A Book about Simon Nelson Patten and Other Teachers.** Scott NEARING, 1925      **Economists and Higher Learning in the Nineteenth Century** William J. Barber, 1993-01-01 Many economists who struggled to establish a secure place for their discipline in American universities in the nineteenth century made significant contributions to reshaping American academic life in general Yet they were often at war among themselves as they sought to define the mission and methods of economics in an era of social and intellectual ferment This volume represents the contribution of American scholars to a multinational research project on the institutionalization of political economy in European Japanese and North American universities It includes case studies of divergent experiences of fourteen institutions that figured prominently in the molding of American culture William Mary The University of Virginia South Carolina College Brown Harvard Yale Columbia Johns Hopkins The University of Pennsylvania The University of Chicago The University of California Stanford The University of Wisconsin and the Massachusetts Institute of Technology These are supplemented in an essay by A W Coats on the turbulent early decades of the American Economic Association In this new introduction Barber takes note of the fact that in a somewhat different context and with a modified rhetoric the same issues present themselves today as they did one hundred years earlier And this in turn introduces some troubling concerns about just what sort of science economics is and was The volume as a whole can be read as reflections on the troubled status of the discipline of economics as it now exists in American university and research contexts It provides fresh perspectives on the development of social science and economic thought and on the history of higher education in the United States As such it will be of very great interest to professional economists students of higher education and those for whom the life of American ideas holds a central place      *The Pragmatic Imagination* Steven A. Sass, 2016-11-11 As prominent as the Wharton School of Business is today so was the Wharton family in the mercantile world of eighteenth century Philadelphia Nineteenth century scion of this large and wealthy business family Joseph Wharton amassed a huge new fortune in his American Nickel Company and the Bethlehem Steel Corporation and through these enterprises helped catapult the nation into the modern age of industry In 1881 while still in mid career he contributed part of his accumulated wealth to endow the Wharton School of Finance and Economy at the University of Pennsylvania Wharton s purpose was to prepare the city s young men of inherited wealth and capacity to assume control of the complex economy that he and his fellow entrepreneurs were then creating He would have the university provide that cultural background needed by all gentlemen of society while the new Wharton course would instruct students in those economic experiences necessary for success in the world of practical affairs Wharton s investment and instructional program began the modern tradition of collegiate management education Steven A Sass s *The Pragmatic Imagination* not only provides a history of the world s oldest and still one of the most prestigious schools of management but also offers a fascinating exploration of the interaction of higher

education and economic activity The volume illuminates the essential tension in professional business education that between utilitarian training and scholarly speculation and analyzes the various regimes of conflict accommodation and synergy between these two interests Providing the unifying theme of the history is Joseph Wharton s ambition to create a leadership class for industrial America Careful attention is devoted to the various strategies adopted to achieve this end and to the forces that facilitated or frustrated the founder s purpose Essentially an essay on the role of authority in the development of American culture The Pragmatic Imagination carries the history of Joseph Wharton s experiment from its origins in the ironmaster s entrepreneurial ethos through the vigorous Mugwumpery of the 1880s to the gospel of the Progressive Era of civic revival and practical education into the crises of depression and war through the flowering of econometrics and operations research down to the present day vogue for the M B A
