Edge Of Now New Questions For Democracy In The Network Age:

African Postcolonial Modernity S. Osha, 2014-09-04 African cultures and politics remain significantly affected by precolonial and postcolonial configurations of modernity as well as hegemonic global systems This project explores Africa's conversation with itself and the rest of the world critiquing universalist notions of democratization The Anglosphere Challenge James C. Bennett, 2007-04-03 Despite repeated predictions of the demise of America and the English speaking nations as the world's predominant culture James C Bennett believes that this gap will widen in the coming decades Coining the term anglosphere to describe a loose coalition based on a common language and heritage Bennett believes that traits common to these countries a particularly strong and independent civil society openness and receptivity to the world its people and ideas and a dynamic economy have uniquely positioned them to prosper in a time of dramatic technological and scientific change In a wide ranging exploration back to the Industrial Revolution and into the future The Anglosphere

Challenge gives voice to a growing movement on both sides of the Atlantic **The Politics of Method in the Human Sciences** George Steinmetz, 2005-05-16 Collection of new essays on the past present and future of positivism in the various social sciences **Essays on: The Nature and State of Modern Economics** Tony Lawson, 2015-04-17 What do modern academic economists do What currently is mainstream economics What is neoclassical economics And how about heterodox economics How do the central concerns of modern economists whatever their associations or allegiances relate to those traditionally taken up in the discipline And how did economics arrive at its current state These and various cognate questions and concerns are systematically pursued in this new book by Tony Lawson The result is a collection of previously published and new papers distinguished in providing the only comprehensive and coherent account of these issues currently available The financial crisis has not only revealed weaknesses of the capitalist economy but also highlighted just how limited and impoverished is modern academic economics Despite the failings of the latter being more widely acknowledged now than ever there is still an enormous amount of confusion about their source and true nature In this collection Tony Lawson also identifies the causes of the discipline's failings and outlines a transformative solution to its deficiencies Amongst other things Lawson advocates for the adoption of a more historical and philosophical orientation to the study of economics one that deemphasizes the current focus on mathematical modelling while maintaining a high level of analytical rigour In so doing Lawson argues for a return to long term systematic and sustained projects in the manner pursued by the likes of Marx Veblen Hayek and Keynes concerned first and foremost with advancing our understanding of social reality Overall this forceful and persuasive collection represents a major intervention in the on going debates about the nature state and future direction of economics *Ken Saro-Wiwa's Shadow (Expanded Edition)* Sanya Osha, 2020-12-21 The Ogoni crisis which reached its peak in Nigeria in the 1990s divided all the major stakeholders namely the Nigerian state the multinational petroleum concerns the Ogoni community and the rest of the Nigerian populace in the conflict There were also undoubtedly

other important ramifications within the Ogoni community such as divisions along the lines of those who were pro government and those who upheld an opposing stance These divisions run deep and define the more subtle contours of the conflict amongst the Ogoni people who were once led by their indomitable leader Ken Saro Wiwa until he was hanged by the General Sani Abacha regime in 1995 Ken Saro Wiwa's struggle exemplified certain core values and tenets including democracy minority rights environmental awareness non violence and respect for human dignity However as he lived and worked in an antithetical political context governed by venality despotism and philistinism he was brutally cut down This study provides an in depth analysis of the Ogoni crisis and its unfolding aftermath Out of the Energy Labyrinth David Howell, Carole Nakhle, 2007-05-25 The planet is under threat And that threat comes from energy So goes the standard argument But according to David Howell and Carole Nakhle this reasoning is wrong In their provocative and original book the authors argue that energy can become a tool for environmental protection that energy and environment are not by definition in conflict with each other and that by pooling energy production and environmental protection ideas energy can be part of a solution rather than the problem This book is firmly grounded in reality given the demands of China India and other developing economies and makes specific proposals a radical rethinking on energy investment strategies massive incentives to develop alternative fuel technologies a ground breaking public awareness strategy to redirect consumers and policy makers to embrace fundamental though essentially painless change in consumption patterns The solutions that Howell and Nakhle offer are unapologetically short term This is because the energy challenges immediately ahead if not handled right could undermine all longer term attempts to limit climate change Their important and novel approach makes this book essential reading for an understanding of today's bewildering environmental debates IBSS Compiled by the British Library of Political and Economic Science, 2001 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences **The Official History of Privatisation Vol. I** David Parker, 2009 **World Crisis** Robert Harvey, 2008-09-17 Five years after the invasion of Iraq the world is a more dangerous place than before In *The World Crisis* 20 prominent political thinkers from the US and UK give their take on the crisis offering new and alternative Ideas on how to extricate ourselves from the turmoil and lay the foundations for a better future Each of these distinguished contributors brings a lifetime's experience to bear on essential issues of contemporary politics encompassing the relationship between East and West global warming nuclear power the limits of national security and the role for both America and Britain in the twenty first century What they have to say will be of concern and value to all who take an interest in our future safety and prosperity **BOOK JACKET Social Ontology and Modern Economics** Stephen Pratten, 2014-09-25 Economists increasingly recognise that engagement with social ontology the study of the basic subject matter and constitution of social reality can facilitate more relevant analysis This growing recognition amongst economists of the importance of social

ontology is due very considerably to the work of members of the Cambridge Social Ontology Group This volume brings together important papers by members of this group some previously unpublished in a collection that reveals the breadth and vitality of this Cambridge project It provides a brilliant introduction to the central themes explored perspectives sustained insights achieved and how the project is moving forward An initial set of papers examine how ontology is understood and justified within this Cambridge project and consider how it compares with prominent historical and contemporary alternatives The majority of the included papers involve social ontological analysis being put to work directly in underlabouring for specific types of development in economics The papers are grouped according to their contribution to clarifying and developing i various competing traditions and projects of modern economics ii history of thought contributions iii methodological concerns iv ethics and v conceptions of particular aspects of social reality including money gender technology and institutions Background to and a brief history of the Cambridge group is provided in the Introduction Social Ontology and Modern Economics will be of interest not only to economists but also philosophers of social science social theorists and those eager to explore the nature of gender social institutions and technology **Perspectives on Thought**

Leadership for Africa's Renewal Kondlo, Kwandiwe, 2014-05-05 This book outlines perspectives of emerging and established African scholars on what one could describe as the debate on leadership and the articulation of the life of the mind in Africa's socio economic political and cultural life from the time of independence to date The papers contained in the book cover the following thematic areas Alternative Leadership Paradigm for Africa's Advancement African Perspectives on Globalisation and international relations Pan Africanism and the African Renaissance Scientific Technological and Cultural Dimensions of African Development The first section deals with alternative leadership paradigms for Africa's advancement It also debates the thin line separating management studies from leadership studies and untangles the hermeneutic complexities in the term leadership Section two examines among other things the crucial challenge of globalisation and public ethics and others African perspectives The section also interrogates the current complexities and credibility deficits in the global governance of trade and towards the end engages philosophical questions about conscience and consciousness in African development and progress The debates in section three continue to section four and focus on the overall issues of language and liberation the significance of Multi Inter and Trans Disciplinary Approaches in the analysis of the African continent appropriate indigenous paradigms for promoting the African renaissance as well as a series of debates on the meaning and prospects of regional integration in Africa's renewal This provides just a snapshot of a very wide ranging and interesting debate contained in the publication **Reorienting Economics** Tony Lawson, 2003 Contemporary economics is characterized by a mismatch between its methods of analysis and the nature of the world it seeks to interpret Despite regular economic crises and ongoing critique of the discipline the drift from political economy into applied mathematics appears to continue unabated In this book Tony Lawson advocates a realignment of economics with social reality In analyzing

mainstream economists misplaced universality the author places ontology at the heart of a reoriented future in which economics is integrated within the wider human and social sciences The British Conservative Party and One Nation Politics David Seawright,2011-12-22 Won the 2011 Prize for best publication on Conservatives and Conservatism awarded by the specialist group Conservatives and Conservatism of the UK Political Studies Association *Sociological Research* ,2007
 Crossbow ,1999 **New Statesman** ,2000 **Globalization** Robert Goehlert,2003 Bibliographie Internationale de Science Politique ,2000 Corporate Governance and Corporate Law Reform in Malaysia Fatt Hee Tie,2003 The British National Bibliography Arthur James Wells,2000
