## Defining Diversity In The Classroom

Simply put, "diversity" refers to the fact that everyone in a classroom is unique. Students may come from different cultural backgrounds, their families may face varying economic circumstances, or they may have different religious beliefs. Even with similar backgrounds, however, individual students may read at different levels or be more athletic than others. No matter how much common ground students share, each one has a unique personality. The challenge for the classroom teacher: Recognize these differences and create an environment where everyone has the opportunity to learn while also respecting one another.

Even in a classroom of students from similar cultural and socioeconomic backgrounds, teachers must be aware of diversity. Not only must they incorporate their students' different backgrounds and needs into their lesson plans, but they also should demonstrate for students the value and importance of being respectful to those who are different.
