Paraskevopoulos, 2001-06-18 Interpreting Convergence in the European Union introduces the idea of collective action as a prerequisite for achieving convergence and cohesion in the European Union Institutional networks and social capital play a crucial role in influencing actors preferences and shaping institutional interactions through the process of political exchange and socialization Although the main focus of the book is on policymaking processes and governance structures in EU regional policy its core theoretical hypotheses and conclusion are drawn from empirical research into the response of Greek regions to the challenges of Europeanization This framework is applicable to almost all areas of EU public policymaking

Regional Development Strategies Jeremy Alden, Philip Boland, 2013-10-18 Regional development strategies have become the focus of attention in many countries in the 1990s This textbook provides a conceptual theoretical and empirical analysis of regional development strategies within a European context It examines the various regional development strategies which are currently being pursued within the regions of Europe defined in its loosest term to include East and West The book describes how many different European regions are attempting to reduce regional disparities by engaging themselves in coherent and focused regional development strategies and there is also private sector approach to regional economic development There are many case studies from Europe and from other parts of the world including Japan thereby providing lessons that different countries and regions can learn from each other *Coherence of EU Regional Policy* John Bachtler, Ivan Turok, 1997-05-02 This book brings together a rich selection of up to date practical experience of EU regional policy from across Europe It provides different perspectives on the design and operation of regional development strategies

Who Governs Scotland? Alex Wright, 2005 This book addresses the premise that the question of who governs Scotland has become increasingly ambiguous thanks in part to European integration globalization and devolution within the UK It argues that although the concept of Multi level governance helped illuminate regionalism with the EU it was not an appropriate model for Scotland This well researched and powerfully argued book adds greatly to the debate on constitutional reform and offers invaluable insight into the Scottish Parliament's foreign affair agenda It offers an illuminating read to students policy makers and politicians

Guide to Community Financing for Industry, 1997

The New World Architecture Jose Magone, 2017-07-28 The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a power vacuum in the 1990s that the European Union has only reluctantly begun to fill It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s With respect to its international role reorganization of the EU's external relations department was high on the list The New World Architecture explores the contribution that the European Union is making to the emerging global governance system It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems It explores three regimes of governance that are contributing to holding together the new emerging EU multilevel governance system None of these is complete all are partial They include the political regime of governance the socioeconomic regime of governance and the territorial regime of governance The author assesses the impact of the European Union on global politics The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation Magone argues that within the next twenty five years global governance may and should emerge as the new and reconfigured stable system of international relations In this system the European Union is and will remain the most advanced regional system This volume will be of interest to specialists scholars and students of European Politics and the European Union

The Regional and Urban Policy of the European Union Philip McCann, 2015-01-30 The regional and urban development policy of the European Union or more precisely EU Cohesion Policy is undergoing change This development is driven by the enormous transformations in European regions and by shifts in thinking and analysis The iss

Locality and Identity Jane Holder, Donald McGillivray, 2019-01-15 First published in 1999 this volume is concerned with how issues of identity and locality globalization and ethics valuing the environment environmental justice and the use of traditional and new legal forms cross the disciplines of law ethics geography political science and social theory

Necessarily diverse the collection both explores and confronts the limitations of law that prevent recognition of the relationship between humans and nature

European Cohesion C. Rumford, 2000-04-19 This book addresses the problem of cohesion in the European Union It examines EU cohesion policies and other policies which significantly reduce the likelihood of cohesion being achieved It challenges the idea that regional policy is a form of wealth distribution It argues that cohesion rather than being an objective in its own right has been systematically redefined as a tool of competitiveness and that neoliberal economic priorities have led to the privileging of regional autonomy over cohesion

European Dimensions John Field, 1998 Field addresses the European Union's desire for a unified approach to education and its content exploring the origin of this interest the tensions that underlie the policies and its impact at national level

Transforming conflict through social and economic development Sandra Buchanan, 2016-05-16 Transforming conflict through social and economic development examines lessons learned from the Northern Ireland and Border Counties conflict transformation process through social and economic development and their consequent impacts and implications for practice and policymaking with a range of functional recommendations produced for other regions emerging from and seeking to transform violent conflict It provides for the first time a comprehensive assessment of the region's transformation activity largely amongst grassroots actors enabled by a number of specific funding programmes namely the International Fund for Ireland Peace I II and III and INTERREG I II and IIIA These programmes have been responsible for a huge increase in grassroots practice which to date has attracted virtually no academic analysis this book seeks to fill this gap In focusing on the politics of the socioeconomic activities that underpinned the elite negotiations of the peace process key theoretical transformation concepts are firstly explored followed by an examination of the social and economic context of Northern Ireland and the border counties The three programmes and their impacts are then assessed before considering what policy lessons can be learned and what recommendations can be made for practice This is underpinned by a range of semi structured interviews and the author's own experience as a project promoter through these programmes in the border counties for more than a decade The book will be essential reading for students practitioners and policymakers in the fields of peace and conflict studies conflict transformation peacebuilding post agreement reconstruction and the political economy of conflict and those interested in contemporary developments in the Northern Ireland peace process
