resources in addition to the vast scope of the care needed Written by a group with wide experience of caring for dying children in Africa this book provides practical realistic guidance on improving access to and delivery of palliative care in this demanding setting It looks at the themes common to palliative care including communication assessment symptom management psychosocial issues ethical dilemmas end of life care and tips for the professional on compassion and conservation of energy but always retains the focus on the particular needs of the health care professional in Africa Whilst containing some theory the emphasis is on practical action throughout It will provide health care professionals working in Africa and other resource poor settings with the confidence knowledge and capacity to improve care for the terminally ill child in constrained and demanding environments *Women's Health Care in Advanced Practice Nursing, Second Edition* Ivy M. During recent years many agents for the treatment and prophylaxis of HIV infection and the opportunistic infections that accompany HIV infection have been developed and many new ways of monitoring HIV infection in children have been produced. These therapies and approaches to management are complicated but the long term health of HIV infected children depends on their correct application. This handbook presents the core information and guidelines necessary for effective management of infected children. Two other important themes are ways to minimise mother to infant transmission and the challenges of looking after these children in resource poor countries.
