwell s *Understanding Environmental Health How We Live in the World* Third Edition is structured around the choices we make as individuals that result in environmental hazards By detailing the hazards of energy production industry food production and our modern lifestyle in the context of our place within the local and global community new author Deborah Falta updates and builds on Maxwell s comprehensive overview of environmental health by telling a connected narrative that makes the text both engaging and accessible to a broad range of students with a variety of scientific backgrounds Awarded first place in the 2021 AJN Book of the Year Awards in the Environmental Health category Read the press release 15 new cases studies addressing contemporary issues from plastic recycling to sustainably feeding a growing world population New chapter detailing the societal and economic factors related to managing environmental risks More comprehensive discussion of occupational health in the context of producing manufactured goods New full color design that brings charts graphs and photos to life Updated appendix includes a new overview of the U S regulatory framework for environmental health Navigate eBook Access enabling you to read your digital textbook online or offline on computers tablets and mobile devices Watch recording of her recent webinar Making Environmental Health Resonate for Today s Students to learn how Dr Falta engages her students in environmental health topics through surveys case studies and more Undergraduate and graduate Environmental Health courses in Public Health programs as well as departments of Environmental Science Health Sciences and Public Policy 2022 328 pages **The Longevity Revolution** Robert N. Butler,2009-09-08 Pulitzer prize winning author Dr Robert Butler coined the term ageism and made Alzheimer s a familiar word Now he brings his formidable knowledge and experience in aging issues to a recent and unprecedented achievement the extension of human life expectancy by thirty years As Butler shows our society had not yet adapted to this change The U S has not made a research investment in aging Only eleven medical schools out of 145 have geriatrics departments compared to England where geriatrics is the number two specialty We have not solidified private pension plans or strengthened Social

Security to ensure that people do not outlive their resources In this urgent and ultimately optimistic book Dr Butler shows why and how we must re examine our personal and societal approach to aging right now so that the boomers and the generations that follow may have a financially secure vigorous and healthy final chapter life **Research in Economic History** Christopher Hanes,Susan Wolcott,2013-01-30 Volume 29 contains articles on the economic history of Europe and the U S including Understanding Aging During the Epidemiologic Transition by Suchit Arora Estimating French Regional Income Departmental Per Capita Gross Value Added 1872 1911 by Paul Caruana Galizia Improve and Sit **The New Palgrave Dictionary of Economics** ,2016-05-18 The award winning The New Palgrave Dictionary of Economics 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product **The ^AColor Factor** Howard Bodenhorn,2015-05-01 The Color Factor shows that the emergent twenty first century recognition of race mixing and the relative advantages of light skinned mixed race people is nothing new In early America light skinned mixed race people were more likely to be freed from slavery to be employed in more remunerative jobs to accumulate more wealth and to be taller and healthier **The Oxford Handbook of American Economic History, vol. 1** Edited by Louis P. Cain,Edited by Price V. Fishback,Edited by Paul W. Bailey, Leah Platt Boustan, William J. Collins, 2025-05-14 A meticulous examination of the history and roots of economic inequality within the United States This volume refines and extends the economic history literature on economic inequality in the United States Economic inequality manifests itself on various dimensions including access to resources and economic security as well as access to education and opportunities for migration marriage and other important life decisions Measuring inequality and studying its variation over time and in response to economic shocks such as recessions and wars deepen our understanding of how the economy operates and can inform the design of public policies The studies in this compendium present comprehensive evidence on income distribution during the nineteenth and early twentieth centuries drawing on new data on wages and prices They also consider disparities in economic well being that are reflected in outcomes other than wage and salary income such as homeownership and marriage The volume also presents new evidence on the effects of income inequality on social outcomes It concludes with an intellectual history of human capital a core concept in the economic analysis of the underpinnings of labor market inequality **The Great Lead Water Pipe Disaster** Werner Troesken, 2006 The history of a long running environmental catastrophe chronicles the harmful effects of lead pipes and their continued use despite evidence that they pose a significant health risk **Heroes and Cowards** Dora L. Costa, Matthew E. Kahn, 2010-09-02 When are people willing to sacrifice for the common good What are the benefits of friendship How do communities deal with betrayal And what are the costs and benefits of being in a diverse community Using the life histories of more than forty thousand Civil War soldiers Dora Costa and Matthew Kahn answer these questions and uncover the vivid stories social influences and crucial networks that influenced soldiers lives both during and after the war Drawing information from government documents soldiers journals and one of the most extensive research projects about Union Army soldiers ever undertaken Heroes and Cowards demonstrates the role that social capital plays in people's decisions The makeup of various companies whether soldiers were of the same ethnicity age and occupation influenced whether soldiers remained loyal or whether they deserted Costa and Kahn discuss how the soldiers benefited from friendships what social factors allowed some to survive the POW camps while others died and how punishments meted out for breaking codes of conduct affected men after the war The book also examines the experience of African American soldiers and makes important observations about how their comrades shaped their lives Heroes and Cowards highlights the inherent tensions between the costs and benefits of community diversity shedding light on how groups and societies behave and providing valuable lessons for the present day **Brain Gain** Maurice Schiff, 2005 Based on static partial equilibrium

analysis the new brain drain literature argues that by raising the return to education a brain drain generates a brain gain that is under certain conditions larger than the brain drain itself and that such a net brain gain results in an increase in welfare and growth due to education's positive externalities This paper argues that these claims are exaggerated In the static case and based on both partial and general equilibrium considerations the paper shows that 1 the size of the brain gain is smaller than suggested in that literature 2 the impact on welfare and growth is smaller as well for any brain gain size 3 a positive brain gain is likely to result in a smaller possibly negative human capital gain 4 an increase in the stock of human capital may have a negative impact on welfare and growth and 5 in a dynamic framework the paper shows that the steady state brain gain is equal to the brain drain so that a beneficial brain drain cannot take place and a net brain loss is likely during the transition

International Migration, Remittances, and the Brain Drain Maurice Schiff,aglar zden,2005-10-15 International migration the movement of people across international boundaries has enormous economic social and cultural implications in both origin and destination countries Using original research this title examines the determinants of migration the impact of remittances and migration on poverty welfare and investment decisions and the consequences of brain drain brain gain and brain waste

Aging, Health, and Public Policy Linda J. Waite,2004 Scientific Research on Health Inequalities Enrique Regidor,2025-09-09 Scientific research on health inequalities seeks a causal explanation for the higher frequency of diseases and the higher premature mortality in people of low social position compared to those of high social position at all times and places This purpose raises doubts about the suitability of the facts analysed to reflect what has happened to human beings who inhabit or have inhabited the Earth In this book the author reviews the existing empirical evidence on the frequency of health problems and life span according to social position And he reveals the assumptions and methodological limitations of scientific practice around this issue The heterogeneity of findings suggests that the causal effect of social position on health is a chimera It will be of great use to researchers and public health professionals interested in health promotion It will raise numerous questions and concerns about the importance of beliefs in interpreting the facts analysed and in recommending interventions
