## DEBRIEF

Described by the pilots that fought

When Saddam Hussein's Republican Guard rolled across the Kuwait border on 2 August 1990, he could never have imagined the force of arms that would be brought to bear on his hapless troops and country. He had entered a new world of warfare, and he suffered a campaign of unsurpassed intensity, technology and devastation.

Most of that devastation rained down from the skies. It was by far the most intense air campaign in history; warplanes, aircrews, tactics, weapons and technology combined in a force of unprecedented precision and killing power.

Hundreds of innovations were in battle for the first time: "Stealth Fighters" loitered unseen over defended targets to make precision laser-guided attacks; J-STARS found, plotted and ordered the destruction of any enemy vehicle in a hundred square miles; Apaches fought with rockets, missiles or guns from unseen stand-off range; Tornados devastated enemy airfields with a thousand bomblets; AWACS orchestrated attacks of a thousand warplanes.

But it wasn't only new technology. Plenty of aircraft in the conflict were older than their pilots: B-52s, Hercules gunships, OV-10 battlefield spotters, Buccaneer bombers, Phantom 'Wild Weasels', Navy Intruders and Marine Stallions. These stalwarts fought in a more traditional environment, with pilots sweating it out with more wit than software.

And the aircrews themselves, forged in the age-old traditions of airmanship, immersed in new technology and then edged in the super-realistic combat environments of Red Flag exercises: they were the masters of the Gulf skies.

It is from these pilots and aircrew that this *Debrief* unfolds. From the cockpits of high-altitude Eagles to the Apache gunner's seat in the dust and mud of the soldier's aerial battlefield; it is their story that is told.

*Gulf Air War Debrief* reveals the whole air war from first alert to final victory. With numerous interviews, tables, kill lists, ordnance analyses, maps, diagrams, contemporary Gulf color photographs and personal snapshots, this unique air war is captured in this fascinating volume.

Nordeen,2014-12-02 Lon O Nordeen has completely updated his 1985 chronicle of military aviation s evolving role in warfare now covering the major conflicts of the past four decades He presents the historical and political background of each conflict and includes in depth discussions of the aircraft weapons tactics training new systems and other factors that influenced the outcome of each war New and existing chapters have been enhanced with information based on recently declassified material especially regarding Vietnam and new sources in Egypt Israel and the former Soviet Union As smart bombs have become more successful in reducing the risks for pilots and frontline troops air missile warfare has become the central player in military conflicts *Air Warfare in the Missile Age* Second Edition is a valuable resource for understanding the evolution of modern air warfare      Desert Storm Air War Jim Corrigan,2017-08-01 The air campaign that opened the Gulf War in January 1991 was one of the most stunning in history For five weeks American and other Coalition aircraft pounded enemy targets with 88 000 tons of bombs Sorties more than 100 000 of them were launched from bases in Saudi Arabia from aircraft carriers in the Persian Gulf and Red Sea and even from bases in the United States The skies over Iraq and Kuwait were filled with a dizzying array of new and improved weapons Tomahawk and Hellfire missiles stealth aircraft and laser guided smart bombs and the results were impressive The Coalition swiftly established air superiority and laid the foundation for the successful five day ground campaign that followed The results were also highly visible as the American people watched the bombings unfold in grainy green video game like footage broadcast on CNN and the nightly news The overwhelming success of the Desert Storm air campaign has made it influential ever since from the shock and awe bombing during the Iraq War in 2003 to more recent drone operations but the apparent ease with which the campaign was won has masked the difficulty and the true achievement of executing such a vast and complex operation Using government reports scholarly studies and original interviews Jim Corrigan reconstructs events through the eyes of not only the strategists who planned it but also the pilots who flew the missions      **Eject! Eject!** John Nichol,2023-05-25 Eject Eject When the call is made to abandon an aircraft it s only the beginning of the story From the Sunday Times bestselling writer John Nichol author of Spitfire Lancaster and Tornado comes a brilliant new book that reveals the astonishing story of an invention that has saved many thousands of lives around the world including his own the ejection seat Nichol tells the remarkable tale of how the ejection seat was first conceived during the Second World War as countless lives were lost in accidents and in battle In the wake of the war that technological race to save aircrew lives using explosive seats continued at an incredible pace Nichol tells the story of the brave men who risked their lives testing those early devices and interviewed the first British pilot to eject back in 1949 when ejection from pulling the handle to being under the parachute took thirty seconds Today that figure is down to around one second Packed with interviews with aircrew who know exactly how it feels to Bang Out from an

aircraft at high speed both in peace and in war the book gives the reader a vivid sense of what that life saving experience feels like but also features the moving accounts of what happens next from the viewpoint of both the crews and their families who often have little or no information about whether or not their loved ones have survived Because ejecting is just the start of a journey Packed with dramatic action incredible science and moving recollections Eject Eject is an essential read
