Guiding Principles For The Planet The New Paradigms Meditations On Cartesian Themes:

Guiding Principles for the Planet Lorna Green,2004 She has heard the voices Lorna Green is someone to be listened to Thomas Berry These essays are offered as a new system of thought to a world sorely in need of one They are a self portrait in ideas and replace the dualisms of the previous age that have brought about our present ills with a fresh new Feminine unity consciousness of Being They are a metaphysics founded on one key idea That consciousness is the light we are seeking that consciousness is first and fundamental in the universe not matter The universe is essentially spiritual not material This Copernican reversal has implications for every department of knowledge especially for modern science and our ways of thinking about ourselves the Earth and the universe Written around the author s experience of wilderness life as a convert to God after long studies in science and philosophy this work will you re enchant you with the possibilities for life on Earth Each essay is short simply and clearly written accessible to young and old alike *The Reign of the Holy Spirit* Lorna Green,2005 A superb idea superbly done Thomas Berry *Reign* is a prophetic work an interpretation of what these tumultuous times this dawn of a new Age are really about I take my inspiration from the 12th century prophet Joachim de Floris There has been a Reign of the Father we are in the Reign of the Son there must come a Reign of the Holy Spirit My contention is that in all the darkness and disorder of the contemporary world we are moving into the Reign of the Holy Spirit The Holy Spirit is the Spirit of Love the Feminine principle of the trinity Love is flowing into the planet right now surfacing the darkness before it cleansing our souls renewing us from the depths of our beings All are affected by this Awakening this momentous shift happening on the Earth plane My key is Christ Only now are we ready for the Love that Jesus taught our true fullness of being our soul imagery our reconciliation with the Earth Here is a new interpretation of reality a new enlightenment spirituality sexuality a new understanding of Divinity All are called chosen have a role to play God is with us The Light is in the world and the darkness shall not overcome it The Reign of the Holy Spirit completes and crowns my metaphysical works May you find in it perspective and inspiration rest and renewal Enjoy **The Proof of the External World** Steven M. Duncan,2008-04-01 Descartes attempt to ground the possibility of human knowledge in the existence of God was judged to be a complete failure by his contemporaries and this remains the universal opinion of philosophers to this day despite the fact that three and a half centuries of secular epistemology which attempts to ground the possibility of knowledge either in the unaided human intellect or in natural processes has failed to do any better Further the leading twentieth century attempts at theistic epistemology reject both the conception of knowledge and the standards of epistemic evaluation that Descartes takes for granted In this book partly an interpretation of Descartes and partly an attempt to complete his project the author attempts to show that a theistic epistemology incorporating Platonic and Aristotelian Thomist elements can revitalize the Cartesian approach to the solution of the central problems of epistemology including that most elusive of prizes the proof of the external world From the author s preface Creatures of Attention Johannes Wankhammer,2024-06-15

Creatures of Attention excavates the early modern prehistory of our late modern crises of attention At the threshold of modernity philosophers scientists and poets across Europe began to see attention as the key to autonomous agency and knowledge Recovering the philosophical and literary works from eighteenth century Germany in which attention subject and aesthetics developed their modern meanings Johannes Wankhammer examines control over attention as the cultural technique underpinning the ideal of individual autonomy Aesthetics founded by Alexander Baumgarten as a science of sense perception challenged this ideal by reframing art as a catalyst for alternative modes of selfhood and attention While previous scholarship on the history of attention emphasized the erosion of subjectivity by industrial or technological modernization Wankhammer asks how attention came to define subjectivity in the first place When periodically recurring crises of attention threaten the coherence of the subject the subject comes undone at the very seams that first sutured it together Creatures of Attention offers the first systematic study of a foundational discourse on attention from 1650 to 1780 Presenting pre Kantian aesthetics as a critique of the Enlightenment paradigm of strained attention the book offers a fresh perspective on poetics and aesthetics in eighteenth century Germany

Wittgenstein and Hegel Jakub Mácha,Alexander Berg,2019-06-17 This book brings together for the first time two philosophers from different traditions and different centuries While Wittgenstein was a focal point of 20th century analytic philosophy it was Hegel s philosophy that brought the essential discourses of the 19th century together and developed into the continental tradition in 20th century This now outdated conflict took for granted Hegel s and Wittgenstein s opposing positions and is being replaced by a continuous progression and differentiation of several authors schools and philosophical traditions The development is already evident in the tendency to identify a progression from a Kantian to a Hegelian phase of analytical philosophy as well as in the extension of right and left Hegelian approaches by modern and postmodern concepts Assessing the difference between Wittgenstein and Hegel can outline intersections of contemporary thinking

The Ethical Subject of Security J. Peter Burgess,2011-02-15 While critical security studies largely concentrates on objects of security this book focuses on the subject position from which securitization and other security practices take place First it argues that the modern subject itself emerges and is sustained as a function of security and insecurity It suggests consequently that no analytic frame can produce or reproduce the subject in some original or primordial form that does not already reproduce a fundamental or structural insecurity It critically returns through a variety of studies to traditionally held conceptions of security and insecurity as simple predicates or properties that can be associated or not to some more essential more primeval more true or real subject It thus opens and explores the question of the security of the subject itself locating through a reconstruction of the foundations of the concept of security in the modern conception of the subject an irreducible insecurity Second it argues that practices of security can only be carried out as a certain kind of negotiation about values The analyses in this book find security expressed again and again as a function of value cast in terms of an explicit or implicit philosophy of life of culture of individual and collective anxieties and aspirations

of expectations about what may be sacrificed and what is worth preserving By way of a critical examination of the value function of security this book discovers the foundation of values as dependent on a certain management of their own vulnerability continuously under threat and thus fundamentally and necessarily insecure This book will be an indispensable resource for students of Critical Security Studies Political Theory Philosophy Ethics and International Relations in general

Orbiting The Moons Of Pluto: Complex Solutions To The Einstein, Maxwell, Schrodinger And Dirac Equations Richard L Amoroso,Elizabeth A Rauscher,2011-03-21 The Maxwell Einstein Schr dinger and Dirac equations are considered the most important equations in all of physics This volume aims to provide new eight and twelve dimensional complex solutions to these equations for the first time in order to reveal their richness and continued importance for advancing fundamental Physics If M Theory is to keep its promise of defining the ultimate structure of matter and spacetime it is only through the topological configurations of additional dimensionality or degrees of freedom that this will be possible Stretching the exploration of complex space through all of the main equations of Physics should help tighten the noose on the fundamental theory This kind of exploration of higher dimensional spacetime has for the most part been neglected by M theorists and physicists in general and is taken to its penultimate form here
