The Legal Architecture of English Cathedrals Norman Doe, 2017-08-15 This original book is a comprehensive richly documented and critical examination of laws applicable to Anglican cathedrals in England some of the most iconic monuments in the national heritage and centres of spiritual and cultural capital Law is the missing link in the emerging field of cathedral studies The book fills this gap It explores historical antecedents of modern cathedral law traces aspects of them that still endure and explains the law with particular reference to the recommendations of the Archbishops Commission on Cathedrals 1994 which led to the most radical changes in the legal history of these churches since the Reformation culminating in the Cathedrals Measure 1999 and associated later legislation The book compares the domestic constitutions and statutes of all the cathedrals of the Church of England today old foundations new foundations and parish church cathedrals as well as policies and guidelines applicable to or adopted by them Whilst national law acts as a fundamental unifying force there is considerable diversity as between these in terms of the breadth and depth of their coverage of topics In the socio legal tradition the book also explores through interviews with clergy and others at half of the cathedrals how laws are experienced in practice These reveal that whilst much of the law is perceived as working well there are equally key areas of concern To this end the book proposes areas for further research and debate with a view to possible reform Taking an architectural feature of cathedrals as the starting point for each chapter from cathedral governance through mission ministry music and education to cathedral property what emerges is that law and architecture have a symbiotic relationship so that a cathedral is itself a form of juristecture

A Guide Book to Books Edmund Beale Sargant,Bernhard Whishaw,1891

England's Other Cathedrals Paul Jeffery, 2012-03-05 England's great cathedrals are widely considered to be the country's finest and most beautiful possessions. Few people realise however that in addition to these famous buildings there are many others that share or once shared some of that greatness. These other cathedrals have very varied origins. There were cathedrals established in Anglo-Saxon times that subsequently lost that status. Further cathedrals founded after the Norman Conquest also later ceased. Henry VIII had plans to elevate many great monastic churches to cathedral status but most were unfulfilled. From the nineteenth century onwards many new cathedrals have been created both by the Church of England and by other Churches. Altogether eight groups are discussed containing in total well over a hundred buildings. Most are fine and many are or were in their size and magnificence fully comparable with the great cathedrals themselves. Some today stand complete and glorious. Others are now mutilated or in ruin. Some have been completely destroyed but even these may stir us by their lost glories. Paul Jeffery explores the often fascinating episodes of history that lie behind these groups of magnificent and frequently forgotten buildings. The spotlight is then turned on each one revealing many architectural and historical treasures.
