Metaphysics and Gender: The Normative Art of Nature and Its Human Imitations Michele Schumacher, 2023-03-07 The emergent science of transgenderism and related philosophies of gender propose a full scale inversion of the understanding of God man and the created order articulated in classical metaphysics undermining and parodying both the causality and ontology voiced by Genesis 1 27 God created man in His own image male and female He created them Whether through subversive performative identity or by surgical sex change the divinely made human person is now threatened with abolition and replacement by the self made man and the man made woman In *Metaphysics and Gender* Michele M Schumacher offers a corrective to this distorted and distorting outlook calling for the recovery of an anthropological vision rooted in recognition of the normative divine art of nature and of the likeness and far greater unlikeness between divine and human causality Surveying contemporary transgender trends Schumacher identifies and excavates their conceptual and ideological foundations in the gender theory of Judith Butler the existentialist feminism of Simone de Beauvoir and the atheistic existentialism of Jean Paul Sartre To the erroneous philosophical presuppositions of these thinkers Schumacher contrasts the metaphysically grounded thought of Aristotle and Thomas Aquinas advancing their positive account of the good of creation

and of the meaning of ethical norms human freedom and natural inclinations and embodiment and mounting a timely and trenchant defense of the divinely created human person

Nature's Man Maurizio Valsania, 2013-03-21 Although scholars have adequately covered Thomas Jefferson's general ideas about human nature and race this is the first book to examine what Maurizio Valsania terms Jefferson's philosophical anthropology philosophical in the sense that he concerned himself not with describing how humans are culturally or otherwise but with the kind of human being Jefferson thought he was wanted to become and wished for citizens to be for the future of the United States Valsania's exploration of this philosophical anthropology touches on Jefferson's concepts of nationalism slavery gender roles modernity affiliation and community More than that *Nature's Man* shows how Jefferson could advocate equality and yet control and own other human beings A humanist who asserted the right of all people to personal fulfillment Jefferson nevertheless had a complex philosophy that also acknowledged the dynamism of nature and the limits of human imagination Despite Jefferson's famous advocacy of apparently individualistic rights to life liberty and the pursuit of happiness Valsania argues that both Jefferson's yearning for the human individual to become something good and his fear that this hypothetical being would turn into something bad were rooted in a specific form of communitarianism Absorbing and responding to certain moral philosophical currents in Europe Jefferson's nature infused vision underscored the connection between the individual and the community
