## **Guidelines For The Evaluation Of X500 Directory Products:**

*Guidelines for the Evaluation of X.500 Directory Products* John Tebbutt, 1995 Provides readers with the means to evaluate X 500 products and make informed choices as to which available products best match the requirements of their organizations The X 500 Directory is a distributed database capable of storing information about people and objects in various nodes or servers distributed across a network These servers acting in concert provide the potentially global access to information made possible by X 500 technology Especially useful for procurement officials and systems administrators Bibliography Charts and tables *Journal of Research of the National Institute of Standards and Technology* ,1995 *Understanding and Deploying LDAP Directory Services* Tim Howes, Mark Smith, Gordon S. Good, 2003 Lightweight Directory Access Protocol LDAP is the standard for directory information access and is the underlying protocol for a variety of email systems Web systems and enterprise applications LDAP enables central management of users groups devices and other data thereby simplifying directory management and reducing the total cost of ownership *Understanding and Deploying LDAP Directory Services* written by the creators of the protocol is known as the LDAP bible and is the classic text for learning about LDAP and how to utilize it effectively The Second Edition builds on this success by acting as an exhaustive resource for designing deploying and maintaining LDAP directory services Topics such as implementation pitfalls establishing and maintaining user access to information troubleshooting and real world scenarios will be thoroughly explored *Publications of the National Institute of Standards and Technology ... Catalog* National Institute of Standards and Technology (U.S.), National Institute of Standards and Technology (U.S.). Information Resources and Services Division, 1994 **User Modeling Servers** Josef Fink, 2004 Software systems that adapt their services to characteristics of individual users have already proven to be more effective and or usable than non adaptive systems User adaptive systems rely on user modeling systems for exhibiting personalized behavior Quite a few user modeling systems have been developed during the past fifteen years The decisions as to what useful services functionalities of these systems are were mostly based on intuition and or experience gained from studying the literature of a few user adaptive applications Results from neighboring disciplines and commercial developments have been largely ignored Empirical evaluations of the practical applicability of user modeling systems were hardly ever carried out This book is different the author takes an interdisciplinary and application oriented approach defines meaningful requirements on user modeling servers gives an overview of existing systems pinpoints their deficiencies develops a very novel architecture for user modeling servers implements it and tests its utility both within an application project and in empirically founded performance experiments His excellent synthesis of scientific and industrial concerns which rests on research in data bases distributed systems human computer interaction user modeling statistics and e commerce and his very convincing solutions make this book a worthwhile reading both for researchers and for industrial practitioners *Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations for 1995*
