DeRosa, 2020-07-23 In February 2019 Donald Trump announced the United States withdrew from the landmark Cold War era Intermediate Range Nuclear Forces Treaty with Russia sparking worldwide concerns over the specter of a new nuclear arms race The rational actor and game theoretic models dominating international relations literature failed to predict or explain this strategic choice Rationalist normative and materialist models of strategic choice saturate the study of international relations Scholars continue to expose the shortfalls in these approaches in explaining or predicting outcomes of strategic interactions In this timely study John P DeRosa advances a new model of strategic choice through a narrative lens This narrative turn reframes the logic to emphasize the propositions of motives perceptions preferences and the reflexive

**International Law and the Proliferation of Weapons of Mass Destruction** Daniel H. Joyner,2009-03-05 Proliferation of WMD technologies is by no means a new concern for the international community Indeed since the signing of the Nuclear Non proliferation Treaty in 1968 tremendous energies have been expended upon diplomatic efforts to create a web of treaties and international organisations regulating the production and stockpiling of WMD sensitive materials within states as well as their spread through the increasingly globalised channels of international trade to other states and non state actors However the intervention in 2003 by Western powers in Iraq has served as an illustration of the importance of greater understanding of and attention to this area of law as disagreements over its content and application have once again lead to a potentially destabilising armed intervention by members of the United Nations into the sovereign territory of another member state Other ongoing disputes between states regarding the character of obligations assumed under non proliferation treaty instruments and the effect of international organisations decisions in this area form some of the most contentious and potentially destabilising issues of foreign policy concern for many states This book provides a comprehensive analysis of international law and organisations in the area of WMD proliferation It will serve both as a reference for understanding the law as it currently exists in its political and economic context as well as an analysis of areas in which amendments to existing law and organisations are needed
