Headcleaner Text Fur Einsturzende Neubauten Text For Collapsing New Buildings:

Einstürzende Neubauten's Kollaps Melle Jan Kromhout, Jan Nieuwenhuis, 2024-08-22 Perhaps the best musical encapsulation of the Cold War as experienced in the walled city of West Berlin Kollaps is a product of its time while remaining as vital exhilarating and surprising as the day it was released The book explores the contexts themes and influences that shaped Kollaps It describes the early days of Einstürzende Neubauten in West Berlin their infamous live performances and guerilla style recording tactics and the scrap metal banging piercing guitar noise and evocative lyricism that went on to inspire generations of fans Most significantly it explores the desire and deep sense of belonging that is expressed by what Nick Cave called the incredibly mournful haunting nature of this music The beginning of a 40 year career this first burst of energy remains their purest statement Musical Revolutions in German Culture M. Hall, 2014-10-23 Drawing upon the philosophical insights of Friedrich Schlegel Walter Benjamin Theodor W Adorno and Blixa Bargeld this book explores the persistence of a critical deconstructive approach to musical production consumption and reception in the German cultural sphere of the last two centuries *Blixa Bargeld and Einstürzende Neubauten* Jennifer Shryane, 2011 Jennifer Shryane provides a much needed analysis of Einstürzende Neubauten's important place in popular experimental music history She illustrates their innovations with found and self constructed instrumentation their Artaudian performance strategies and textual concerns as well as their methods of independence The group have also made a consistent and unique contribution to the development of the independent German Language Contemporary Music scene which although often acknowledged as influential is still rarely examined *The Logic of Filtering* Melle Jan Kromhout, 2021 The Logic of Filtering traces the profound impact of technical media on the sound of music asking how do media technologies shape sound How does this affect music And how did it change what we listen for in music Since the invention of sound recording in the second half of the nineteenth century media that transmit record store and reproduce physical sound inspired dreams of perfect reproduction but were also confronted with the inevitable introduction of noise Based on a wide range of historical technical and theoretical sources author Melle Jan Kromhout explores this one hundred and forty year history of sound media and shows why noise should not be understood as unwanted by effect but instead plays a foundational role in shaping the sonic contours of recorded music The Logic of Filtering develops an extensive media archaeological analysis of the noise of sound media encompassing all the disturbances distortions and interferences that these media add to the sounds they reproduce It thereby stands to enrich our understanding of the way in which sound media changed and continue to change the sonorous qualities of music and offers new perspectives on the interaction between music media and listeners Heiner Müller, 2021-10-18 **Bibliographic Guide to Music** Gale Group, 2001-07 Didaskalia, 2001
