Heggenhougen, Stella R. Quah**

Health Care Policy And Politics Lessons From Four Countries:

Health Care Policy and Politics Robert B. Helms,1993 In examining the health care delivery systems of four nations Canada Germany the Netherlands and the United Kingdom this work seeks to address several weaknesses and concerns that should be considered before reformers redesign the US system based on a foreign model **The Political Economy of**

Health Care Development and Reforms in Hong Kong Victor C.W. Wong,2019-05-23 First published in 1999 this book constitutes a unique account of the development and reform of health care in Hong Kong Its main focus is on policy developments since 1945 Victor Wong demonstrates the development of a two tier health system in both a capitalist and Chinese context His work is one of both health policy and political economy Wong utilises the latter perspective to show the state s role in the interests of capital the public demand for health care and the power of the medical profession Alongside this Wong brings in the role of Chinese and family medicine and the role of the family in cost containment and minimising the hospitalisation of elderly frail and chronically ill patients The volume is the most comprehensive analysis available for health policy in Hong Kong **Lessons from Europe?** R. Daniel Kelemen,2014-02-05 What can American policymakers learn from the experiences of European democracies While we can look to our own history and to the ideas emanating from our own

public sphere by looking abroad we can also learn lessons from European policies from both those that have proven successful and those that have failed The contributors in this volume examine the ways our European allies have dealt with issues such as rising healthcare and pension costs large scale immigration childcare and work life balance and climate change and ask whether such policies might prove effective in the U S context Brief and engaging R Daniel Kelemen s Lessons from Europe What Americans Can Learn from European Public Policies is an ideal supplement for comparative public policy courses and would add a provocative comparative component to U S public policy courses **Health Policy Reform**

Reform Robert B. Helms,1993 Twelve contributors focus on the two health reform proposals that have taken center stage managed competition and global budgeting **Medicare in the Twenty-first Century** Robert B. Helms,1999 These leading health economics experts make various recommendations for saving the popular Medicare program and grapple with finding a solution that is realistic fair and efficient *Politics, Health, and Health Care* Theodore R. Marmor,Rudolf Klein,2012-07-24 Two towering figures in the field of health care policy analysis Theodore R Marmor and Rudolf Klein reflect on a lifetime of thought in this wide ranging collection of essays published in the wake of President Obama s health care reform Presented as a kind of dialogue between the two the book offers their recent writings on the future of Medicare universal health insurance conflicts of interest among physicians regulators and patients and many other topics

Empowering Health Care Consumers Through Tax Reform Grace-Marie Arnett,1999 Because of our tax system most Americans have the wrong kind of insurance and some Americans cannot afford any insurance This book shows how tax reform can lead to more appropriate and more affordable health insurance It is worth careful reading by our policy makers

and by anyone concerned with health care in America Prof Martin Feldstein **Health Care Policy In East Asia: A World Scientific Reference (In 4 Volumes)** ,2019-11-25 During the past three decades health care systems in the East Asian regions of China Japan South Korea and Taiwan have undergone major changes Each system has its unique achievements and challenges Global health care policymakers are increasingly interested in understanding the changes that have taken place in these four systems This four volume reference set is designed to help health care professionals academics policymakers and general readers gain a good grasp of the background and latest developments in the health care systems of China Japan South Korea and Taiwan This reference set provides an in depth comparative health policy analysis and discussion of health care reform strategies in each of these systems One unique feature of this set is that each volume has been edited by a leading scholar who has been deeply involved in the development of the health care system in that particular region Each of these editors also has invited both scholars and practitioners to provide a first hand description and analysis of key health care reform issues in that system The many examples provided in each volume demonstrate how findings of evidence based policy research can be implemented into policy practice Volume 1 describes and discusses China s ambitious and complex journey of health care reform since 2009 The Chinese government has achieved universal health insurance coverage and has embarked on reforms of the service delivery system and provider payment methods that are aimed at controlling health expenditure growth and improving efficiency This volume includes pilot and social experiments initiated by the government and researchers and their evaluations that have guided the formulation of health reform policies It provides information on how to make reforms work at the local and provincial levels The findings detailed in this volume will contribute to a global knowledge base in health care reforms Volume 2 provides a comprehensive review and evaluation of the Japanese health care system Japan has a long history of health care system development and provision of universal health coverage with a mature and well developed health care system among East Asian countries However due to increases in health care costs economic stagnation and the country s rapidly aging population Japan has undergone significant health care reform during the last two decades both in the delivery as well as financing of health services in its hospital sector medical technology sector and long term care insurance Despite these challenges and reforms health outcomes among the Japanese population have been progressively among the best in the world This volume shows how policy research can lead to policy analysis implementation and assessment It also provides valuable lessons learnt for mutual learning among other health care systems Volume 3 offers a comprehensive review of the developments in South Korea s national health insurance system since 1989 in terms of financing delivery systems and outcomes The volume analyzes the efficiency of cost and service delivery by public sectors versus private sectors It points out areas of challenge to future Korean health care reform Chapter authors in this volume are leading experts involved in Korean health care policy implementation Volume 4 reviews the development and achievements of Taiwan Health Insurance since 1995 Because of its continuous reform in payment

services delivery and pharmaceutical technology Taiwan has been considered a model example of universal health insurance among global health systems This volume shows the processes used to translate policy research findings into policy changes While the health care reform in Taiwan is ongoing the Taiwan example provides a real world and practical understanding of health care system changes In summary this four volume set makes an outstanding contribution to health care system reform and policy research based on solid scholarly work It also introduces policy researchers and academic communities to current debates about health systems health financing and universal health coverage This reference volume is a must for anyone keen on East Asia s health care system reform dynamics and changing scene Unhealthy Alliances Henry N. Butler,1994 This text calls the Health Security Act a nightmare for consumers and taxpayers It forecasts the effectiveness of regional health alliances and analyses the political forces at play Dark Side Of Healthcare, The: Issues, Cases, And Lessons For The Future Brian Edwards,2021-05-28 The Dark Side of Healthcare draws uncomfortable lessons from over 300 case studies of events that occurred in the healthcare sector Health services have many skilled and dedicated professionals but there is a dark side that cannot be ignored The unthinkable has happened and might have been prevented The case studies from many countries include serial killers with a health background drugs and medical devices that proved to be dangerous negligent and poor clinical practices as well as incompetent and weak management that led to failing hospitals and harm to patients There are also corruption cases accidents at work and cases involving the sexual exploitation of children Politicians early responses to COVID 19 and the subsequent missteps are also scrutinised Many of the errors and omissions that led to patient harm have been repeated This book is not an attack on health services or health professionals Instead it is a search for ways of making health delivery safer for patients and staff who deliver care often in challenging circumstances Its focus is learning rather than blame *Comparative Studies and the Politics of Modern Medical Care* Theodore R. Marmor,Richard Freeman,Kieke G. H. Okma,2009-01-01 This text offers an account of health reform struggles in developed democracies It explores the ambitions and realities of health care regulation financing and delivery across countries **Fads, Fallacies And Foolishness In Medical Care Management And Policy** Theodore R Marmor,2007-03-28 No one misses the onslaught of claims about reforming modern medical care How doctors should be paid how hospitals should be paid or governed how much patients should pay when sick in co payments how the quality of care could be improved and how governments and other buyers could better control the costs of care all find expression in the explosion of medical care conference proceedings op eds news bulletins journal articles and books This collection of articles takes up a key set of what the author regards as particularly misleading fads and fashions developments that produce a startling degree of foolishness in contemporary discussions of how to organize deliver finance pay for and regulate medical care services in modern industrial democracies The policy fads addressed include the celebration of explicit rationing as a major cost control instrument the belief in a basic package of health insurance benefits to constrain costs the faith that contemporary cross national research

can deliver a large number of transferable models and the notion that broadening the definition of what is meant by health will constitute some sort of useful advance in practice

Global Budgets Versus Competitive Cost-control Strategies Patricia Munch Danzon,1994 This book discusses how global budgets relate to competitive cost control strategies

Health Systems Policy, Finance, and Organization Guy Carrin,Kent Buse,Kristian Heggenhougen,Stella R. Quah,2010-05-22 This volume is unique in its systematic approach to these three pillars of health systems analysis will give readers of various backgrounds authoritative material about subjects adjacent to their own specialties Assembling such comparative materials is usually an onerous task because so many programs possess their own vocabularies goals and methods This book will provide common grounds for people in programs as diverse as economics and finance allied health business and management and the social sciences including psychology Gives readers of various backgrounds authoritative material about subjects adjacent to their own specialties Provides common grounds for people in programs as diverse as economics and finance allied health business and management and the social sciences including psychology

Handbook Of Health Research Methods: Investigation, Measurement And Analysis Bowling, Ann,Ebrahim, Shah,2005-06-01 Handbook of Health Research Methods is an essential tool for researchers and postgraduate students taking masters courses or undertaking doctoral programmes in health services evaluation health sciences health management public health nursing sociology socio biology medicine and epidemiology However the book also appeals to health professionals who wish to broaden their knowledge of research methods in order to make effective policy and practice decisions

Health Manpower in Four Countries Ruth Roemer,Milton Irwin Roemer,1975

Six Countries, Six Reform Models: The Healthcare Reform Experience Of Israel, The Netherlands, New Zealand, Singapore, Switzerland And Taiwan - Healthcare Reforms "Under The Radar Screen" Kieke G Okma,Iva Bolgiani,Tim Tenbensel,Toni Ashton,Hans Maarse,Meng-kin Lim,Luca Crivelli,David Chinitz,Tsung-mei Cheng,Rachel Meislin,2009-12-23 This book presents the healthcare reform experiences of six small to mid sized but dynamic economies spanning the Asia Pacific the Middle East and Europe Usually not given serious consideration in major international comparisons because of their small size each in fact provides a fascinating case study that illuminates the understanding of the dynamics of healthcare reform Although dissimilar in historical and cultural backgrounds they share some important features all faced very similar pressures for change in the 1970s and 1980s all considered a very similar range of policy options and all did not only discuss but actually implemented fundamental changes in their healthcare funding organization contracting and governance structures with strikingly different outcomes All of the authors have lived and worked in one or more of the countries studied in this volume The analytic frameworks they use reflect their broad range of professional and disciplinary backgrounds in health economics and political science Beyond mere descriptions of reform processes and superficial analyses based on aggregate data from the usual OECD or WHO sources they seek to understand and explain the variations in country experiences by examining the politico socio economic factors driving health reform as

seen through the respective country lenses In coming together in this unique international collaboration they make an important contribution to the growing field of international comparative health policy studies Contributors Tsung Mei Cheng Princeton University USA David Chinitz The Hebrew University of Jerusalem Israel Luca Crivelli and Iva Bolgiani University of Lugano Switzerland Meng Kin Lim National University of Singapore Singapore Kieke G H Okma and Hans Maarse Maastricht University The Netherlands Toni Ashton and Tim Tenbensen University of Auckland New Zealand Markets and Health Care Wendy Ranade,2018-10-08 A growing reliance on market disciplines and incentives characterised health care reform strategies in many countries in the 1990s yet the country which relies most heavily on private health care the U S A is the most expensive in the world and still fails to deliver affordable health care to millions of its citizens This apparent paradox is the starting point for Markets and Health Care A Comparative Analysis AEI Annual Report American Enterprise Institute for Public Policy Research,1996 **Journal of the Medical Association of Thailand** ,2008-06 The journal of Medical Association of Thailand publishes original and review articles including case report that relate to the study or research on diseases epidemiology drug or vaccine that have the influence on clinical course treatment and prevention of human illness
