Frick, G.-A. von Harnack, K. Kochsiek, G. A. Martini, A. Prader, 2012-12-06 **Applied Topics in Health Psychology** Marie Louise Caltabiano, Lina Ricciardelli, 2012-08-14 This selection of in depth critical and comprehensive chapters on topical issues in applied health psychology features the work of key researchers and practitioners in the Australasian health system and deals with both theoretical and methodological aspects of the subject The first health psychology text aimed specifically at regional postgraduate trainees Covers an array of topics and issues and focuses on applied aspects of clinical health and health promotion Includes both specialized topics and new frontiers of research Contextualizes health psychology teaching and learning for Australasian students *Chemical Intolerance* Robert W. Gardner, 2024-12-06 Chemical Intolerance identifies phenolic aromatic chemical compounds present in natural foodstuffs pollens certain food additives tobacco smoke perfumes air pollution etc as nonimmunologic but pharmacologic activators of allergic reactions in chemically intolerant individuals Biochemical pathway sequences with supporting scientific literature are outlined to elucidate the mechanisms associated with formation of inflammatory mediators prostaglandins thromboxanes and leukotrienes upon activation by phenolic compounds and other chemical stimulants The role of these inflammatory agents in respiratory gastrointestinal neurological cardiovascular and other disorders is discussed Treatment modalities using precise dosages of selected phenolic compounds are outlined to provide clinicians with an effective means of therapy The author also shares his own experience and personal findings based on 20 years of research including his recommendations for therapy **Diagnosis and Treatment in Internal Medicine** Patrick Davey, David Sprigings, 2018-09-06 Diagnosis and Treatment in Internal Medicine equips trainee doctors with the essential skills and core knowledge to establish a diagnosis reliably and quickly before outlining the management of the clinical condition diagnosed Organised into three sections the first provides a vital overview whilst the second focuses on common presentations and diagnoses Uniquely this new book shows readers how to turn symptoms into a list of diagnoses ordered by probability a differential diagnosis Experienced consultants who teach trainees every day demonstrate how to derive an ordered differential diagnosis how to narrow this down to a single diagnosis and if not how to live with diagnostic uncertainty The final section provides a comprehensive account of the management of system

based syndromes and diseases Highly structured chapters emphasize how common conditions present how to approach a diagnosis and how to estimate prognosis treatment and its effectiveness An onus is placed on the development of crucial diagnostic skills and the ability to devise evidence based management plans quickly and accurately making this an ideal text for core medical trainees *Updating in Headache* Volker Pfaffenrath, Per-Olov Lundberg, Ottar Sjaastad, 2012-12-06 In September 1983 the First International Headache Congress took place the founding congress of the International Headache Society IHS This meeting was attended by around 200 headache specialists from some 20 countries One of the principal goals of the IHS which was formed in London in 1982 is to promote and stimulate interest and research in the headache field In addition to the sponsorship of continued education events this also involves the coordination of scientific projects and the organization of future conferences There is no doubt that headaches represent an everyday problem in medical practice When the first headache clinics were established some years ago they were regarded as very progressive Today there are special outpatient centers and clinics for headache patients However this specialization has certainly not progressed very far The fact is that differential diagnosis and treatment of recurrent and chronic headaches represents a broad field that cuts across many disciplines Headaches are thus relevant not only to the neurologist but also to the psychiatrist the neurosurgeon the internist the endocrinologist the psychologist the pharmacologist and the biochemist Despite intensive research in numerous and very disparate medical disciplines there are still no generally accepted pathophysiologic concepts for many headache syndromes Realizing the importance of a multidisciplinary forum the IHS assumed the organization of this congress in collaboration with the German Migraine Society *Cluster Headache* Ninan T. Mathew, 2012-12-06 This book constitutes a compilation and integration of the latest advances in the management of cluster headaches It encompasses the work of nine experts in the field of headache in the U S and presents a thorough and comprehensive view of the subject Most of the participants at the symposium have spent years studying cluster headache and its variants They present a variety of conceptions in a comprehensive manner It is believed that the generalist neurologist or other medical specialist involved in the treatment of this difficult syndrome will derive diagnostic and therapeutic insight into its management The patients seeking help and understanding of their condition will be the ultimate beneficiaries of its information SEYMOUR DIAMOND M D March 1984 Preface The past decade has witnessed a surge of interest in the field of headache and related disorders Even though the pathophysiology and pathogenesis of primary headache disorders are still poorly understood recent clinical and therapeutic observations have greatly contributed to improvement of patient care in the headache field Headache clinics specializing in the diagnosis and comprehensive management of headaches now available in most major cities have also helped in the progress of patient care and research *Contemporary Neurology* M.J.G. Harrison, 2013-10-22 Contemporary Neurology compiles a large series of papers on the commonest neurological problems This book discusses the management of epilepsy involuntary movements nerve and muscle diseases and multiple sclerosis The areas on infections cerebrovascular

disease trauma intracranial pressure and vertebral column are also elaborated This text likewise describes medical procedures on how to do a lumbar and cisternal puncture Other topics include headache in children hyperventilation dizziness funny turns neurological dysarthria facial pain and nystagmus The weakness of the legs loss of memory coma brain death complications of alcoholism and stupor and akinetic mutism are also covered This publication is valuable to clinicians and examination candidates preparing for the DPM MRCP UK and Neurology Psychiatry Boards
