Hazardous Waste Laws, Regulations, and Taxes for the U.S. Petroleum Refining Industry David E. Fenster, 1990 This book is intended to fulfil the need for a comprehensive easy to read introductory text on how hazardous waste laws and regulations affect industry regulatory agencies and society for which no current text is suitable It will be of interest to a broad spectrum of people including industry environmental coordinates consultants regulators and anyone seeking and introductory account of this topic The book should be quite suitable as a supplement text in a variety of university coursed including chemical engineering environmental engineering public policy regulatory economics and environmental economics Due to the dynamic nature of environmental regulation some information will be dated in a few years However the basic structure of the environmental programs and the implications of the regulations of the regulations for all concerned will remain largely intact for years to come and will grow an importance *Hazardous waste taxes and regulations* David Eugene Fenster, 1988 The nation s two major pieces of hazardous waste legislation Superfund and the Resource Conservation and Recovery Act RCRA were both amended within the past 3 years The U S petroleum refining industry is being greatly affected by the changes in these laws which have made hazardous waste management the most prominent area of environmental regulation affecting the industry today Refiners pay excise taxes on the crude oil they purchase as a major funding source for the cleanup of the nation s abandoned hazardous waste sites under the Superfund program For the first time refiners must report estimated annual releases of toxic chemicals from their refineries under community right to know provisions Petroleum refining operations are heavily regulated by RCRA because they generate hazardous wastes and often treat store or dispose of wastes on site Refiners are changing their hazardous waste management and disposal activities in response to several land disposal bans which cover a number of hazardous refinery wastes Evidence suggests that the Superfund tax on crude oil was successfully passed through to the customer While refinery margins remain slim the costs of RCRA projects are also expected to be passed through with little customer response Although refiners argue that Superfund taxes and expenditures to comply with RCRA regulations will reduce domestic refining s competitive position it is unlikely that these and other environmental expenditures will ever concern refiners as does the stability of oil markets Petroleum refining has been a relatively small contributor to the national hazardous waste problem Yet it is unlikely that refiners would have undertaken projects to improve their hazardous waste management activities in the absence of legislation The Superfund and RCRA programs still have substantial technical and administrative problems The Superfund program is beleaguered by the immensity of the national clean up task and the RCRA program by the huge number of hazardous waste generators and types of hazardous wastes produced Many proposals abound for the reform of national hazardous waste policy The proposal with the most industry and congressional support would create a federal hazardous waste fee system to finance an expanded Superfund and better integrate the goals and implementation of Superfund and RCRA *Restoration*
