Post-Western Histories of Architecture Pilar Maria Guerrieri, Marco Biraghi, 2023-06-23
 This book seeks to provide an alternative post-Western perspective to the history of contemporary architecture. It puts forward detailed critical analyses of various areas of the world including Europe, Latin America, Africa, China, Australia, India and Japan, where particular movements of architecture have developed as active political acts. The authors focus on a broad spectrum of countries, architectures and architects that have developed a design approach closely linked to the building context. The concept of context is broad and includes various economic, social, cultural, political and natural aspects. In all cases, the

architects selected in this book have chosen to view context as an opportunity However each architect has considered certain specific aspects of context some have been very attentive to the social context others to material aspects or typological issues and still others to aspects related to political visions or economic factors The analysis critically highlights interesting creative and respectful design approaches towards local conditions such as sustainability in Nordic Europe climate conscious design in Africa and the bottom up sensitivity of India The book's main aim is to retrace through both theoretical arguments and case studies the debate that focuses on politics and the environment Thanks to its valuable examples this book strives to make a conscious contribution to establishing a bulwark against the current flattening out processes that architecture is experiencing This book will be of relevance to researchers teachers and students interested in the history of architecture architecture and planning and postcolonial studies Gunnar Asplund, Architect, 1885 - 1940 Gustav Holmdahl, 1981

Contemporary Architects Muriel Emanuel, 2016-01-23 **Modern Architecture and the Mediterranean**

Jean-Francois Lejeune, Michelangelo Sabatino, 2009-12-04 Bringing to light the debt twentieth century modernist architects owe to the vernacular building traditions of the Mediterranean region this book considers architectural practice and discourse from the 1920s to the 1980s The essays here situate Mediterranean modernism in relation to concepts such as regionalism nationalism internationalism critical regionalism and postmodernism an alternative history of the modern architecture and urbanism of a critical period in the twentieth century The Structural Basis of Architecture Bjørn N.

Sandaker, Arne P. Eggen, Mark R. Cruvellier, 2019-03-25 This is a book that shows how to see structures as being integral to architecture It engages a subject that is both about understanding the mechanical aspects of structure as well as being able to relate this to the space form and conceptual design ideas that are inherent to the art of building Analyzing the structural principles behind many of the best known works of architecture from past and present alike this book places the subject within a contemporary context The subject matter is approached in a qualitative and discursive manner illustrated by many photographs and structural behavior diagrams Accessible mathematical equations and worked out examples are also included so as to deepen a fundamental understanding of the topic This new color edition's format has been thoroughly revised and its content updated and expanded throughout It is perfect as either an introductory structures course text or as a designer's sourcebook for inspiration for here two essential questions are addressed in parallel fashion How do structures work and What form do structures take in the context of architecture and why so A rich varied and engaging rationale for structural form in architecture thus emerges **Architects' Journal** , 1987
