The Evolution of Human Populations in Arabia Michael D. Petraglia, Jeffrey I. Rose, 2009-11-27 The romantic landscapes and exotic cultures of Arabia have long captured the interests of both academics and the general public alike The wide array and incredible variety of environments found across the Arabian peninsula are truly dramatic tropical coastal plains are found bordering up against barren sandy deserts high mountain plateaus are deeply incised by ancient river courses As the birthplace of Islam the recent history of the region is well documented and thoroughly studied However legendary explorers such as T E Lawrence Wilfred Thesiger and St John Philby discovered hints of a much deeper past during their travels across the subcontinent Drawn to Arabia by the magnificent solitude of its vast sand seas these intrepid adventurers learned from the Bedouin how to penetrate its deserts and returned with stirring accounts of lost civilizations among the wind swept dunes We now know that prior to recorded history Arabia housed countless peoples living a variety of lifestyles including some of the world s earliest pastoralists communities of incipient farmers fishermen dubbed the Ichthyophagi by ancient Greek geographers and Paleolithic big game hunters who were among the first humans to depart their ancestral homeland in Africa In fact some archaeological investigations indicate that Arabia was inhabited by early hominins extending far back into the Early Pleistocene perhaps even into the Late Pliocene
