Guidelines for Consequence Analysis of Chemical Releases, 2010 *Revalidating Process Hazard Analyses* Walter L. Frank, David K. Whittle, 2010-08-27. The foundation of any successful process safety program is a current set of process hazard analyses (PHAs) for each of its processes. Revalidating PHAs to keep them up to date and applicable is a must. This book is derived from the experience of many companies in the chemical and hydrocarbon processing industries and presents demonstrated, concise, and common sense approaches for a resource-effective revalidation of PHAs. It includes flowcharts, checklists, and worksheets that provide invaluable assistance to the revalidation process. Deflagration and Detonation Flame Arresters Stanley S. Grossel, 2010-08-26. Designed for chemical engineers and other technical personnel involved in the design, operation, and maintenance of facilities and equipment where deflagration and detonation flame arresters (DDFAs) may be required, this book fosters effective application and operation of DDFAs through treatment of their principles of operation, selection, installation, and maintenance methods. This reference covers a broad range of issues concerning DDAs, including an overview of deflagration and detonation prevention and protection practices, an overview of combustion and flame propagation, and how DDAs halt propagation. Deflagration and detonation flame arrester technology, installation in process systems, Regulations, codes, and standards, illustrative examples, calculations, and guidelines for DDA selection. Appendices including a glossary, a flame arrester specification sheet for vendor quotation, and a listing of flame arrester manufacturers.
