**Education as a Human Enterprise** William D. Hitt, 1973      **Practical And Professional Ethics (vol. 4 :**  
**Educational Ethics** Debashis Guha, 2007 The Series on Practical and Professional Ethics is an outcome of major research project funded by the U G C in which the task of resolving some value laden practical problems troubling the professionals and the non professionals in India was undertaken      **The Human Enterprise** Robert M. Rodney, 1964      **Business as a Human Enterprise** David Newkirk, 2009 There is a malaise in the business academy with much noise but not much change This essay suggests an underlying cause of the current difficulties We argue the challenges facing management scholarship and education grow out of a fundamental misunderstanding of the nature of business itself Much of current research and teaching treats business as a deterministic phenomenon and management as a science Business is a thoroughly human institution However business schools and business scholars rarely recognize this However this perspective creates a great opportunity First and most importantly it lets us correct many of the problems identified in the modern critiques of management scholarship and education More importantly by embracing business as a human institution and leadership as a creative act we can begin the long overdue task of building bridges between our business schools and the rest of the academy We can find multiple useful lenses through which business leaders and academics can view business activities And a portion of our colleagues can continue to pursue their scientific agenda should they choose In this paper we engage in a brief stylized history of the business academy primarily in the United States where it finds its most dominant form and historically its largest audience We juxtapose this history with the tremendous changes that have occurred in business over the last 40 50 years and suggest that the time is ripe for change Next we examine several recent critiques and demonstrate that they rest on a faulty and outmoded view of business We use the thinking underlying stakeholder theory to frame the arguments showing we need a new approach most easily characterized as business as a human activity We suggest two central questions and four problems that business education must place front and center We then begin to discuss how we might draw on all of the disciplines of the academy for a more robust and useful view of business and more powerful portfolio of research and educational tools      **Complexity Theory and the Philosophy of Education** Mark Mason, 2009-02-23 A collection of scholarly essays Complexity Theory and the Philosophy of Education provides an accessible theoretical introduction to the topic of complexity theory while considering its broader implications for educational change Explains the contributions of complexity theory to philosophy of education curriculum and educational research Brings together new research by an international team of contributors Debates issues ranging from the culture of curriculum to the implications of work of key philosophers such as Foucault and John Dewey for educational change Demonstrates how social scientists and social and education policy makers are drawing on complexity theory to answer questions such as why is it that education decision makers are so resistant to change how does change in education happen and what does it take to

make these changes sustainable Considers changes in use of complexity theory developed principally in the fields of physics biology chemistry and economics and now being applied more broadly to the social sciences and to the study of education

PRATIK MUNGEKAR,2022-05-03 Dear Readers To educate the complete child teaching and learning must encompass all aspects of student development How do experts from many disciplines collaborate and combine their skills and abilities to meet the developmental requirements of students What attitudes and ideas are required to effectively collaborate in order to build healthy educational settings for children Who has responsibility for the collaborative process and who intervenes when it fails There is room for everyone to excel intellectually if they are given the correct education from the beginning The function of education is to teach one to think deeply and critically True education aims to develop intelligence as well as character The importance of cooperation and coordination in problem resolution and transformation in classrooms schools and school community systems is emphasised What exactly is Education What is its principal function and what is it not Which techniques support it and at what cognitive levels So many fundamental issues that many of our trained teachers among others raise And there are few forums where they may debate the few replies they have found so far As a result there was a perceived need for a book of this type containing basic principles and introductions to many pertinent theories I hope that the book will be a useful resource for student teachers teachers teacher educators and all stakeholders in our country s educational institutions New England Stationer and Printer ,1902 *EDUCATION FOR SUSTAINABILITY -Volume I* Robert V. Farrell ,George Papagiannis,2009-10-10 Education for Sustainability is a component of Encyclopedia of Human Resources Policy Development and Management in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Education for Sustainability provides the essential aspects and a myriad of issues of great relevance connection between education and more sustainable futures and embraces a reality that all need to know It demands a much broader interpretation of education a holistic perspective that accommodates new and challenging ideas Such education is imperative in creating the knowledge wisdom and vision needed for the transition to a more sustainable world In helping to design this sustainable future education for sustainability implements a vital systemic perspective that will allow for a complex interdependence of all life forms and Earth This volume is aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers and NGOs *Resources in Education* ,1997-05 **Ofsted a case in the mismanagement of the standards of education in England** John Igbino,2014-04-23 Project Report from the year 2014 in the subject Pedagogy School System Educational and School Politics language English abstract This book reports on a research project which was carried out between 2002 and 2013 The focus of the research was the Office for Standards in Education Children s Services and Skills Ofsted and its education and training and development programmes for inspectors Claims and disputes The Office for Standards in Education Children s Services and Skills Ofsted defines itself as the statutory watchdog for the preservation and management of the standard of education in England And by its own accounts Ofsted has claimed firstly that it is the

promoter and upholder high standard of educational achievements secondly that it is the bulwark against weak teaching and weak leadership management and governance and thirdly that it is the champion and protector of the interests of the constituents of education in England Ofsted 2012 4 This research does not dispute the fact that the above claims came with the provisions of the Education schools Act 1992 and the Education and Inspection Act 2006 and that the Act delegated the statutory duties to inspect evaluate and judge and report on the standard of education in England to Ofsted Instead the research is disputing Ofsted s claims as follows firstly the research disputes the extent to which Ofsted has achieved the statutory duties delegated to it under the provisions of the 1992 and 2006 Acts And secondly the research is questioning whether in its current structure Ofsted is fit for purpose and whether Ofsted and a significant proportion of its inspectors have the operational and intellectual capabilities to continue to inspect specific educational remits and to evaluate and judge and report on the standard of education in England Thus the research has advanced the following arguments against Ofsted s and its inspectors capabilities and fitness for purpose the first argument is that there are incompetent inspectors within the ranks of Ofsted inspectors The research has found that 30% of practicing Ofsted inspectors do not have the skills and competencies required to successfully achieve Ofsted s performance criteria for inspectors particularly in the collection analysis evaluation assessment and interpretation of evidence in the three principal aspects of Ofsted s judgements The three aspects in question are Outcomes for Learners Teaching Learning and Assessment and Leadership and Management The second argument is that there
