strategies that have been pursued by cities themselves focusing particularly on improving economic competitiveness and tackling social disadvantage These approaches are contextualized by discussions covering for example urban competitiveness policies and the focus on sustainable urban regeneration The final section summarizes key issues and debates facing urban regeneration and speculates upon future directions Urban Regeneration in the UK blends the approaches taken by central government programmes and cities themselves in the regeneration process The latest ideas and examples from across disciplines and across the UK s urban areas are illustrated This book provides a comprehensive and up to date synthesis that will fill a significant gap in the current literature on regeneration and will be a tool for students as well as a seminal read for practitioners and researchers

Katz, 2012-05-25 At 1 27 on the morning of August 4 2005 Herbert Manes fatally stabbed Robert Monroe known as Shorty in a dispute over five dollars It was a horrific yet mundane incident for the poor heavily African American neighborhood of North Philadelphia one of seven homicides to occur in the city that day and yet not make the major newspapers For Michael B Katz an urban historian and a juror on the murder trial the story of Manes and Shorty exemplified the marginalization social isolation and indifference that plague American cities Introduced by the gripping narrative of this murder and its circumstances *Why Don't American Cities Burn* charts the emergence of the urban forms that underlie such events Katz traces the collision of urban transformation with the rightward moving social politics of late twentieth and early twenty first century America He shows how the bifurcation of black social structures produced a new African American inequality and traces the shift from images of a pathological black underclass to praise of the entrepreneurial poor who take advantage of new technologies of poverty

work to find the beginning of the path to the middle class He explores the reasons American cities since the early 1970s have remained relatively free of collective violence while black men in bleak inner city neighborhoods have turned their rage inward on one another rather than on the agents and symbols of a culture and political economy that exclude them The book ends with a meditation on how the political left and right have come to believe that urban transformation is inevitably one of failure and decline abetted by the response of government to deindustrialization poverty and race How Katz asks can we construct a new narrative that acknowledges the dark side of urban history even as it demonstrates the capacity of government to address the problems of cities and their residents How can we create a politics of modest hope

The Creative Capital of Cities Stefan Krätke,2012-05-03 This book challenges the new urban growth concepts of the creative class and creative industries from a critical urban theory perspective Critiques Richard Florida's popular books about cities and the creative class Presents an alternative approach based on analyses of empirical research data concerning the German urban system and the case study regions Hanover and Berlin Underscores that the culture industry takes a leading role in conforming with neoliberal conceptions of labor markets
