higher education topics through national and international research projects He was also in the fore front of the efforts to strengthen the structure and profile of higher education research for example through his involvement in the establishment of the Consortium of Higher Education Researchers CHER In addition he has contributed to many important scholarly works reflecting on the state of the art and the nature of the field The conventional wisdom is that working in a university or college makes you an expert on higher education Consequently while academics like to do research on every possible topic they are in general reluctant to examine their own social institution Within the European context Ulrich Teichler is one of the main exceptions to this rule Already in his student days he has recognised the unique characteristics of higher education institutions and systems and he understood that special efforts are needed to improve our knowledge on higher education

Responsibility and Responsibilisation in Education Christine Halse, Catherine Hartung, Jan Wright, 2019-10-23
Concerns with the nature of and relationship between responsibility and responsibilisation pervade contemporary social political and moral life This book turns the analytical lens on the ways in which responsibility and responsibilisation operate in diverse educational settings and relationships and social policy and geographical contexts in the USA Europe the UK New Zealand and Australia Scholars have sought to explain the genealogy and the multiple of rationalities technologies bio politics and modes of governmentality that bring responsibility and responsibilisation into being how they act on and are taken up by individuals groups and organisations and the risks and possibilities they create and delimit for individuals social collectives and their freedoms Contributors to this collection have diverse views and perspectives on responsibility and responsibilisation This disagreement is a strength It underlines the importance of unravelling both the differences and similarities across scholars and contexts It also issues a salutatory warning about assumptions that reduce the complex concepts of responsibility and responsibilisation to simplistic fixed categories or to generalising and universalising single cases or experiences to all areas of education This volume was originally published as a special issue of Discourse Studies in the Cultural Politics of Education
