David R. Boyd, 17-09-05 An important and timely recipe for hope for humans and all forms of life *Palila v Hawaii* New Zealand's Te Urewera Act *Sierra Club v Disney* These legal phrases hardly sound like the makings of a revolution but beyond the headlines portending environmental catastrophes a movement of immense import has been building in courtrooms legislatures and communities across the globe Cultures and laws are transforming to provide a powerful new approach to protecting the planet and the species with whom we share it Lawyers from California to New York are fighting to gain legal rights for chimpanzees and killer whales and lawmakers are ending the era of keeping these intelligent animals in captivity In Hawaii and India judges have recognized that endangered species from birds to lions have the legal right to exist Around the world more and more laws are being passed recognizing that ecosystems rivers forests mountains and more have legally enforceable rights And if nature has rights then humans have responsibilities In *The Rights of Nature* noted environmental lawyer David Boyd tells this remarkable story which is at its heart one of humans as a species finally growing up Read this book and your world view will be altered forever [The Game of Conservation](#) Mark Cioc, 2009-11-15 *The Game of Conservation* is a brilliantly crafted and highly readable examination of nature protection around the world Twentieth century nature conservation treaties often originated as attempts to regulate the pace of killing rather than as attempts to protect animal habitat Some were prompted by major breakthroughs in firearm techniques such as the invention of the elephant gun and grenade harpoons but agricultural development was at least as important as hunting regulations in determining the fate of migratory species The treaties had many defects yet they also served the goal of conservation to good effect often saving key species from complete extermination and sometimes keeping the population numbers at viable levels It is because of these treaties that Africa is dotted with large national parks that North America has an extensive network of bird refuges and that there are any whales left in the oceans All of these treaties are still in effect today and all continue to influence nature protection efforts around the globe Drawing on a wide variety of primary and secondary sources Mark Cioc shows that a handful of treaties all designed to protect the world's most commercially important migratory species have largely shaped the contours of global nature conservation over the past century The scope of the book ranges from the African savannahs and the skies of North America to the frigid waters of the Antarctic *The World of Whales, Dolphins & Porpoises* Tony Martin, 2003 This easy to read introduction contains information on 85 species **Sport Diver**, 1995-11
