## Education For Our Time:

**Time for Educational Poetics** Xicoténcatl Martínez Ruiz, 2019-03-19 In *Time for Educational Poetics* the author addresses a discussion in the context of today's philosophy of education and educational research. Conceptually, educational poetics is not limited to a theoretical construction but rather focuses on the creative, imaginative, and poetic experience to being recreated in the teaching-learning process. Educational poetics is rooted in the philosophical and aesthetic thought of South Asia, specifically in how contemplative and creative practices re-introduced by Rabindranath Tagore. Educational poetics is the convergence of research in creative contemplation and poetic creation, practices of conscious attention and mindfulness, and practices of peace education and philosophy of non-violence. This book leads to a perspective in thinking about the risks that jeopardize the future of young generations. *Our Times: America finding herself* Mark Sullivan, 1927

*EDUCATION FOR THE JOY OF IT* Dr. Robert J. Pellegrini, 2014-07-01 This book is targeted to all current or prospective high school students, college students, or anyone else who aspires to strengthen the educational foundation upon which to build the rest of her/his life, with the hope that it is especially helpful to people who might otherwise become or have already been formal educational program dropouts or lockouts. I cannot guarantee that applying what is offered here will ensure an A grade or achievement of one's life goals. But I do guarantee that I have tried to summarize critical elements of thought, feeling, and action oriented to such objectives. Part I of this book is all about how to work both hard and smart to experience the joy of academic success. Hard work is necessary to achieve anything worthy of pride in our own creative effort. But it's not just how much or how hard we work at things. It is also how smart we work that determines our life outcomes. And what I mean by working smart is working efficiently and effectively. The goal here is to help all students reap as much as possible from their educational investment, whatever that investment may be in terms of time, money, energy, and self-disciplined personal sacrifices. Part II is about what it takes to achieve great success at anything in life. The format for this second part is essentially a psychological profile of outstanding achievers. From both my professional and personal experience, I've learned how vitally important education can be as an avenue to a professionally valued and personally satisfying life. And once again in 2014 I find myself championing an approach designed to facilitate human development through educational opportunity in a program I call Life Construction 101, designed not just to augment efforts to help at-risk students but to help every student enjoy academic success experiences. *Education For The Joy Of It* is the user's manual for that Life Construction 101 program. Accordingly, the Appendix to this book presents a brief structured exercise designed to provide a very preliminary template for initiating the construction or reconstruction of one's life. And that's it. A little book that I hope will be one of the biggest books its readers ever read. RJP <http://youtu.be/6BW19m7hqqc> **U.S. Office of Education** United States. Congress. House. Committee on Education and Labor. Special Subcommittee on Education, 1966 [Exploring Time as a Resource for Wellness in Higher Education](#) Sharon McDonough, Narelle Lemon, 2024-09-09 Bringing together international perspectives, this book

demonstrates the importance of reframing time in higher education and how we can view it as a resource to support wellbeing and self care Time is a central part of our lives and structures our days and yet often we don't think about the socially constructed nature of time or how we might reframe our relationship with time and our work in ways that support our self care and wellbeing Exploring Time as a Resource for Wellness in Higher Education suggests an alternative way to look at how we structure our time to better support our wellbeing Drawing on a range of theoretical and personal perspectives the authors advocate for a reconsideration and reconceptualization of our relationship with time By sharing their experiences the authors encourage readers to notice how they spend their time and offer strategies for an intentional focus on the relationship between time self care and wellbeing Whether it's making time having time or investing in time this book explores strategies and reflections necessary to grow maintain and protect wellbeing This book is a valuable resource for those working in higher education offering individual collective and systemic suggestions and strategies for navigating the ways we see time and wellbeing

Education at the End of Time Stefan Bengtsson, Jonas Andreassen Lysgaard, Dylan McGarry, 2025-08-18 Education at the End of Time explores the role of education in current and future society not in a limited sense of formal schooling but rather in terms of what it means to live and engage with a world that is at the brink of collapse

**Education for Everyday Life** Carl Anders Säfström, 2023-10-21 This book examines the role of teaching within public education It critiques its function in today's educational policies and theories and establishes an alternative way of understanding teaching It explores teaching from within a Sophist tradition of educational practice and thought The first part of the book discusses the vital link between public education and democracy the shifts in schooling's role in fostering competition and comparisons at the cost of social responsibility and democratisation It identifies the driving force of those shifts as forces of aggression and destruction central to a neoliberal ideology The second part of the book argues for a practice of Sophistical teaching rather than Socratic teaching It explores in depth what it could mean to be teaching in an up to date sophist tradition of educational thought and practice The book also includes insights for teaching to counter aggressive forces of nationalism racism and late capitalism's violence and the escalating climate crisis Readers will be able to understand teaching within educational thought and precisely how different teaching forms can contribute to education as democratisation
