## **Education In National Politics Educational Policy Planning And Theory:**

**Education in National Politics** Norman C. Thomas,1975      **Education in National Politics** Norman C. Thomas,1975-01-01      *Sociology of Education: Theories and methods* Stephen J. Ball,2000      *The New Political Economy of Urban Education* Pauline Lipman,2013-05-13 Using Chicago as a case study of the interconnectedness of neoliberal urban policies on housing economic development race and education Lipman explores larger implications for equity justice and the right to the city      *Educational Policy and the Politics of Change* Sandra Taylor,1997 This book examines policy making at each level from perspectives both inside and outside the state bureaucracy It has a particular focus on social justice

*Research in Education* ,1974      *President Obama and Education Reform* R. Maranto,M. McShane,2012-08-16 This book offers a comprehensive analysis of President Obama s education agenda Obama s reforms have drawn skepticism from supporters of traditional public schools Robert Maranto and Michael McShane believe that the Obama era reforms have led to successful innovation in both the private and public sector      **Resources in Education** ,1998      **Researching Global Education Policy** D. Brent Edwards Jr.,Antoni Verger,Marcia McKenzie,Keita Takayama,2024-07-30 The movement of policy is a core feature of contemporary education reform Many different concepts including policy transfer borrowing and lending travelling diffusion and mobility have been deployed to study how and why policy moves across jurisdictions scales of governance policy sectors or organisations However the underlying theoretical perspectives and the foundational assumptions of different approaches to policy movement remain insufficiently discussed To address this gap this book places front and center questions of theory ontology epistemology and method related to policy movement It explores a wide diversity of approaches to help understand the policy movement phenomena providing a useful guide on global studies in education as well as insights into the future of this dynamic area of work      **Globalization and Education** Nelly P. Stromquist,Karen Monkman,2014-03-04 We offer in this book a collection of chapters that reflect a broad range of issues linking globalization to education in an accessible yet theoretically grounded and detailed form The authors analyze phenomena on the global plane in local spaces and in the connections between the global and the local New developments such as the growing impact of technology on education the emergence of new policy actors the growing expansion and segmentation of higher education the salience of human rights among others are emerging as powerful agendas shaping all levels of education In fundamental ways the forces of globalization challenge the previous approaches and theories of national development Recognizing the areas of convergence dissonance and conflict should help us grasp with greater clarity the implications of globalization for education and knowledge in the XXI century The contributors to this book include both well known scholars in the field of comparative education as well as young scholars The chapters present a balanced geographical coverage in terms of authors and the countries regions examined The second edition has been thoroughly updated throughout and contains seven new chapters The expanding interest in the intersection of education and

globalization has brought up several new topics including the salience of global education policies notably EFA the expansion and differentiation of higher education the emphasis on work related training the increasing role of non state actors such as the transnational corporations and greater attention to human rights Also in this new edition is a chapter on qualitative methodologies especially suitable to the understanding of the intersection of globalization and education

**Public Policy to Reduce Inequalities across Europe** Paul Cairney, Michael Keating, Sean Kippin, Emily St Denny, 2022-07-28 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations There is a broad consensus across European states and the EU that social and economic inequality is a problem that needs to be addressed Yet inequality policy is notoriously complex and contested This book approaches the issue from two linked perspectives First a focus on functional requirements highlights what policymakers think they need to deliver policy successfully and the gap between their requirements and reality We identify this gap in relation to the theory and practice of policy learning and to multiple sectors to show how it manifests in health education and gender equity policies Second a focus on territorial politics highlights how the problem is interpreted at different scales subject to competing demands to take responsibility This contestation and spread of responsibilities contributes to different policy approaches across spatial scales We conclude that governments promote many separate equity initiatives across territories and sectors without knowing if they are complementary or contradictory This outcome could reflect the fact that ambiguous policy problems and complex policymaking processes are beyond the full knowledge or control of governments It could also be part of a strategy to make a rhetorically radical case while knowing that they will translate into safer policies It allows them to replace debates on values regarding whose definition of equity matters and which inequalities to tolerate with more technical discussions of policy processes Governments may be offering new perspectives on spatial justice or new ways to reduce political attention to inequalities

*Education* James Walker Benet, Arlene Kaplan Daniels, Current discussions of education from Jencks Inequality to Coleman's recent controversial pronouncements on desegregation orders and white flight concentrate on the efficacy of educational reform The articles in this anthology collected from two issues of the journal Social Problems all consider this topic The volume is divided into six sections each exploring different aspects of education In an introductory essay the editors state the theme of the work and outline the approaches and focuses of the individual essays Daniels and Benet provide a framework within which the reader can digest and interpret the various contributions and raise a series of questions intended to guide future educational research They maintain that only interdisciplinary study can enable researchers to understand the play between individual aspirations and interconnecting social systems and institutions in the development of the growing exasperation with or indifference to the schooling question Originally sponsored by the Society for the Study of Social Problems this work provides refreshing insights into the nature of contemporary education and

explores new areas of research not previously discussed It follows a social system approach to education and advocates it as a model for future researchers Serves an important role in the current assessment of American education Ray C Rist Cornell University **Government-supported Research** United States. Department of State. Office of External Research,1969

**Educational Policies and Legislation in China** Xiaozhou Xu, Weihui Mei, 2018-09-18 This book provides a comprehensive overview of the development of educational policies and legislation in China particularly following the introduction of Reform and Opening Up in 1978 The scope of this book 1 provides the theoretical basis and framework of educational policies 2 explains key educational laws and legislation and 3 introduces readers to policies for educational internationalization private education lifelong learning and teacher education The book is intended for researchers teachers and graduate students in the field of comparative education educational policy and legislation educational management Readers will find essential information on the most important educational laws and legislation as well as the recent characteristics of and trends in educational policies in China *A New Public Education* Seymour W. Itzkoff, 1976 Seymour W Itzkoff is a professor of education at Smith College where he has taught since 1965 Prior to that he taught in the public schools and Hunter College He received his doctorate from Teachers College Columbia University A specialist in educational theory he has written *Cultural Pluralism in American Education* and *Ernst Cassirer Scientific Knowledge and the Concept of Man* An avid cellist he has performed with symphony orchestras and is a member of a string quartet *Moral Panics and School Educational Policy* Grant Rodwell, 2017-07-06 How do the moral panics that have plagued school education since its nineteenth century beginnings impact current school education policy Research has shown young people to be particularly vulnerable to moral panics and with the rise of social media the impact of moral panics on school education is growing exponentially Increasingly they are reaching into the highest levels of national governments and so powerful are their effects some politicians choose to orchestrate them for their own political ends For many educational administrators the management of the fallout of moral panics has become a time consuming part of their day as well as being a problematic time for parents teachers and students First developed by British and Canadian sociologists such as Stanley Cohen 1972 moral panic theory has evolved substantially since its early focus on adolescent deviant behaviour and is now a part of common media talk This book addresses the need for a single monograph on the topic with reference to historical moral panics such as those associated with sexuality education but also wider societal moral panics such as those associated with obesity Teachers students indeed all members of school communities along with educational administrators and politicians can learn from this study of the impact of moral panics on school educational policy *Monthly Catalog of United States Government Publications* United States. Superintendent of Documents, 1987 **American Education** ,1970 **Disability & the Politics of Education** Susan Lynn Gabel, Scot Danforth, 2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education

For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world s disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches

*Education and Social Change* Edmund J. King, 2014-05-16 *Education and Social Change* provides a basic introduction to educational studies with a viewpoint for decision This book discusses the increasing number of educational influences at work outside the schools and colleges Organized into three parts encompassing 10 chapters this book starts with an overview of the influences affecting the schools as well as affecting the entire life in which the schools have to take on a different meaning This text then examines the educational institutions and describes how their purposes structures and populations are undergoing unprecedented change Other chapters deal with the transformation of the teaching learning role itself with reference to the teachers This book discusses as well the relevance of all educational sciences The final chapter briefly examines some of the main questions that need to be asked again because of all the changes in education s purposes and instrumentality This book is a valuable resource for students and teachers
