in human safety and security concerns related to the spread of attacks by violent extremist groups across the eastern flanks of both countries The increasing frequency and intensity of these attacks have led to the loss of lives property and the displacement of large groups of people The attendant deepening of food livelihood and human insecurities has contributed to a rural exodus of men and women to cities and other economic enclaves in search of alternate sources of food and income The arrival of displaced persons fleeing the attacks has increased pressure on already limited food stocks and other assets of host communities COVID 19 added another layer of vulnerability In addition to the disease burden lockdowns and restrictions on the movement of persons affected the ability of communities to travel to engage in nonfarm economic activities for supplementary income and food This greatly affected the food and livelihood security systems of the populations in these already impoverished and fragile communities
