## **Guilt Blame And Politics:**

Guilt, Blame, and Politics Allan Levite, 1998 Are political ideologies influenced by guilt and if so how Guilt Blame and Politics argues that this influence has been far greater than occasional discussions of liberal guilt would indicate For example it has affected socialism and Marxism far more than liberalism This is demonstrated by the fact that rich kids and intellectuals have always been drastically overrepresented in these proletarian focused movements to such an extent that socialism and Marxism cannot claim to have had working class origins The most important outcome of the guilt of the affluent and the educated has been the craving for big government Only a supreme authority figure offers relief from political guilt by taking on the responsibility of allocating resources making it appear that people s work roles and comforts were granted by official permission instead of coming from privilege

**The Politics of Trauma and Peace-Building** Cillian McGrattan, 2015-10-23 In marked contrast to literary historical and cultural studies there has been a limited engagement with the concepts and politics of trauma by political science and peacebuilding research This book explores the debate on trauma and peacebuilding and presents the challenges for democratization that the politics of trauma present in transitional periods It demonstrates how ideas about reconciliation are filtered through ideological lenses and become new ways of articulating communal and ethno nationalist sentiments Drawing on the work of Jacques Rancière and Iris Marion Young and with specific reference to the Northern Irish transition it argues for a shift in focus from the representation of trauma towards its reception and calls for a more substantive approach to the study of democracy and post conflict peacebuilding This text will be of interest to scholars and students of peace and conflict studies ethnic and nationalism studies transitional justice studies gender studies Irish politics nationalism and ethnicity

**Interdisciplinary Applications of Shame/Violence Theory** Roman Gerodimos, 2022-08-23 This book takes James Gilligan s theory of shame and violence as a starting point for an application of the model across disciplines psychology sociology philosophy political science cultural studies history architecture and urban studies and levels of analysis from the individual to the global It critically engages with shame theory exploring the existential origins the emotional linguistic cognitive and cultural manifestations and symptoms of shame in the mind in the body in public space and in the civic culture and its relationship with other emotions such as anger guilt and pride It also examines the role of shame in communities that are at the fault lines of current affairs identity politics and culture wars such as Brexit trans rights and racial equality The book contributes to the literature on political psychology and psychosocial studies by facilitating an innovative application of the concept of shame blending theory and practice focusing on gender as a key lever of the mechanism of shame and exploring the mechanics of shame and shame awareness so as to seek and propose a range of guiding principles practical models and possible solutions for the future

Managing Moral Emotions in Divided Politics Gabriella Szabó, 2024-10-19 This book explores how to identify and understand moral emotions shame guilt pride and hubris in political messages and news media Recognizing these emotions is

crucial for assessing morality's role in public discourse particularly as moral debates have deepened public divides on issues like abortion migration LGBTQ rights and freedom of speech These debates fuel political struggles between groups with different social values and moral intuitions especially during election campaigns where moral conflicts are used to distinguish opposing forces In these moral conflicts each ideological camp seeks to affirm its legitimacy while questioning its opponents reputations Thus understanding morality is vital for those interested in contemporary public discourses in divided nations This book stimulates discussion on emotion based morality moral language and discursive moral regulation in politics It offers innovative analytical frameworks to study how political communication contributes to public moralization The book combines descriptive explorative and comparative approaches to summarize findings from mixed method analyses qualitative and quantitative textual and visual content and survey of moral emotional messages and media portrayals of prime minister candidates during Hungary's 2022 General Election Campaigns Hungary serves as an illustrative case due to increasing concerns about the moral status of its political elite and extreme hostility between political blocs leading to polarized views on governance This book will be of interest to academics specializing in empirical moral studies and investigating public discussions in contentious and polarized societies

*Politics of Debt and Europe's Relations with the 'South'* Stefan Nygard, 2020-07-31 An annual collection of the best research on European and global themes the Annual of European and Global Studies publishes issues with a specific focus each addressing critical developments and controversies in the field Combines a discussion of the multi layered European and global North South divide with an effort to retrieve alternatives to the dominant divisive use of debt as staking out claims against another party Explores the consequences of the erasure of historical temporality in the recent period of e globalizatione and e individualizatione as well as new registers for political uses of the past under current conditions Draws on socio political moral philosophical and literary artistic analyses tracing the genealogy of debt through European history Focusing on Europe in a global context to offer critical historical and philosophical perspectives on debt and guiltDebt enables individuals and collectives to function and to expand their space of manoeuvre but it also creates hierarchies and possibilities for domination By drawing on analyses in political philosophy political science sociology history social theory and media studies the essays in this collection discover new and forgotten ways of thinking about debt and North South relations They combine a discussion of the European and global North South divide with an effort to retrieve alternatives to the dominant divisive uses of debt in staking out claims against someone else and as a means of social control

*Politics of Time* Leszek Koczanowicz, 2008 What has really happened in Poland since the election of 2005 After such spectacular events as the practice of lustration and the questioning of solidarity with the European Union one has to ask what is the nature of this newly emerging society As with many of the recent developments in former communist countries that seem to be mysterious and irrational the situation and ensuing problems are complex and the answers neither trivial nor easy This book by the distinguished Polish philosopher addresses these complexities through

the role of the communist past in post communist Poland It describes the events that led to the collapse of the Solidarity program and the growing influence of the nationalistic and religious parties in the government The author investigates the nature of social and political temporality and develops a theoretical framework that allows him to apply his conclusions not only to Poland but also to other formerly communist countries      Documenting World Politics Rens Van Munster,Casper Sylvest,2015-02-11 As a central component of contemporary culture films mirror and shape political debate Reflecting on this development scholars in the field of International Relations IR increasingly explore the intersection of TV series fiction film and global politics So far however virtually no systematic scholarly attention has been given to documentary film within IR This book fills this void by offering a critical companion to the subject aimed at assisting students teachers and scholars of IR in understanding and assessing the various ways in which documentary films matter in global politics The authors of this volume argue that much can be gained if we do not just think of documentaries as a window on or intervention in reality but as a political epistemology that like theories involve particular postures strategies and methodologies towards the world to which they provide access This work will be of great interest to students and scholars of international relations popular culture and world politics and media studies alike      The Politics of Human Rights Andrew Vincent,2010-07-08 The Politics of Human Rights provides a systematic introductory overview of the nature and development of human rights At the same time it offers an engaging argument about human rights and their relationship with politics The author argues that human rights have only a slight relation to natural rights and they are historically novel In large part they are a post 1945 reaction to genocide which is in turn linked directly to the lethal potentialities of the nation state He suggests that an understanding of human rights should nonetheless focus primarily on politics and that there are no universally agreed moral or religious standards to uphold them they exist rather in the context of social recognition within a political association A consequence of this is that the 1948 Universal Declaration is a political not a legal or moral document Vincent goes on to show that human rights are essentially reliant upon the self limitation capacity of the civil state With the development of this state certain standards of civil behaviour have become for a sector of humanity slowly and painfully more customary He shows that these standards of civility have extended to a broader society of states At their best human rights are an ideal civil state vocabulary The author explains that we comprehend both our own humanity and human rights through our recognition relations with other humans principally via citizenship of a civil state Vincent concludes that the paradox of human rights is that they are upheld to a degree by the civil state but the point of such rights is to protect against another dimension of this same tradition the nation state Human rights are essentially part of a struggle at the core of the state tradition      **Poetry, Politics, and the Body in Rimbaud** Robert St. Clair,2018-08-30 Bodies abound in Rimbaud s poetry in a way that is nearly unprecedented in the nineteenth century poetic canon lazy creative rule breaking bodies queer bodies marginalized and impoverished bodies revolting and revolutionary historical bodies The question that Poetry Politics and the Body seeks to answer is What does this

corporeal density mean for reading Rimbaud What kind of sense are we to make of this omnipresence of the body in the Rimbaudian corpus from first to last from the earliest poems in verse celebrating the sheer simple delight of running away from wherever one is and stretching one's legs out under a table to the ultimate flight away from poetry itself In response this book argues that the body appears often literally as a kind of gap breach or aperture through which Rimbaud's poems enter into contact with history and a larger body of other texts Simply put the body is privileged lyrical material for Rimbaud a figure for human beings in their exposed finite creatureliness and in their unpredictable agency and interconnectedness Its presence in the early work allows us not only to contemplate what a strange sensuous thing it is to be embodied to be both singular and part of a collective it also allows the poet to diagnose and the reader to perceive a set of seemingly intractable real socio economic political and symbolic problems Rimbaud's bodies are in other words utopian bodies sites where the historical and the lyrical the ideal and the material do not so much cancel each other out as become caught up in one another

*Women's Activism, Feminism, and Social Justice* Margaret A. McLaren, 2019 A wide range of issues besieges women globally including economic exploitation sexist oppression racial ethnic and caste oppression and cultural imperialism This book builds a feminist social justice framework from practices of women's activism in India to understand and work to overcome these injustices The feminist social justice framework provides an alternative to mainstream philosophical frameworks that promote global gender justice for example universal human rights economic projects such as microfinance and cosmopolitanism McLaren demonstrates that these frameworks are bound by a commitment to individualism and an abstract sense of universalism that belies their root neo liberalism Arguing that these frameworks emphasize individualism over interdependence similarity over diversity and individual success over collective capacity McLaren draws on the work of Rabindranath Tagore to develop the concept of relational cosmopolitanism Relational cosmopolitanism prioritizes our connections while crucially acknowledging the reality of power differences Extending Iris Young's theory of political responsibility McLaren shows how Fair Trade connects to the economic solidarity movement The Self Employed Women's Association and MarketPlace India empower women through access to livelihoods as well as fostering leadership capabilities that allow them to challenge structural injustice through political and social activism Their struggles to resist economic exploitation and gender oppression through collective action show the vital importance of challenging individualist approaches to achieving gender justice The book is a rallying call for a shift in our thinking and practice towards reimagining the possibilities for justice from a relational framework from independence to interdependence from identity to intersectionality and from interest to socio political imagination

**Your Past and the Press!** Joseph Michael Green, 2004 Through exploring the public depiction of Judge Robert Bork and Professor Lani Guinier *Your Past and the Press* elucidates how interest groups and the media influence the confirmation process for top level government appointees Illuminating the sequence of events characterized by the derailment of Bork and Guinier author Joseph Michael Green details the activities

surrounding the entire nomination process from the announcement of a nominee to his her ultimate defeat      **Political Reconciliation** Andrew Schaap,2004-11-23 Since the end of the Cold War the concept of reconciliation has emerged as a central term of political discourse within societies divided by a history of political violence Reconciliation has been promoted as a way of reckoning with the legacy of past wrongs while opening the way for community in the future This book examines the issues of transitional justice in the context of contemporary debates in political theory concerning the nature of the political Bringing together research on transitional justice and political theory the author argues that if we are to talk of reconciliation in politics we need to think about it in a fundamentally different way than is commonly presupposed as agonistic rather than restorative      **Postcolonial Realism and the Concept of the Political** Eli Park Sorensen,2021-04-28 As the scholarly world attunes itself once again to the specifically political this book rethinks the political significance of literary realism within a postcolonial context Generally postcolonial studies has either ignored realism or criticized it as being na ve anachronistic deceptive or complicit with colonial discourse in other words incongruous with the postcolonial This book argues that postcolonial realism is intimately connected to the specifically political in the sense that realist form is premised on the idea of a collective reality Discussing a range of literary and theoretical works Dr Sorensen exemplifies that many postcolonial writers were often faced with the realities of an unstable state a divided community inhabiting a contested social space the challenges of constructing a notion of the people often out of a myriad of local communities with different traditions and languages brought together arbitrarily through colonization The book demonstrates that the political context of realism is the sphere or possibility of civil war divided societies and unstable communities Postcolonial realism is prompted by disturbing political circumstances and it gestures toward a commonly imagined world precisely because such a notion is under pressure or absent      **Guilt** Katharina von Kellenbach,Matthias Buschmeier,2021-12-31 Across the globe guilt has become a contentious issue in discussions over historical accountability and reparation for past injustices Guilt has become political and it assumes a highly visible place in the public sphere and academic debate in fields ranging from cultural memory to transitional justice post colonialism Africana studies and the study of populist extremism This volume argues that guilt is a productive force that helps to balance unequal power dynamics between individuals and groups Moreover guilt can also be an ambivalent force affecting social cohesion moral revolutions political negotiation artistic creativity legal innovation and other forms of transformations With chapters bridging the social sciences law and humanities chapter authors examine the role and function of guilt in society and present case studies from seven national contexts The book approaches guilt as a generative and enduring presence in societies and cultures rather than as an oppressive and destructive burden that necessitates quick release and liberation It also considers guilt as something that legitimates the future infliction of violence Finally it examines the conditions under which guilt promotes transformation repair and renewal of relationships      Political Pluralism and the State Marcel Wissenburg,2008-08-04 This

is the first work in political theory to bring together IR comparative politics and political theory approaches to analyze the post sovereign state and develop a new interpretative scheme for social and political scientists

**Obesity Discourse and Fat Politics** Lee Monaghan, Rachel Colls, Bethan Evans, 2015-12-22 There is considerable rhetoric and concern about weight and obesity across an increasing range of national contexts Alarmist claims about an obesity time bomb are continually recycled in policy reports reviews and white papers each of which begin with the assumption that fatness is fundamentally unhealthy and damaging to national economies With contributions from the UK Canada the USA and Australia this book offers alternative critical perspectives on this alleged public health crisis which were in part developed through an Economic and Social Research Council seminar series on Fat Studies and Health at Every Size HAES Written by scholars from a range of disciplines and the health professions themes include an interrogation of statistical procedures used to construct the obesity epidemic overweight and obesity as cultural signifiers for Type 2 diabetes understandings of healthy eating and healthy weight in a problem population gendered expectations on men and women to lose weight the visual representation of obesity tensions when researching anti fatness critical dietitians engagement with HAES alternative ways of promoting physical activity and representations of obesity in the media This book was originally published as a special issue of Critical Public Health

Teaching Politics Beyond the Book Robert W. Glover, Daniel Tagliarina, 2012-11-22 To teach political issues such as political struggle justice interstate conflict etc educators rely mostly on textbooks and lectures However many other forms of narrative exist that can elevate our understanding of such issues This innovative work seeks new ways to foster learning beyond the textbook and lecture model by using creative and new media including graphic novels animated films hip hop music Twitter and more Discussing the opportunities these media offer to teach and engage students about politics the work presents concrete ways on how to use them along with teaching and assessment strategies all tested in the classroom The contributors are dedicated educators from various types of institutions whose essays span a variety of political topics and examine how non traditional texts can promote critical thinking and intellectual growth among students in colleges and universities The first of its kind to discuss a wide range of alternative texts and media the book will be a valuable resource to anyone seeking to develop innovative curricula and engage their students in the study of politics

**Seriously Funny** Samuel Schmidt, 2014-03-06 Exploring the ways in which political humor has developed and operated in Mexico over more than four centuries this is groundbreaking work argues persuasively that political jokes are acts of rebellion their objective is not to overthrow a government but to correct its mistakes

**Politics in the Pulpit** Eric Ayala, 2023-05-16 Our nation is becoming ever more politicized Everything from the environment to human gender have become political issues While the old sentiment of not preaching politics from the pulpit may have once been good advice it is increasingly more difficult not to The problem preachers have is knowing how to wade through political issues without becoming a political pundit A preacher can end up either merely repeating party talking points or retreating into avoiding biblical topics to avoid dealing with

political hot button issues Thankfully our age is not the only one to have ever suffered political crises and we can learn from the preachers of the past One such preacher was John Chrysostom He was not just a preacher but also a man steeped in a sensitive political climate Through the work of a dedicated sermon series Chrysostom was able to calm tensions in a city who had rioted and destroyed statues of the emperor These Homilies on the Statues proved to be a pivotal and powerful example of political preaching By examining the homiletical methods of John Chrysostom s Homilies on the Statues we can learn how to responsibly and powerfully engaging political topics in our own day

Dividing United Europe Aline Sierp, Christian Karner, 2020-06-29 Pictures of Angela Merkel in a Nazi uniform the burning of German flags newspaper articles portraying Southern Europe as work shy and Northern Europe as tight fisted The Eurozone crisis has thrown up old stereotypes often digging into well established historical images of the other The conscious or tacit ab use of national prejudices by politicians and parts of the media and the strong emotional reactions among European citizens have caused a lot of public concern about the likely negative implications of such reawakening of national clich s and the newly hardening boundaries they construct for the process of European integration It is evident that current and recent crises confront European citizens with profound dilemmas which they seek to make sense of and in response to which much new political mobilisation takes place At the same time some of the interpretative and political reactions thus generated also have the potential to become very destructive processes putting into question years of integration efforts This book brings together scholars who examine the nexus between economic crisis national identities and the use of historical images and prejudices and stereotypes by focusing particularly on media and political discourses in different European countries In addition to detailed empirical discussions covering diverse national settings across Europe the different contributions discuss and offer a variety of conceptual and methodological approaches within the inter disciplinary study of national identities prejudice and stereotyping in the context of socio economic and political crises This book was originally published as a Special Issue of National Identities
