John Van Maanen's *Tales of the Field* has been a definitive reference and guide for students, scholars, and practitioners of ethnography and beyond. Originally published in 1988, it was one of the first works to detail and critically analyze the various styles and narrative conventions associated with written representations of culture. This is a book about the deskwork of fieldwork and the various ways culture is put forth in print. The core of the work is an extended discussion and illustration of three forms or genres of cultural representation: realist tales, confessional tales, and impressionist tales. The novel issues raised in *Tales* concern authorial voice, style, truth, objectivity, and point of view. Over the years, the work has both reflected and shaped changes in the field of ethnography. In this second edition, Van Maanen's substantial new Epilogue charts and illuminates changes in the field since the book's first publication. Refreshingly humorous and accessible, *Tales of the Field* remains an invaluable introduction to novices learning the trade of fieldwork and a cornerstone of reference for veteran ethnographers.

Reading Marx Writing Thomas M. Kemple, 1995. Employing the insights of recent cultural critics, *Reading Marx Writing* uses the eight notebooks the Grundrisse Marx worked on in 1857-58 to examine his literary, political, and scientific imagination and the fictional writers he admired. By exploring the Grundrisse, the project or plan that Marx did not carry through, the author speculates on the limits and possibilities of Marx's interpretive approach for addressing current issues in philosophy and hermeneutics, critical sociology and political economy, and aesthetics and literary criticism. The study employs certain literary works, notably a scene from Goethe's *Faust* and several stories from Balzac's *Comédie humaine*, as looking glasses or sounding boards for Marx's political and scientific concerns and to connect themes emerging from the cultural economy of the nineteenth century. These literary works are treated less as dramatic illustrations of Marx's life or depictions of his scientific insights than as interpretive frameworks or social fictions which give shape to both Marx's text and the writings of others working in his wake. Through an innovative blend of German critical theory (Lukács, Marcuse, and Habermas), French post-structuralism (Althusser, Lyotard, and Baudrillard), and Anglo-American cultural criticism (Jameson, Mitchell, and O'Neill), the author develops a unique method for articulating the play of image, text, and even music within Marx's human scientific discourse.
