Woodford, 2018-10-25 This is a deliberately provocative book crossing many disciplinary boundaries and locating music and art education within a context of contemporary social and political problems in a time of growing disruption and authoritarianism Intended firstly for music teacher educators practicing music teachers and graduate and undergraduate music education majors the book also speaks to arts and media studies teachers parents or others interested in exploring how composing performing improvising conducting listening dancing teaching learning or engaging in music or education criticism are all political acts because fundamentally concerned with social values and thus inseparable from power and politics Among the book's central themes are the danger of democratic deconsolidation in the West and how music education can help counter that threat through the fostering of democratic citizens who are aware of music's ubiquity in their lives and its many roles in shaping public opinion and notions of truth and for better or for worse The arts can obviously be used for ill but as George Orwell demonstrated in his own work they can also be employed in defense of democracy as modes of political thought and action affording opportunities for the revitalization of society through its reimagining

Reconstructing the "Uni-versity" Harvey J. Graff, 2025-09-14

Slogans, myths, and isolated anecdotes are inadequate substitutes for documented history and contextual understanding. Literature on the history of higher education is dominated by ahistorical and contextually ignorant slogans. Seldom acknowledged in discussions of the decline or failure of the modern university is 1 how long it has been going on at least since the 1960s and 2 universities' own complicity in this long, complicated, and contradictory process. Myths intertwine inseparably with slogans to echo yet another lost cause. Our collective as well as individual pasts provide essential lessons if we know how to read and learn from them. More complicated is imagining a plausible better future for universities. In *Reconstructing the University: From the Ashes of the Mega and Multi-versity to the Futures of Higher Education*, Harvey J. Graff, bringing experience from over 50 years as a professor, provides an accurate history of higher education, redefining the issues and terms to establish a new agenda.

Knowledge for Social Change Lee Benson, 2017-07

Employing history, social theory, and a detailed contemporary case study, *Knowledge for Social Change* argues for fundamentally reshaping research universities to function as democratic, civic, and community-engaged institutions dedicated to advancing learning and knowledge for social change. The authors focus on significant contributions to learning made by Francis Bacon, Benjamin Franklin, Seth Low, Jane Addams, William Rainey Harper, and John Dewey, as well as their own work at Penn's Netter Center for Community Partnerships to help create and sustain democratically engaged colleges and universities for the public good. *Knowledge for Social Change* highlights university-assisted community schools to effect a thoroughgoing change of research universities that will contribute to more democratic schools, communities, and societies. The authors also call on democratic-minded academics to create and sustain a global movement dedicated to advancing learning for the relief of mankind's estate, an iconic phrase by Francis Bacon that emphasized the continued betterment of the human condition and to realize Dewey's vision of an organic Great Community composed of participatory, democratic, collaborative, and interdependent societies.
