Chanting in the Hillsides Jeaneane D. Fowler, Merv Fowler, 2009 In 1983 a tiny group of people in Cardiff and a married couple in Aberporth West Wales were the only Welsh members of Soka Gakkai International, a Japanese movement based on the beliefs and teachings of the 13th century Buddhist Nichiren Daishonin. Today there are hundreds of members in Wales and the Borders. This book examines the history of the movement in these two areas and draws on original research gleaned from the members themselves. The research elicits facets of their faith practices and study as well as their testimonies to the success of such beliefs and practices in their daily lives. The book combines the twin goals of academic analysis of the Buddhism of Nichiren Daishonin in general with the warmth of its expression in the lives of its adherents in Wales and the Borders.

An Alternative Framework for Community Learning Centers in the 21st Century

Michael F. Reber, 2003 Public Community Learning Centers (CLCs) at least in the context of the United States are social structures that have been established to address particular community needs In the beginning they were instituted as extensions of state departments human services in order to assist communities with programs such as adult literacy and high school graduation certification Today they have taken on a broader role as a result of the Elementary and Secondary Education Act Title X Part I that gives rural and inner city public schools nearly 2 billion over five years 1999-2004 to develop CLCs for programs such as mentoring in basic skills or helping high school students prepare for college Despite these noble efforts public CLCs are still not integral parts of community sustainability One could argue that a major cause for this is that they are established mainly for political purposes However the problem is much deeper Public CLCs today are unable to serve as sustainable social structures because they lack several foundational principles that assist communities with creating and maintaining sustainability In short they do not adequately reflect the values beliefs and knowledge of the current community education movement Thus an alternative framework within which communities can develop CLCs is needed Using a systemic design approach toward the design of a community learning system an alternative framework for CLCs is designed that enables communities to create the conditions whereby they can become self-reliant self-governing and sustainable
