## **Education In Divided Societies:**

**Education in Divided Societies** T. Gallagher, 2004-10-18 All societies contain ethnic divisions Traditionally education has acted to promote social integration but with the acknowledgement of diversity do we know which system best promotes positive inter community relations Education in Divided Societies examines the experience of a range of systems including those which provide common schools and those which place minorities in separate schools The book argues that structures do not guarantee outcomes and that processes of dialogue and interconnected social systems provide the route to the future

**Education and the Development of Social Integration in Divided Societies** Colin Irwin, 1991 **Activist**

**Pedagogy and Shared Education in Divided Societies** , 2022-02-14 Collaborative engagement between activist academics from Israel and Northern Ireland highlighted the challenges and potential of working through education to promote shared learning and shared life in divided societies Following these initial explorations the volume brought together educationalists from Europe the United States and South Africa to widen the range of experience and insights and broaden the base of the conversation The result is this book on the role of shared education not only in deeply divided societies but also in places where minorities face discrimination where migrants face prejudice and barriers or where society fails to deal positively with cultural diversity Together the contributors challenged themselves to develop theoretical and practical paradigms based on practical knowledge and experience to promote activist pedagogies Their shared purpose was to work for more humane just and democratic societies in which education offers genuine hope for sustained transformational change The four main themes around which the book is organized are educating for democratic multicultural citizenship models of shared learning nurturing intercultural competencies and reconciling dialogue in the face of conflicting narratives The book draws on a wide range of international perspectives and insights to identify practical strategies for change in local contexts *Education in divided societies* , 1998 **Education and the Development of Social Integration in Divided Societies** Colin Irwin, 1991

**Separate to Unite** Guiditta Fontana, 2014 This thesis contributes to theories of conflict regulation by showing that formal education while furthering the short term stability of power sharing by reproducing its core narratives and hierarchies may also plant the seeds of future conflicts It concludes that consociations may generate consociational education systems which help reproduce the basic building blocks of political consociations mutually exclusive confessional ethnic national and political communities A paradox characterises consociational education systems Initiatives that promote unity and integration in schools tend to generate backlashes against assimilation To further social cohesion and transition out of conflict education reforms need to accommodate the separate institutions and mutually exclusive identity forming narratives of the local communities in question **Schools and the politics of religion and diversity in the Republic of Ireland** Karin Fischer, 2016-09-01 Offers an in depth analysis of the historical political and ideological backdrop to the denominational education system in the Republic of Ireland *Education Policy and Power-Sharing in Post-Conflict*

*Societies* Giuditta Fontana, 2016-08-24 This book explores the nexus between education and politics in Lebanon Northern Ireland and Macedonia drawing from an extensive body of original evidence and literature on power sharing and post conflict education in these post conflict societies as well as the repercussions that emerged from the end of civil war This book demonstrates that education policy affects the resilience of political settlements by helping reproduce and reinforce the mutually exclusive religious ethnic and national communities that participated in conflict and now share political power Using curricula for subjects such as history citizenship education and languages and structures like the existence of state funded separate or common schools Fontana shows that power sharing constrains the scope for specific education reforms and offers some suggestions for effective ones to aid political stability and reconciliation after civil wars **Governing**

**Through Pedagogy** Jessica Pykett, 2013-09-13 This edited collection brings together researchers from education human geography sociology social policy and political theory in order to consider the idea of the pedagogical state as a means of understanding the strategies employed to re educate citizens The book aims to critically interrogate the cultural practices of governing citizens in contemporary liberal societies Governing through pedagogy can be identified as an emerging tactic by which both state agencies and other non state actors manage administer discipline shape care for and enable liberal citizens Hence discourses of active citizenship participatory democracy community empowerment personalised responsibility behaviour change and community cohesion are productively viewed through the conceptual lens of the pedagogical state Chapters consider the spaces of schools universities the voluntary sector civil society organisations parenting initiatives the media government departments and state agencies as fruitful empirical sites through which pedagogy is worked and re worked This book was originally published as a special issue of *Citizenship Studies* **Human Rights in the Field of**

**Comparative Education** Heidi Biseth, 2013-02-11 There is no single answer to the question what are human rights The answer depends on whom you ask Several of the papers presented at Fourteenth World Congress of Comparative Education held at Bog azi i University in Istanbul Turkey in June 2010 discussed issues related to human rights from a comparative education viewpoint The nine papers presented in this book spans from policy analysis to practices in classrooms They include analyses of human rights from a regional or country perspective including Greece Jordan the Latin American region Morocco Northern Ireland Portugal the UK the US and Turkey In facilitating a clarification of the ways in which we understand and talk about human rights in the field of comparative education the editors have analysed and visualized the chapter contributions using Marie B n dicte Dembour s categorization of human rights discourses This is a fruitful exercise as it unravels the fact that we do not always mean the same thing when talking about human rights and also sheds light on the issues within human rights to which we are silent issues that we should conceivably be discussing Our engagement in human rights seems to focus on using these rights as leverage to promote our arguments about education not engaging in a more philosophical debate about human rights Human rights can be used as an ethical lingua franca and thus providing a fertile

ground for nuancing our understanding of human rights Since we experience a huge gap between morality and reality an engagement in the ethical perspectives of human rights can help us on the way to closing this gap

**Universities and Conflict** Juliet Millican, 2017-11-08 This book uses a series of case studies to examine the roles played by universities during situations of conflict peacebuilding and resistance While a body of work dealing with the role of education in conflict does exist this is almost entirely concerned with compulsory education and schooling This book in contrast highlights and promotes the importance of higher education and universities in particular to situations of conflict peacebuilding and resistance Using case studies from Europe Africa Asia and the Middle East this volume considers institutional responses academic responses and student responses illustrating these in chapters written by those who have had direct experience of these issues Looking at a university's tripartite functions of research teaching and service in relation to the different phases or stages of conflict pre conflict violence post conflict and peacebuilding it draws together some of the key contributions a university might make to situations of instability resistance and recovery The book is organised in five sections that deal with conceptual issues institutional responses academic led or discipline specific responses teaching or curriculum led responses and student involvement Aimed at those working in universities or concerned with conflict recovery and peacebuilding it highlights ways in which universities can be a valuable if currently neglected resource This book will be of much interest to students of peace studies conflict resolution education studies and IR in general
