book explores the implications of world renowned educationalist Paulo Freire's theories for educational practice and how his ideas can help in bridging different genres and traditions. It addresses themes, questions and issues that have received little attention to date including Freire's conception of the critical intellectual, the problem of defining literacy and the possibility of a Freirean response to debates over political correctness. Roberts also relates Freire's ideas to those of other writers: Israel Scheffler, Fyodor Dostoevsky and Hermann Hesse among others. Paulo Freire in the 21st Century makes a distinctive contribution to the international literature on Freire's work. *International Encyclopedia of Education*, 2009-04-17

Samier,Eman S. ElKaleh,2019-04-10 This book explores the Islamic tradition and Muslim contexts for educational administration and leadership It addresses the teaching of educational administration and leadership from an Islamic perspective by raising issues of globalised educational administration and leadership teaching as it applies in Muslim contexts that vary by culture and social institutions The book proposes alternative approaches and demonstrates that Islamic traditions have a strong foundation upon which to build in the field and are compatible with many aspects of Western theory and practices provided that sufficient modifications and adaptations are made The book focuses on postgraduate curricula and pedagogy drawing on a range of theoretical foundations and approaches that are culturally and jurisdictionally appropriate in a number of Muslim countries As such it contributes to an emerging specialisation in international and comparative educational administration and leadership that is oriented towards a broader and more diverse set of perspectives particularly from the non Western world      *Critical Education Against Global Capitalism* Paula Allman,2001-04-30 In today s vernacular Marx outed capitalism well over a century ago but his explanation has been both ignored and misinterpreted by not only his detractors but also by many socialists and even a considerable number of Marxists as well Today we are experiencing the full impact and suffering the repercussions of capitalism s inherent need to become

more than ever before a fully internationalized and integrated system of socio economic control and domination the global system that many commentators have suddenly remembered Marx and Engels 1848 presciently forecasted in the Communist Manifesto When the Berlin Wall fell in 1989 the victory of capitalism and liberal democracy was triumphantly proclaimed The Cold War was over and we were promised a lasting peace But as we enter the third millennium we are facing escalating social divisions injustice and oppression with an environment in varying stages of ecological decay Daily we are bombarded by the schizoid media images of capitalism s extremes on television news the ravaged faces and wasted bodies of some of the thousands suffering famine or the millions living in the world s slums and then the gleaming yet vacuous smile and sumptuously adorned figure of some extravagant wealthy individual who is one of the select members of the global upper class Are we becoming conditioned to accept such contrasts and regard them as normal and inevitable at a time when we have the potential to eliminate scarcity and eradicate human deprivation The author argues that critical education is needed to form a movement capable of challenging and then transforming capitalism She also offers an accessible account of Marx s dialectical critique and expos of capitalism clearly demonstrating the real enemy that should be the focus of anti capitalist and anti globalization struggles This is an account that explains why our main focus should not be on greedy individual capitalists or particular multinational corporations or even their handmaiden institutions such as the World Bank IMF WTO etc but instead the global network of capitalist social relations and consequent habituated human practices in which we are all involved These together with the historically specific form of capitalist wealth are the real enemy the essence of capitalism that must be abolished in order for humanity to have any hope of social and economic justice in the future

Education under Siege Mortimore, Peter, 2013-09-23 At a time when education is considered crucial to a country s economic success recent UK governments have insisted their reforms are the only way to make England s system world class Yet pupils are tested rather than educated teachers bullied rather than trusted and parents cast as winners or losers in a gamble for school places Education under siege considers the English education system as it is and as it might be In a highly accessible style Peter Mortimore an author with wide experience of the education sector both in the UK and abroad identifies the current system s strengths and weaknesses He concludes that England has some of the best teachers in the world but one of the most muddled systems Challenging the government s view that there is no alternative he proposes radical changes to help all schools become good schools They include a system of schools receiving a fair balance of pupils who learn easily and those who do not ensuring a more even spread of effective teachers as well as banning league tables outlawing selection opening up faith schools and integrating private schools into the state system In the final chapter he asks readers who share his concerns to demand that the politicians alter course The book will appeal to parents education students and teachers as well as everyone interested in the future education of our children

**Hegemony and Education Under Neoliberalism** Peter Mayo, 2015-03-12 Based in a holistic exposition and appraisal of Gramsci s writings that are of relevance to education in

neoliberal times this book rather than simply applying Gramsci's theories to issues in education argues that education constitutes the leitmotif of his entire oeuvre and lies at the heart of his conceptualization of the ancient Greek term hegemony that was used by other political theorists before him. Starting from this understanding the book goes on to compare Gramsci's theories with those of later thinkers in the development of a critical pedagogy that can confront neoliberalism in all its forms.

The Double Helix of Learning and Work Orio Giarini, Mircea Malița, 2003

A Responsive Rhetorical Art Elenore Long, 2018-10-24

A Responsive Rhetorical Art explores the risk-ridden realm of wise if always also fallible rhetorical action: the productive knowledge building required to compose and to leverage texts broadly construed for the purposes of public life marked by shrinking public resources, cultural conflict and deferred hope. Here composition and literacy learning hold an important and distinctive cultural promise: the capacity to invent with other people new ways forward in light of their own interests and values and in the face of obstacles that could not have otherwise been predicted. Distributed across publicly situated strangers including citizen educators, this work engages a persistent challenge of early rhetorical uptake in public life: that what might become public and shared is often tacit and contested. The book's approach combines attention to local cases with a transnational student organization, the Nipmuck Chaubunagungamaug and the South Sudanese diaspora in Phoenix, with a revisable guide for taking up wise action and methods for uncovering elusive institutional logics.

**Community Nursing Practice** Winsome St John, 2020-08-04

Community practice is a stimulating and diverse field of nursing. Community nurses often work without direct support from other health professionals and need not only excellent clinical skills but also skills in communication, research and health promotion. Community Nursing Practice offers a thorough introduction to the role of the community nurse. Based on principles of primary health care, it outlines the theory, knowledge and skills required to make a difference to the health and wellbeing of individuals, families, groups and even whole communities. The contributors make a point of articulating knowledge that is often taken for granted among experienced practitioners. Community Nursing Practice is based on the premise that community nursing is a specialist field of nursing practice in its own right and nurses require a specific body of knowledge to work effectively in a community setting, no matter what their clinical focus or location. Contributors outline the foundations of community practice, including principles of disease prevention and wellness promotion, as well as a social model of health. Together with the skills required for work with different population groups, the contribution of research is explored. Professional skills including program management, advocacy, teamwork, home visiting and self-management are also covered. With contributions from leading nurse educators and researchers, Community Nursing Practice is richly illustrated with case studies and examples from a variety of practice settings. It is an essential student text and valuable professional reference.

**Biblical Shalom for Sustainable Holistic Transformational Development in Nigeria** Stephen Z. Yashim, 2020-12-14

How do Christian organizations engaged in development work effectively facilitate the holistic transformation of communities? In this important contribution

to the field Dr Stephen Yashim reviews the participatory problem solving approaches commonly utilized by Christian relief and development organizations in Nigeria Dr Yashim highlights the failure of current methods to facilitate dialogue between the biblical worldview with its divine transformative potential and the worldview of local rural communities In order for rural communities to progressively experience biblical shalom the total well being of the whole and its members they must be equipped to examine and articulate their own perspective on development while also engaging with biblical perspectives Dr Yashim proposes an alternative approach of participatory appreciative dialogue to be used alongside more traditional methods in pursuit of community transformation This is an excellent resource for anyone engaged in community development and transformation and who longs to experience biblical shalom poured out among individuals and communities
