Informal Payments and Regulations in China's Healthcare System Jingqing Yang, 2016-11-26 This text addresses the key issue of informal payments or red packets in the Chinese Healthcare system It considers how transactions take place at the clinical level as well as their regulation Analysing the practice from the perspectives of institutions and power structure it examines how institutional changes in the pre reform and reform era have changed the power structure between medical professions patients and the Party state and how these changes have given rise and perpetuate the practice Drawing from qualitative data from interviews of medical professionals the author recognises the medical profession as a major player in the health care system and presents their perception of the practice as the taker of red packets and their interactions with the patient and the state surrounding the illegal practice in an authoritarian power structure The books considers the institutional reasons that motivate doctors to take patients to give and the government to

tolerate red packets arguing that the bureaucratization of the medical profession society of acquaintances and shortage of quality of medical services jointly create an institutional setting that has given rise to these informal payments Contributing to a rounded understanding of the problems of healthcare reform in China this book is a key read for all scholars interested in the issue of informal payments and healthcare politics in transition economies

China's Urban Health Care Reform Chack-kie Wong,Vai Io Lo,Kwong-Leung Tang,2006-01-01 One way to describe the importance of social policy is to say it s about what is and what might be This ethos is the driving force behind Chack Kie Wong Vai Io Lo and Kwong leung Tang s China s Urban Health Care Reform Based on a study of a mid level city in China these three scholars provide analysis and offer theory based recommendations on health care development Using a comparative policy framework supported by a legal expert s knowledge of regulatory specifications China s Urban Health Care Reform argues that a strategy with priority in economic growth as in the case of China does not bring forth cost efficiency and equity in health care for the whole nation Ultimately Wong Lo and Tang strive to offer direction for health care reform that will lead to better health care in China s cities As a result this is a work of great significance to anyone involved in public health social work public policy medicine or law

Financing Healthcare in China Sabrina Ching Yuen Luk,2016-07-22 China s current social medical insurance system has nominally covered more than 95 per cent of 1 4 billion population in China and is moving towards the ambitious goal of universal health insurance coverage Challenges posed by a rapidly ageing population an inherently discriminatory design of the health insurance system the disorder of drug distribution system and an immature legal system constrain the Chinese government from realizing its goal of universal health insurance coverage in the long run This book uses a refined version of historical institutionalism to critically examine China s pathway to universal health insurance coverage since the mid 1980s It pays crucial attention to the processes of transforming China s healthcare financing system into the basic social medical insurance system alongside rapid socio economic changes Financing Healthcare in China will interest researchers and government and think tank officials interested in the state of healthcare reforms in China Healthcare specialists outside of East Asia may also be interested in its general study of healthcare in developing countries Scholars and students interested in the healthcare field will also find this useful

Annual Report United States. Congressional-Executive Commission on China,2008

Health Care Transformation in Contemporary China Jiong Tu,2018-06-12 This multifaceted book examines the free market reform of the Chinese healthcare system in the 1980s and the more collectivist or socialist counter reforms that have been implemented since 2009 to remedy some of the problems introduced by marketization The book is based on an ethnographical study in a Chinese county from 2011 to 2012 which investigated local people s experience of healthcare reforms and the various ways in which they have adapted their own behavior to the constraints and opportunities introduced by these reforms It provides a vivid depiction of the morality and emotionality of people s experiences of the Chinese healthcare system and the myriad frustrations and sometimes desperation it induces not only

among patients with significant health problems and their families but also healthcare practitioners caught between their desire to do right by their patients and the penalties they personally incur if they do not adhere to institutionalized cost saving measures. The people's experiences within China's health sector presented reflect many similar experiences in the wider Chinese society. The book is thus a valuable resource for researchers and graduate students interested in China's healthcare reforms and scholars concerned with issues of contemporary Chinese society.

Social policy in China Chan, Chak Kwan, Ngok, Kinglun, 2008-02-13 This much needed new textbook introduces readers to the development of China's welfare policies since its conception of an open door policy in 1978. Setting out basic concepts and issues including key terms and the process of policy making it overcomes a major barrier to understanding Chinese social policy. The book explores in detail the five key policy areas of employment, social security, health, education and housing. Each is examined using a human well-being framework comprising both qualitative and quantitative data and eight dimensions: physical and psychological well-being, social integration, fulfilment of caring duties, human learning and development, self-determination, equal value and justice. This enables the authors to provide not only factual information on policies but also an in-depth understanding of the impact of welfare changes on the quality of life of Chinese people over the past three decades. A major strength of the book lies in its use of primary Chinese language sources including relevant White Papers, central and local government policy documents, academic research studies and newspapers for each policy area. There are very few books in English on social policy in China and this book will be welcomed both by academics and students of China and East Asian studies and comparative social policy and by those who want to know more about China's social development.

China's New Public Health Insurance Armin Müller, 2016-11-25 Especially since the 2003 SARS crisis China's healthcare system has become a growing source of concern both for citizens and the Chinese government. China's once praised public health services have deteriorated into a system driven by economic constraints in which poor people often fail to get access and middle income households risk to be dragged into poverty by the rising costs of care. The New Rural Cooperative Medical System (NRCMS) was introduced to counter these tendencies and constitutes the main system of public health insurance in China today. This book outlines the nature of the system, traces the processes of its enactment and implementation and discusses its strengths and weaknesses. It argues that the contested nature of the fields of health policy and social security has long been overlooked and reinterprets the NRCMS as a compromise between opposing political interests. Furthermore, it argues that structural institutional misfits facilitate fiscal imbalances and a culture of non-compliance in local health policy which distort the outcomes of the implementation and limit the effectiveness of insurance. These dynamics also raise fundamental questions regarding the effectiveness of other areas of the comprehensive New Health Reform which China has initiated to overhaul its healthcare system.

China's Changing Welfare Mix Beatriz Carrillo, Jane Duckett, 2011-06-10 This book draws attention to two neglected areas in the growing body of research on welfare in China: subnational variation and the changing mix of

state and non state provision The contributors to this volume demonstrate the diversity of local welfare provision that lies behind broad national policies and programmes Their focus on local diversity is particularly relevant to understanding the welfare system in China because national state programmes are so often organized by local governments in line with the specifics of their economic and social development At the same time that social and economic development is itself independently creating an array of different conditions that shape non state family business and third sector welfare roles Through chapters that draw on original research in eight provinces the book adopts a local perspective to illustrate and explain some of the transformations that are under way and discuss not only local government initiatives and programmes but also the services and support provided by families informal social networks and community or third sector organizations as well as those delivered by private businesses on a commercial for profit basis This book will be of interest to students and scholars of Chinese society social policy and Chinese studies more widely Beatriz Carrillo is Lecturer in Asian Studies at the University of Technology Sydney Australia Jane Duckett is Professor of Chinese and Comparative Politics at the University of Glasgow UK

China's New Social Policy: Initiatives For A Harmonious Society Litao Zhao,Tin Seng Lim,2009-08-21 After more than 30 years of rapid development China has established herself as an important engine of growth for the world economy This achievement however came with a heavy price in the form of serious pollution in its developed regions and social problems in areas such as healthcare and housing This publication studies some of such problems and provides an updated account on a wide range of new social policy initiatives in China China s New Social Policy distinguishes itself from other literature in this field It undertakes a general methodology that assesses the social impact brought about by the market oriented changes in China s social policies and contests the idea whether market oriented development can result in a more sustainable society All chapters in the book are crafted by prominent scholars which include Professor Zheng Yongnian Director of the East Asian Institute and Professor Gu Xin School of Government Peking University

The Changing Transitions to Adulthood in Developing Countries National Research Council,Division of Behavioral and Social Sciences and Education,Committee on Population,Panel on Transitions to Adulthood in Developing Countries,2006-01-08 Serving as a companion to Growing Up Global this book from the National Research Council explores how the transition to adulthood is changing in developing countries in light of globalization and what the implications of these changes might be for those responsible for designing youth policies and programs Presenting a detailed series of studies this volume both complements its precursor and makes for a useful contribution in its own right It should be of significant interest to scholars leaders of civil society and those charged with designing youth policies and programs

China's Social Welfare Joe C. B. Leung,Yuebin Xu,2015-04-21 The extraordinary rise of China is one of the greatest global stories of recent times However China s development has been described as uneven uncoordinated and unsustainable and has now reached a critical turning point To transform itself into a successful high income economy China urgently needs to develop a new welfare regime Social

policy and social welfare programmes are pivotal not only to meet mounting social needs but also to promote social cohesion. This timely book explores key turning points in China's trajectory from the creation of a socialist egalitarian society promising a relatively stable livelihood at the expense of economic development through the market-oriented reforms which have dismantled the traditional social protection system. The authors present the formidable social challenges ahead including demographic shift, residential migration and corrosive inequalities and outline the emerging forms of social security protection in urban and rural areas, community-based social care services, non-governmental organizations and the social work profession. To redress inequalities and strengthen social cohesion, China needs to construct a robust developmental and redistributive strategy with shared responsibility between different levels of governments as well as between civil society, the state and the market. This comprehensive and astute guide to one of China's key current challenges will be welcomed by students and scholars of social policy, welfare, sociology and political science and all interested in contemporary China.

The Chinese State's Retreat from Health Jane Duckett, 2012-08-21. Over the post-Mao period, the Chinese state has radically cut back its role in funding health services and insuring its citizens against the costs of ill health. Using an analytical framework drawn from studies of state retrenchment in industrialized democracies and in post-communist Eastern Europe, Jane Duckett argues that the state's retreat from health in China was not a simple consequence of economic policies and market reform. Just as important were the influences of health policies, reform-era political institutions, communist party ideology and bureaucratic stakeholders. Through her analysis, Duckett maintains that by studying retrenchment in China, the world's most populous nation and now a major global economic power, we can better understand international transformations in the role of the state and the politics that shape that role. *The Chinese State's Retreat from Health* both extends research on retrenchment politics to a major authoritarian state and contributes to piecing together understanding of the Chinese state's changing role across the economy and other social policies including housing and education. It will be of interest to students and scholars of Chinese politics, social policy and the Chinese health care system as well as to those with a comparative interest in health welfare states and the politics of retrenchment. Jane Duckett is Professor of Chinese and Comparative Politics at the University of Glasgow, UK.

Diversity of Managerial Ideology Check Teck Foo, 2018-03-17. This book is the first in a series on Chinese management based on the Global Chinese Management Conferences from 2015 to 2017, an annual conference organized by the Sun Tzu Art of War Institute. The first volume is by Foo Check Teck, professor at Fudan and Hunan University and founding editor of *Chinese Management Studies* (SSCI), who encourages readers to broaden their minds to embrace the Universe as a Community. The book argues that the lives of all beings are worth preserving and urges the academic community to recognize the ideologies at heart of management and to see research as a deep reflective thinking process that goes far beyond the testing of hypotheses. Great works lasting 2,500 years are the result of deep reflection upon experiences. It also calls for the re-framing of management integration of a variety of ideological

China is a joint research report by a team from the World Bank and the Development Research Center of China's State Council which was established to address the challenges and opportunities of urbanization in China and to help China forge a new model of urbanization. The report takes as its point of departure the conviction that China's urbanization can become more efficient, inclusive, and sustainable. However, it stresses that achieving this vision will require strong support from both government and the markets for policy reforms in a number of areas. The report proposes six main areas for reform: first, amending land management institutions to foster more efficient land use; denser cities; modernized agriculture; and more equitable wealth distribution; second, adjusting the hukou household registration system to increase labor mobility and provide urban migrant workers equal access to a common standard of public services; third, placing urban finances on a more sustainable footing while fostering financial discipline among local governments; fourth, improving urban planning to enhance connectivity and encourage scale and agglomeration economies; fifth, reducing environmental pressures through more efficient resource management; and sixth, improving governance at the local level.
