Best Gun in the World Robert S. Seigler, 2017-10-31 A thoroughly researched account of weapons innovation and
industrialization in South Carolina during the Civil War and the man who made it happen A year after seceding from the
Union South Carolina and the Confederate States government faced the daunting challenge of equipping soldiers with
weapons ammunition and other military implements during the American Civil War In *The Best Gun in the World* Robert S
Seigler explains how South Carolina created its own armory and then enlisted the help of a weapons technology inventor to
meet the demand Seigler mined state and federal factory records national and state archives and US patents for detailed
information on weapons production the salaries and status of free and enslaved employees and other financial records to
reveal an interesting distinctive story of technological innovation and industrialization in South Carolina George Woodward
Morse originally from New Hampshire was a machinist and firearms innovator who settled in Louisiana in the 1840s He
invented a reliable breechloading firearm in the mid 1850s to replace muzzleloaders that were ubiquitous throughout the
world Essential to the successful operation of any breechloader was its ammunition and Morse perfected the first metallic
center fire pre primed cartridge his most notable contribution to the development of modern firearms The US War
Department tested Morse rifles and cartridges prior to the beginning of the Civil War and contracted with the inventor to
produce the weapons at Harpers Ferry Armory However when the war began Morse a slave holding plantation owner
determined that he could sell more of his guns in the South The South Carolina State Military Works originally designed to
cast cannon produced Morse s carbine and modified muskets brass cartridges cartridge boxes and other military
accoutrements The armory ultimately produced only about 1 350 Morse firearms For the next twenty years Morse sought to
regain his legacy as the inventor of the center fire brass cartridges that are today standard ammunition for military and
sporting firearms Does justice to one of the greatest stories in American firearms history If George Woodward Morse had not
sided with the Confederacy his name might be as famous today as Colt or Winchester Gordon L Jones Atlanta History Center
Excellent and well researched Patrick McCawley South Carolina Department of Archives and History For connoisseurs and
scholars of military history especially Civil War history of technology or Southern South Carolina history this is a must read
and reference volume pertaining to a previously little known aspect of the nineteenth century that had a far reaching impact
in the manner wars would be fought by soldiers decades later Barry L Stiefel College of Charleston **Social Science** David
C. Colander, 2015-08-07 Social Science 15 e approaches social science from a common sense perspective rather than from a
conventional social science angle Readers will see how seemingly diverse disciplines intermingle anthropology and

economics for example In the end students will be able to approach social issues with unbiased problem solving skills

Ghost Guns Mark A. Tallman,2020-08-13 With thorough analysis and balanced reporting *Ghost Guns Hobbyists Hackers and the Homemade Weapons Revolution* is an essential resource for readers seeking to understand the rise of homemade firearms and future options for managing them For more than a century strict gun control was possible because firearms were produced in centralized industrial factories Today the Fourth Industrial Revolution combining old and new technologies threatens to upend this arrangement An increasing number of hobbyists makers technology provocateurs and sophisticated criminals are proving that you don t need a factory to make guns anymore The security challenges of this transformation are increasingly apparent but the technologies behind it hold tremendous potential and while ignoring the security implications would entail risks the costs of new policies also must be evaluated Do it yourself or DIY weapons will bring significant ramifications for First and Second Amendment law international and homeland security crime control technology privacy innovation and the character of open source culture itself How can a liberal society adjust to technologies that make it easier to produce weapons and contraband Informative and thought provoking *Ghost Guns Hobbyists Hackers and the Homemade Weapons Revolution* carefully analyzes the technical legal social political and criminological trends behind this challenging new area of illicit weapons activity *Supreme Court Papers on Appeal from Order* , **Calendar of Confederate**
