part of the ongoing drama. Such is the state of superhero comics and movies, a genre that has become one of our leading mythologies conveying influential messages about gender, sexuality, and relationships. Love, Sex, Gender, and Superheroes examines a full range of superhero media from comics to films to television to merchandising. With a keen eye for the genre's complex and internally contradictory mythology, comics scholar Jeffrey A. Brown considers its mixed messages. Superhero comics may reinforce sex roles with their litany of phallic musclemen and slinky femme fatales, but they also blur gender binaries with their emphasis on transformation and body swaps. Similarly, while most heroes have heterosexual love interests, the genre prioritizes homosocial bonding and it both celebrates and condemns gendered and sexualized violence. With examples spanning from the Golden Ages of DC and Marvel comics up to recent works like the TV series *The Boys*, this study provides a comprehensive look at how superhero media shapes our perceptions of love, sex, and gender.

Artificial Generation Christina Parker-Flynn, 2021-11-19 Artificial

Generation Photogenic French Literature and the Prehistory of Cinematic Modernity investigates the intersection of film theory and nineteenth century literature arguing that the depth of amalgamation that occurred within literary representation during this era aims to replicate an illusion of life and its sensations in ways directly related to broader transitions into our modern cinematic age A key part of this evolution in representation relies on the continual re emergence of the artificial woman as longstanding expression of masculine artistic subjectivity which by the later nineteenth century becomes a photographic and filmic drive Moving through the beginning of film history from Georges Méliès and other silent filmmakers in the 1890s into more contemporary movies including Alfred Hitchcock's Vertigo 1958 and Blade Runner 2049 2017 the book analyzes how films are often structured around the prior century's mythic and literary principles which now serve as foundation for film as medium a phantom form for life's representation Artificial Generation provides a crucial reassessment of the longstanding mutual exchange between cinematic and literary reproduction offering an innovative perspective on the proto cinematic imperative of simulation within nineteenth century literary symbolism

Going Back to the Future Robert Palestini, 2011-09-09 It was Edmund Burke the British Statesman and philosopher who said that those who don't know history are destined to repeat it In this book at least as far as educational leadership is concerned Robert Palestini helps ensure that we do not fall into the trap of ignoring history Dr Palestini rightly points out that effective leaders have been utilizing the same leadership behavior for centuries He uses this evidence to support the perennial and lasting impact of situational leadership theory which posits that no single way of leading works in all situations Rather appropriate leadership behavior depends on the circumstances at a given time For centuries effective managers have been diagnosing the situation identifying the leadership style or behavior that will be most effective and then determining whether they can implement the required style At the turn of the last century the editors of Life Magazine identified the 100 leaders who they believed had the most impact of the global society during the second millennium Using this list as a backdrop Palestini chose ten of the twentieth century individuals on the list to explore what it was about their respective leadership behavior that allowed them to have such a significant and lasting impact on our society When we examine the leadership behavior of the ten great leaders profiled in this book we will most certainly find that the most effective of them operated out of all five leadership frames the lesson learned being that if one wishes to hone one's current leadership skills or become a future leader one can learn to do so by reflectively looking to the leaders of the past
