## **Edsel Affair:**

**The Rest of the Edsel Affair** C. Gayle Warnock, 2007 If someone had told me years ago that I was going to write a book I would have told them that they were crazy For years I've been writing down my deepest thoughts and emotions with absolutely no plans of exposing them to the public These writings act as short stories that chronicle my life's experiences These testimonies are emotional some of them are spiritual some of them funny some painful and some of them even deal with life's lessons that I had to struggle with on my own There would be times when my closest friends would share their secrets with me and because I felt deeply moved from what they shared I would put myself in their shoes and try to find a better way of resolving the issue Some of these encounters have even frustrated me so deeply that I would have absolutely no choice but to write them down just to get them off my chest My purpose is to inspire motivate and encourage those who want to make a difference or those who need another chance to make it right Every occurrence has allowed me to grow and be stretched in directions beyond explanation I enjoy writing poetry that every one can relate to These are more than just some words scribbled down on paper These are experiences and stories that I would like to share publicly I understand that any artistic expression may be subject to scrutiny This book is a reflection of me and anyone who can relate to it in some form or fashion It's for those who believe in the power of words and their ability to teach minister and heal **The Edsel Affair** C. Gayle Warnock, 1980 Auto-Opium David Gartman, 2013-01-11 This much needed book is the first to provide a comprehensive history of the profession and aesthetics of American automobile design The author reveals how the appearance of the automobile was shaped by the social conflicts arising from America's mass production system He connects the social struggles of American society with the organizational struggles of designers to create symbol laden substitutes for the American dream Theoretically sophisticated lucid and compelling Auto Opium will appeal to all interested in the American obsession with the car Innocents, Incidents, and Indiscretions C. Gayle Warnock, 1996 Auto Mania Tom McCarthy, 2007-01-01 The twentieth century American experience with the automobile has much to tell us about the relationship between consumer capitalism and the environment Tom McCarthy contends In Auto Mania he presents the first environmental history of the automobile that shows how consumer desire and manufacturer decisions created impacts across the product lifecycle from raw material extraction to manufacturing to consumer use to disposal From the provocative public antics of young millionaires who owned the first cars early in the twentieth century to the SUV craze of the 1990s Auto Mania explores developments that touched the environment Along the way McCarthy examines how Henry Ford's fetish for waste reduction tempered the environmental impacts of Model T mass production how Elvis Presley's widely shared postwar desire for Cadillacs made matters worse how the 1970s energy crisis hurt small cars and why baby boomers ignored worries about global warming McCarthy shows that problems were recognized early The difficulty was addressing them a matter less of doing scientific research and educating the public than implementing solutions through America's market economy and

democratic government Consumer and producer interests have rarely aligned in helpful ways and automakers and consumers have made powerful opponents of regulation The result has been a mixed record of environmental reform with troubling prospects for the future

**From Family Firms to Corporate Capitalism** Kristine Bruland, Patrick O'Brien, 1998 What explains the growth of a business and more broadly the development or decline of a whole economy What role do particular entrepreneurs or indeed a culture of entrepreneurship play Does the evidence suggest that a particular structure or organizational form was or should be adopted to ensure best practice and commercial success These fundamental questions have long pre occupied business and economic historians With the current expansion of business and management education and training the investigations and findings of the historian may have wider significance and relevance This volume has been stimulated by the work of Peter Mathias one of the leading figures in this field in the post war period Here a number of his former students many now internationally distinguished historians pay tribute in a book that explores the move from family firms to corporate capitalism In a series of chapters they explore at the level of the firm the myriad of micro decisions that ultimately help to explain the overall performance of industries sectors and national economies as they evolve through time The contributors argue that sustained growth has never been a matter of a few spectacular technical breakthroughs Instead it rests on subtle economic and social transformations in cultures in economic organizations and in the roles of science and technology

**Divining Desire** Liza Featherstone, 2018-02-15 Over the course of the last century the focus group has become an increasingly vital part of the way companies and politicians sell their products and policies Few areas of life from salad dressing to health care legislation to our favorite TV shows have been left untouched by the questions put to controlled groups about what they do and don't like Divining Desire is the first ever popular survey of this rich topic In a lively sweeping history Liza Featherstone traces the surprising roots of the focus group in early twentieth century European socialism its subsequent use by the Mad Men of Madison Avenue and its widespread deployment today She also explores such famous failures of the method as the doomed launch of the Ford Edsel with its vagina shaped radiator grille and the even more ill fated attempt to introduce a new flavor of Coca Cola which prompted street protests from devotees of the old formula As elites have become increasingly detached from the general public they rely ever more on focus groups whether to win votes or to sell products And in a society where many feel increasingly powerless the focus group has at least offered the illusion that ordinary people will be listened to and that their opinions count Yet it seems the more we are consulted the less power we have That paradox is particularly stark today when everyone can post an opinion on social media our 24 hour focus group yet only plutocrats can shape policy In telling this fascinating story Featherstone raises profound questions about democracy desire and the innermost workings of consumer society

**Saving Ourselves from Big Car** David Obst, 2025-09-16 Cars are killing people and making the planet uninhabitable Crashes take the lives of more than a million people around the world each year Air pollution linked to motor vehicles contributes to even more untimely deaths Highways and unsafe streets have devastated cities yet traffic congestion still swallows up countless hours And carbon emissions from transportation are a key driver of climate change which now threatens to make the world unlivable Why do we still worship at the altar of the car How can we find alternatives that are healthier for the planet and ourselves This book exposes how Big Car the complex of companies in the automobile oil insurance media and concrete industries that promote and entrench car dependence has pursued profit at the expense of the common good David Obst explores how Big Car gained almost immeasurable influence over our lives weighing the benefits and the costs of reliance on private automobiles He details how industry covered up the harms of lead additives fought against seatbelts and continues to fund climate change denialism Obst considers the future of mobility surveying how cities from Taipei to Tempe Copenhagen to Chicago are experimenting with forms of transportation that offer alternatives to the dominance of cars Provocative and comprehensive Saving Ourselves

from Big Car is a powerful wake up call for us to change how we use cars before it's too late
