What Works in Nordic School Policies? John Benedicto Krejsler, Leif Moos, 2021-03-23 This book offers an original contribution to the area of international research on comparative education policies and the influence of transnational agencies on national school policy and reform With a focus on grasping what the Nordic model or the Nordic dimension means in school and educational policy the book explores in depth the school policy contexts of the five Nordic countries Denmark Finland Iceland Norway and Sweden It demonstrates how these particular national contexts engage with and contextualize transnational collaboration on issues like school reform accountability evidence and what works and

digitalization The book situates these policy issues over a long period of time while integrating the latest developments and reforms It demonstrates how context matters It shows how the often elusive but pervasive Nordic dimension can only be fully understood by painstaking scrutiny of the five national contexts their particular trajectories and mutual interactions in formal and informal education **Reimagining Globalization and Education** Fazal Rizvi,Bob Lingard,Risto Rinne,2022-05-25

This book brings together leading scholars in Global Studies in Education to reflect on how various developments of historic significance have unsettled the neoliberal imaginary of globalization The developments include greater recognition of inequalities and the changing nature of work and communication the emergence of new technologies of governance a greater awareness of geopolitical shifts the revival of nationalism populism and anti globalization sentiments and the recognition of risks surrounding pandemics and climate change Drawing from a range of disciplinary perspectives the chapters in this collection examine how these developments demand new ways of thinking about globalization and its implications for education policy and practice beyond the neoliberal imaginary Transnational Influences on Values and Practices in Nordic Educational Leadership Lejf Moos,2013-03-15 This book explores to what extent transnational influences change national local values and practices in the Nordic educational systems It provides country cases and thematic chapters that give nuanced insights into the influence of transnational agencies on national governance and discourses It describes how national discourses and regulation influences school leadership values culture and practice in competition with traditional values The transnational and global discourse on educational leadership is mostly formed according to Anglo American thinking and tradition Pivotal foundations of this discourse are strong hierarchical societies class societies with liberal democracies and clearly streamed education systems The Nordic discourse however builds on a more equal society and flat hierarchies with participatory democracy and on comprehensive schooling with strong local community roots Leadership thinking and practices are formed by the culture and context they are part of they are primarily shaped by the national local values traditions and practices and only partially shaped by politics discourses and literature Due to the fact that a great deal of the literature that is being used in the Nordic contexts is of Anglo American origin and many of the research projects have Anglo American foundations it is difficult to distinguish the sources for leadership thinking and practice This book distinguishes the Nordic from the Anglo American thinking and presents important findings and arguments for leadership practitioners inside as well as outside the Nordic countries Equity, Equality and Diversity in the Nordic Model of Education Tove Stjern Frønes,Andreas Pettersen,Jelena Radišić,Nils Buchholtz,2021-01-21 Does the Nordic model of education still stand by its original principles and safeguard education for all This Open Access volume is a carefully crafted collection of chapters that investigate the different aspects of equity equality and diversity across the education systems in the Nordic countries Based on data from various national and international large scale assessments the volume provides a better understanding of both the functions and foundations of the Nordic model along with how the concepts mentioned

above are enacted in practice Across the chapters data from different national and international large scale assessment studies are used for cross and single country analyses on a variety of issues related to equity equality and inequality in diverse educational settings The investigations address different subject domains i e mathematics science reading age and grade groups but also issues related to teachers and the schools themselves In addition to these empirical chapters the book addresses the theoretical and methodological underpinnings of the ideas and tools embedded in the phenomena of equity and equality and how they have met in the Nordic model of education
