Edl Light Of The World:

The Idea of Social Structure Lewis A. Coser, 2017-07-12 Written and compiled by friends and former students The Idea of Social Structure honors Robert K Merton considered one of the premier sociologists of the twentieth century Along with Talcott Parsons and Marion J Levy Merton was emphatic in his use of the term social structure however different they were in defining and refining the term The chapters in this volume address many of Merton's diverse sociological theories and in turn his theories impact upon a very large sociological territory. The volume includes major statements on the context of working with Merton by Lewis A Coser Paul F Lazarsfeld Robert A Nisbet and Seymour Martin Lipset as well as memorable statements covering Merton's interests in the sociology of knowledge and science planning communities medical education relative deprivation everyday life political roles and communication media This is a powerful sourcebook for understanding the work of Merton and of his intellectual successors Nisbet called the decade of the 1930s among the most vital and creative periods in American history It was certainly a period of intense struggle political military and ideological But the formation of modern sociology was without question one of the crowning achievements in the scientific evolution of the century The volume is sharply focused on Merton's work and deeply appreciative of the nature of his contribution It is a landmark effort in the study of sociology as history Spiritual Genius Winifred Gallagher, 2002-01-08 In Spiritual Genius journalist Winifred Gallagher the acclaimed author of Working on God asks Rabbi Lawrence Kushner to define holiness Standing in the presence of God he says Everyone has it but some people seem to have more of a knack for accessing it Like holiness the gift that Gallagher calls spiritual genius which she defines as the uniquely human ability to search for and find life s meaning then express it in our lives as only each of us can is one we all possess but don't necessarily recognize Whether they are called saints gurus tzaddiks or shamans there have always been people who possess exceptional insight altruism and charisma In this disarmingly inspirational book Gallagher investigates what ordinary people trying to live decent meaningful lives can learn from such extraordinary men and women who are specially attuned to the deepest truths and who exemplify and radiate spiritual genius In a clear eyed ecumenical approach that s free of dogma and bias and suffused with profound respect Winifred Gallagher highlights the common wisdom and down to earth good humor of these religious leaders revels in their differences and identifies the capacity for spiritual genius that all of us share with them On an island in the Arabian Sea Gallagher visits Mata Amritanandamayi regarded by devotees as a Hindu goddess who transmits divine love through hugs and charities She travels through America's inner cities with Tony Campolo an Evangelical preacher who counsels national leaders and serves the poor She learns how Riffat Hassan a Pakistani theologian uses the Qur an to defend the rights of her Muslim sisters She journeys to a Tibetan Buddhist monastery in the Himalayas to understand how an exiled minority has enchanted the world with their deep resilient spirituality In these diverse lives Gallagher argues we can glimpse our own potential for spiritual genius writ large Each story testifies to the profound good in the world even during a troubled time and to Gallagher's groundbreaking theory of a human capacity for finding life's meaning that is nothing less than genius

Light on Electricity Utilities in the Middle East and North Africa Daniel Camos, Robert Bacon, Antonio Estache, Mohamad Mahgoub Hamid, 2017-12-04 The electricity sector in the Middle East and North Africa MENA is in the grip of an apparent paradox The region holds the world's largest oil and gas reserves and has been able to universalize access to electricity in most economies but it may not be able to make the investments required to meet the future power needs of its fast growing populations The annual investments to keep pace with the demand for electricity have been estimated at about 3 percent of the region s projected GDP In most of the region s economies however financial constraints limit the ability to make those investments The power sector needs to find its own financing sources and quickly Shedding Light on Electricity Utilities in the Middle East and North Africa provides quantitative evidence on how better utility management sustainable pricing and selective context specific reforms would free enough resources to make the needed investments and lower the operating costs of the sector The solution involves cutting costs and raising revenues through well targeted and well identified improvements These improvements would generate more financing than the sector s investment needs The report provides detailed evidence of the size of the potential gain in each of the 14 MENA economies covered The analysis is based on the MENA Electricity Database a new dataset covering 67 electricity utilities as well as a sample of utilities in comparable economies from other regions The authors hope that their benchmarking efforts will provide a regional and utility level frame of reference for sector performance in the region The book will be of interest to managers of electricity utilities regulators policy makers and other stakeholders concerned with the performance of utilities in the region
