**River of Fire, River of Water** Taitetsu Unno, 2010-01-13 With great spiritual insight and unparalleled scholarship Dr Taitetsu Unno the foremost authority in the United States on Shin or Pure Land Buddhism introduces us to the most popular form of Buddhism in Japan Unique among the various practices of Buddhism this new form of spiritual practice is certain to enrich the growing practice of Buddhism in the United States which is already quite familiar with Zen and Tibetan traditions River of Fire River of Water is an introduction to the practice of Pure Land Buddhism for readers with or without prior experience with it The Pure Land tradition dates back to the sixth century c e when Buddhism was first introduced in Japan Unlike Zen its counterpart which flourished in remote monasteries the Pure Land tradition was the form of Buddhism practiced by common people Consequently its practice is harmonious with the workings of daily life making it easily adaptable for seekers today Despite the difference in method though the goal of Pure Land is the same as other schools the awakening of the true self Certain to take its place alongside great works such as Three Pillars of Zen The Miracle of Mindfulness and Zen Mind Beginner's Mind River of Fire River of Water is an important step forward for American Buddhism

A Call to Be Whole Barbara J. Sowada, 2003-07-30 Examines the complex interrelationships that inform the health care system Health care like all social systems is a product of thought Up to now our collective thinking has been based on trying to manage parts not the whole This book inquires into four age

old questions that shape all health care systems What is health What is care Who is responsible How much is enough Americans have the wealthiest health care system in the world yet the health status of Americans ranks in the lowest quartile among the world's 25 industrialized nations and 45 million Americans are without health insurance Today's cost quality and access problems are interrelated and can be traced to taken for granted assumptions and health care's outmoded organizing concepts reductionism and materialism Greater fragmentation of care an over dependence on technology inattention to social and environmental determinants of health and serious economic and moral dilemmas are some of the results of the last 40 years of piecemeal political and economic reform This book has three purposes The first is to help the reader see healthcare as a complex system a part in a larger whole and to show how answers to the questions What is health What is care Who is responsible How much is enough implicitly define the purpose effectiveness efficiency and fairness of a health care system The second is to show that today's access cost and quality problems are interrelated and arise from outmoded concepts unquestioned assumptions and a long trail of inconsistent and contradictory answers to the four questions The third purpose is to acquaint readers with both the personal and societal challenges of finding coherent answers to the four questions raised above and to describe some of the budding experimental solutions that challenge traditional conventions and assumptions
