Préparation physique : l'individualisation au service de la performance

Jason Feugray, 2024-09-18 A partir des problématiques et réflexions actuelles ce livre répond à la question que beaucoup de préparateurs physiques et d'étudiants en STAPS se posent : quelles étapes dois-je suivre pour m'assurer d'un processus optimal d'encadrement des athlètes ? Ce livre traite de l'individualisation de la préparation en fonction de l'athlète. L'auteur propose une démarche par étapes : évaluer la performance, programmer l'entraînement, encadrer l'entraînement, adapter l'entraînement, analyser, quantifier, suivre l'entraînement, optimiser l'entraînement. Les recherches actuelles montrent que l'individualisation de l'entraînement permet à la fois une optimisation du processus de progression mais aussi une prévention face aux risques de surentrainement. Structurer son intervention permet de mettre toutes les chances de son côté pour limiter ces risques.

Physiologie de l'entraînement et de la performance sportive Véronique Billat, 2024-08-29 Avec cette 6e édition nous fêtons les 25 ans de ce livre de référence en physiologie du sport. Dans cette édition l'auteure a intégré les toutes nouvelles découvertes en matière d'entraînement physiologique pour tendre vers une approche physiologique individuelle et pratique du sportif. Pour cela chaque chapitre aborde la théorie et les applications pratiques pour l'entraînement. Ce livre est écrit tout spécialement pour celles et ceux qui souhaitent maîtriser les notions de physiologie indispensables au bon entraînement. Tout pratiquant et professionnel exigeant et curieux de progresser dans la connaissance trouvera dans ce livre une étude approfondie des transformations énergétiques opérées par toute activité physique en fonction de son intensité de sa durée et de sa forme et de son environnement.

Continuités et ruptures dans l'apprentissage

Jim Plumat, Céline Mousset, Pierre Smets, Philippe Soutmans, 2019-04-02 L'apprentissage dans l'enseignement obligatoire n'est pas un long fleuve tranquille. Sous l'apparente continuité du curriculum se cachent des ruptures au niveau des contenus disciplinaires. C'est le constat que des enseignants formateurs dans différentes disciplines françaises mathématiques sciences langues modernes histoire et culture physique et différents niveaux de formation du préscolaire à l'université ont pu faire lorsqu'ils se sont rencontrés lors d'une journée d'études du Centre de recherche interdisciplinaire sur les pratiques enseignantes et les disciplines scolaires. L'objet de la réflexion était de étudier la manière selon laquelle un concept particulier ou une compétence par exemple le concept de galiléen mathématique ou la compétence de lecture en français pouvait voyager et être enseigné tout au long de la scolarité. Les analyses effectuées dans les diverses disciplines révélent que la progression curriculaire que certains imaginaient continue présente régulièrement des tensions voire des ruptures. L'apprentissage longitudinal d'un concept ou d'une compétence se retrouve souvent lacunaire et dès lors difficile pour les élèves. Au-delà de ce constat, les équipes de formateurs impliquées dans ce projet proposent des pistes d'action très concrètes qui invitent leurs étudiants futurs enseignants à travailler de manière davantage conjointe et à se forger une image plus construite du savoir enseigner.
