in 2015 Moderating growth in the People's Republic of China as its economy adjusts to more balanced growth will offset to some extent the stronger demand expected from the industrial countries as their economies recover Risks to the outlook have eased and are manageable The monetary policy shift in the United States may invite some volatility ahead in financial markets albeit mitigated by accommodative monetary policy in Japan and the euro area The regional growth outlook depends on continued recovery in the major industrial economies and on the People's Republic of China managing to contain internal credit growth smoothly Widening income gaps in developing Asia strengthens the case for greater use of fiscal policy to foster equality of opportunity While the region has benefited from fiscal prudence in the past demographic and environmental challenges are expected to compete for public resources in the coming years To boost public spending on equity enhancing programs such as education and health without undermining fiscal sustainability the authorities will need to explore a wide range of options for mobilizing revenue and to build equity objectives into their fiscal plans Widening Access to Education as Social Justice Akpovire Oduaran, Harbans S. optimizing tax incentives needs to be combined with improved spending efficiency to help developing Asia achieve its development objectives *Governance in Developing Asia* Anil B.
