Johannessen,Ansgar Pedersen,Kurt Petersen,2013-04-17 Business education and business research has often been criticized by the business community which claims that much of it is mainly directed at the establishment of teachers and researchers themselves instead of distributing their knowledge to the business community It may seem that many universities and other research institutions have turned into mere knowledge manufacturers where the emphasis is more on the output volume than on quality of relevance with little or no consideration for the end users As universities and corporations attempt to prepare management to be alert to future changes improved and even brand new teaching methodologies are required The main focus of the present volume is on the distribution and selection of new knowledge How can business educators deliver new knowledge to students and the business community more rapidly than before How should we define the core business
