Guided Discovery Tutoring Mark Elsom-Cook,1990 *Intelligent Language Tutors* V. Melissa Holland,Jonathan D. Kaplan,Michelle R. Sams,2014-01-09 The techniques of natural language processing NLP have been widely applied in machine translation and automated message understanding but have only recently been utilized in second language teaching This book offers both an argument for and a critical examination of this new application with an examination of how systems may be designed to exploit the power of NLP accomodate its limitations and minimize its risks This volume marks the first collection of work in the U S and Canada that incorporates advanced human language technologies into language tutoring systems covering languages as diverse as Arabic Spanish Japanese and English The book is organized into sections that express the levels of analysis dealt with in learning and teaching a language and with the tasks of the student as writer reader conversant and actor in the world These sections bring together research by specialists in linguistics artificial intelligence psychology instructional design and language teaching In addition to providing detailed descriptions of working systems amply illustrated with screens from lesson and authoring interfaces the contributors address a spectrum of common issues What can current NLP technology contribute to computer assisted language instruction and to research on language learning How can this technology meet the demands of pedagogical theory for communicative language teaching in authentic contexts How can designers constrain tutoring environments to ensure accurate analysis of learners language What can NLP based systems teach us about language acquisition about linguistic theory and about theories of language pedagogy What lessons have been learned in using these systems to date Discipline specific issues are illuminated as well the relative merits of the major syntactic frameworks for NLP based language tutoring the adaptation of theories like lexical conceptual structure to support semantic interpretation the integration of input language with visual microworlds and dialogue games the pragmatics of the tutoring discourse the selection of instructional principles to guide system design and the accomodation of design to individual differences and learner styles A concluding section assesses this work from larger theoretical and practical perspectives experimental psychology and psycholinguistics linguistics language teaching and second language acquisition research

Student Modelling: The Key to Individualized Knowledge-Based Instruction

Jim E. Greer,Gordon I. McCalla,2013-06-29 This book is the result of a NATO sponsored workshop entitled Student Modelling The Key to Individualized Knowledge Based Instruction which was held May 4 8 1991 at Ste Adele Quebec Canada The workshop was co directed by Gordon McCalla and Jim Greer of the ARIES Laboratory at the University of Saskatchewan The workshop focused on the problem of student modelling in intelligent tutoring systems An intelligent tutoring system ITS is a computer program that is aimed at providing knowledgeable individualized instruction in a one on one interaction with a learner In order to individualize this interaction the ITS must keep track of many aspects of the leamer how much and what he or she has learned to date what learning styles seem to be successful for the student and what seem to be less successful

what deeper mental models the student may have motivational and affective dimensions impacting the learner and so on Student modelling is the problem of keeping track of all of these aspects of a learner's learning *Authoring Tools for Advanced Technology Learning Environments* T. Murray, S. Blessing, S. Ainsworth, 2013-04-18 This edited book gives a comprehensive picture of the state of the art in authoring systems and authoring tools for advanced technology instructional systems It includes descriptions of fifteen systems and research projects from almost every significant effort in the field The book will appeal to researchers teachers and advanced students working in education instructional technology and computer based education psychology cognitive science and computer science **New Directions for Intelligent Tutoring Systems**

Ernesto Costa, 2012-12-06 This book is a result of the NATO Advanced Research Workshop on New Directions for Intelligent Tutoring Systems held in Sintra Portugal October 6-10 1990 The main idea behind the workshop was to bring together scientists with different concerns about Intelligent Tutoring Systems ITS in order to discuss the positive and negative aspects of the current architecture paradigm expert module student module instructional module and interface module and eventually propose some modifications or radical changes to it This was a consequence of the increasing malaise felt currently by researchers in the area of artificial intelligence and education and in particular by those concerned with ITS One symptom of this state of affairs is the fact that people have started talking about Intelligent Learning Environments ILE instead of ITS To understand the reasons for this situation we promoted the discussion of questions like To what extent do we need the technology of expert systems in ITS Which other relevant AI techniques and methodologies are urgently needed Is ITS a tool for knowledge communication or is it rather a belief system How can the research already done on interactions among agents be utilized Is it possible to find a formal theory to describe and solve the current problems with ITS The book contains the revised versions of the papers presented at the workshop The new texts reflect the discussions that took place at the meeting *Using Information Technology in Mathematics Education* James Tooke, Norma Henderson, 2024-11-15

Computers have changed the ways that mathematics are taught and learned Is your institution taking advantage of what today's technology offers With contributions from researchers and practitioners alike Using Information Technology in Mathematics Education explores the impact of the computer on the curriculum the teaching and learning of mathematics and the professional development of teachers both pre-service and in-service As editor James Tooke states The connection between mathematics and the computer is obvious Elementary notions of mathematics gave rise to the computer advanced notions gave it a more powerful state As the computer advanced it expanded mathematics allowing the creation of further branches of the field for instance fractal geometry had no reality until the advent of high speed computers In its look at the relationship between mathematics the computer and mathematics education Using Information Technology in Mathematics Education addresses the computer as a vehicle for teaching calculus at Texas A&M includes reports from several programs that have utilized the computer when teaching mathematics at lower levels of content than calculus such as intermediate

algebra and geometry examines the computer's role in student learning probability discusses the use of computers in the professional development of teachers explores ways to use computers to reduce mathematics anxiety Using Information Technology in Mathematics Education examines the history and impact of computers in mathematics and mathematics education from the early crude computer assisted instruction efforts through LOGO software for elementary schools through MAPLE for the university to the Web based calculus courses now being offered by outstanding universities Use it to facilitate learning and teacher growth in your institution **The Role of Communication in Learning To Model** Paul Brna, Michael Baker, Keith Stenning, Andree Tiberghien, 2014-05-12 This book is much more education driven than expected I thought it was more likely to be at modelling HCI end I think I need to work on an ABI blurb with this in mind Lots of contributors were dropped which may be why it came out with this emphasis **E-Learning as a Socio-Cultural System: A Multidimensional Analysis** Zuzevičiūtė, Vaiva, Butrimė, Edita, Vitkutė-Adžgauskienė, Daiva, Vladimirovich Fomin, Vladislav, Kikis-Papadakis, Kathy, 2014-06-30 Information and communication technologies play a crucial role in a number of modern industries Among these education has perhaps seen the greatest increases in efficiency and availability through Internet based technologies E Learning as a Socio Cultural System A Multidimensional Analysis provides readers with a critical examination of the theories models and best practices in online education from a social perspective evaluating blended distance and mobile learning systems with a focus on the interactions of their practitioners Within the pages of this volume teachers students administrators policy makers and IT professionals will all find valuable advice and enriching personal experiences in the field of online education

Computer Science Education Research Sally Fincher, Marian Petre, 2005-09-26 This book provides an overview of how to approach computer science education research from a pragmatic perspective It represents the diversity of traditions and approaches inherent in this interdisciplinary area while also providing a structure within which to make sense of that diversity It provides multiple entry points to literature to me

Pedagogy and Learning with ICT Bridget Somekh, 2007-06-11 Bridget Somekh draws on her experience of researching the introduction of ICT into education to look at ICT development over the last twenty years The book provides a fascinating in depth analysis of the nature of learning ICT pedagogies and the processes of change for teachers schools and education systems It covers the key issues relating to the innovation of ICT that have arisen over this period including the process of change educational vision for ICT teacher motivation and engagement the phenomenon of fit to existing practices systemic constraints policy and evaluation of its implementation students motivation and engagement the penetration of ICT into the home online learning and the disembodied teacher

Automating Instructional Design: Computer-Based Development and Delivery Tools Robert D. Tennyson, Ann E. Barron, 2012-12-06 This institute was organized and presented by an international group of scholars interested in the advancement of instructional design automation through theory research and applied evaluation Members of the organizing committee included Dr Klaus Breuer from disce Germany

Dr Jose J Gonzalez from Agder College of Engineering Norway Dr Begofia Gros from the University of Barcelona Dr J Michael Spector from the Armstrong Laboratory USA Dr Gonzalez co director of the institute and the staff of Agder College were directly responsible for the preparation and operation of the institute in Grimstad Norway The institute was held on the campus of Agder College of Engineering July 12 23 1993 The theme of the institute extended the initial work developed by the presenters at a NATO Advanced Research Workshop held in Sitges Spain in 1992 During the two week institute 21 presentations were made including papers and demonstrations In addition to the formal presentations working groups and on site study groups provided opportunities for the students to participate directly in program activities An important outcome for the working groups was the formal preparation of their efforts in chapters for this volume [Research on Technology in Social Studies Education](#) John Lee, Adam M. Friedman, 2009-11-01 Despite technology's presence in virtually every public school its documented familiarity and use by youth outside of school and the wealth of resources it provides for teaching social studies there has been relatively little empirical research on its effectiveness for the teaching and learning of social studies In an effort to begin to fill this gap in research literature this book focuses on research on technology in social studies education The objectives of this volume are threefold to describe research frameworks provide examples of empirical research and chart a course for future research endeavors Accordingly the volume is divided into three overarching sections research constructs and contexts research reports and research reviews The need for research is particularly acute within the field of social studies and technology As the primary purpose of social studies is to prepare the young people of today to be the citizens of tomorrow it is necessary to examine how technology tools impact improve and otherwise affect teaching and learning in social studies Given these circumstances we have prepared this collection of research conceptualizations reports and reviews to achieve three goals 1 Put forward reports on how research is being conducted in the field 2 Present findings from well designed research studies that provide evidence of how specific applications of technology are affecting teaching and learning in social studies 3 Showcase reviews of research in social studies It is with this framework that we edited this volume [Research on Technology and Social Studies Education](#) as an effort to address emerging concerns related to theorizing about the field and reporting research in social studies and technology The book is divided into four sections The first section of the book includes three descriptions of research constructs and contexts in social studies and technology The second section is focused on research reports from studies of student learning in social studies with technology The third section contains research reports on teachers pedagogical considerations for using technology in social studies In the fourth and final section we present work that broadly reviews and critiques research in focused areas of social studies and technology This volume contains twelve chapters each of which focuses on social studies content and pedagogy and how the field is affected and enhanced with technology The volume includes research and theoretical works on various topics including digital history digital video geography technology use in the K 12 social studies classroom and artificial intelligence

Adaptive Learning Environments Marlene Jones,Philip H. Winne,2012-12-06 Adaptive Learning Environments ALEs can be viewed as the intersection of two traditionally distinct areas of research instructional science and computer science They encompass intelligent tutoring systems interactive learning environments and situated learning environments There is increasing interest in effective instructional systems from education industry military and government sectors Given recent advances in hardware architecture and reduction of hardware costs the time is right to define the next steps in research and development of ALEs This book is an outgrowth of the presentations and discussions that took place at the NATO Advanced Study Institute held at the University of Calgary in July 1990 It contains chapters from both researchers in instructional science and researchers in computer science on the following topics Systems and architectures for instruction Representing curriculum and designing instructional tasks Environments to support learning Diagnosing students learning and adjusting plans for instruction Models of students metacognition motivation and learning strategies Student system interactions The book contains introductions critiques of each pair of chapters and a final chapter discusses the synthesis of instructional science and computer science

Software Visualization John Stasko,1998 Content Description Includes bibliographical references and index *Intelligent Tutoring Systems* Claude Frasson,Gilles Gauthier,1992-05-27 This volume of the Encyclopaedia offers a systematic introduction and a comprehensive survey of the theory of complex spaces It covers topics like semi normal complex spaces cohomology the Levi problem q convexity and q concavity It is the first survey of this kind The authors are internationally known outstanding experts who developed substantial parts of the field The book contains seven chapters and an introduction written by Remmert describing the history of the subject The book will be very useful to graduate students and researchers in complex

analysis algebraic geometry and differential geometry Another group of readers will consist of mathematical physicists who apply results from these fields **Knowledge Negotiation** Rod Moyse,Mark Elsom-Cook,1992 Presents a new approach to the design of intelligent tutoring systems The book focuses on the model of tutoring as an exercise in negotiation between tutor and student and presents an overall view of the implications of negotiated tutoring [International Workshop on Advanced Learning Technologies](#) ,2000 This text features the conference proceedings of the International Workshop on Advanced Learning Technologies IWALT 2000 Topics addressed include adaptive hypermedia agents designing educational systems distance education electronic assessment intelligent tutoring systems and more **The International Encyclopedia of Education** Torsten Husen,T.N. Postlethwaite,1994-04-19 Scholarly information in all fields of human knowledge is in continuous flux Educational practices change not only as a result of reforms which are the subject of legislation but also in response to new societal demands needs and changes in the economic conditions in different countries It is this change within the various fields of education and the fact that many of the entries in the first edition were written in the early 1980s which convinced the editors in 1990 of the need for a completely new edition of the Encyclopedia The vast majority of entries in the second edition are completely new in only a few cases have entries from the first edition or from the supplementary volumes been updated New entries have also been commissioned on specific topics sociology of education girls and women in education the history of education anthropology philosophy of education and instructional psychology so that the scope of the original sections has been expanded Every effort has been made to present the most up to date information about the theme dealt with in each entry Authors were selected on the strength of their worldwide knowledge of the topic on which they were asked to write The authors of over 1 200 entries represent 96 countries The Honorary Editorial Advisory Board helped ensure that a balance was achieved and contacts with international organizations assisted in selecting authors with a good international overview Particular attention has been paid to the inclusion of entries of special concern to the Third World This is clearly evident in those entries dealing with educational and policy planning economics of education vocational education and comparative education
