Cultivating Flourishing Practices and Environments by Embracing Positive Education Benoit, Shendah M., 2025-04-09. Positive psychology has significantly influenced educational organizations by promoting well-being, resilience, and engagement among students and educators. Research and real-world examples highlight how integrating positive psychology into curriculum, instruction, and assessment can foster personal and academic growth. By prioritizing student, teacher, and institutional well-being, schools and universities can create supportive and flourishing environments dedicated to long-term success. However, the ongoing development of positive practices suggests that continued research is necessary to fully realize its benefits. As education evolves, embedding positive psychology into policies and practices will be crucial for shaping a more supportive and effective learning experience. *Cultivating Flourishing Practices and Environments by Embracing Positive Education* explores positive education practices in a variety of learning environments. It presents stories of progress showcasing examples of flourishing practices. Covering topics such as emotional intelligence, self-advocacy, and trauma-informed practices, this book is an excellent resource for educators, researchers, academicians, administrators, and more.

Creating Socially Responsible Citizens David L. Grossman, John J. Cogan, 2012-09-01 This book originates from a collaborative research initiative to examine how various societies in the Asia Pacific Region construct moral and civic education and to what extent these systems achieve the democratic objective of creating socially responsible citizens In many western societies there is at least a rhetorical tendency to separate the moral and civic dimensions of citizenship education and in some cases to exclude the moral dimension from the discourse of preparing citizens However as cross societal dialogues and research about citizenship education have increased in the past two decades scholars have identified

differences in the emphasis put on the moral dimension of citizenship education across the Asia Pacific region. In many predominantly Confucian, Islamic and Buddhist societies, for example, the emphasis on the moral dimension of citizenship education is explicit and in some cases central. While awareness of a divide or perhaps more appropriately a continuum in the role of moral versus civic education in democratic societies has been recognized for some time, to our knowledge this book marks the first effort of this scope to address the issue of the moral/civic divide in citizenship education. Thus, through a cross-cultural dialogue across societies in the Asia Pacific Region, this book addresses the issue of whether elements of both civic and moral education can be effectively joined to create a socially responsible citizen.

Creating and Sustaining the Constructivist Classroom Bruce A. Marlowe, Marilyn L. Page, 2005-04-20 Praise for the Original Edition: Lots of fresh ideas along with some very helpful suggestions. Pamela Galvani, Teacher, Central Kitsap High School, Silverdale, Washington. Teaching for Democracy in an Age of Economic Disparity Cory Wright-Maley, Trent Davis, 2016-07-01 *Teaching for Democracy in an Age of Economic Disparity* addresses the intersections between democratic education and economic inequality in American society. Drawing upon well-established theoretical constructs in the literature on democratic citizenship as well as recent events, this volume outlines the ways in which students can not only be educated about democracy but become actively engaged in the social issues of their time. The collection begins with an examination of how the confluence of capitalism and education have problematized the

current model of democratic education before transitioning into discussions of how teachers can confront economic disparity both economically and civically in the classroom The authors then introduce a variety of ways in which teachers can engage and empower students civic action at all grade levels As a final component the volume explores new avenues for civic action including the use of social media for democratic engagement in schools and opportunities for critical reflection and cross cultural dialogue This book is a valuable resource for both scholars interested in the research on democratic education and practicing teachers wishing to turn their students into critical active citizens

with both real cases of how an urban teacher residency can impact school systems and concrete tools and examples to help the reader understand and replicate aspects of the process Capturing both the successes but also the tensions and challenges we offer a kaleidoscopic view of the rich complex and multi layered ways in which multiple stakeholders work together to make enduring educational change in urban schools Our third space NMUTR has been a fragile utopian enterprise one that has relied on a shared commitment of all involved and a deep sense of hope that working collaboratively has the potential even if not perfect to make a difference

The Discourse of Special Populations Ahmet Atay,Diana Trebing,2017-09-22 The term special population occupies a particular purpose and has a particular role in the discourse of higher education This book uses the term as an umbrella term for any student who tends to be underrepresented on college campuses and has a very specific set of unique needs among others individuals with physical and learning disabilities international students ethnic minorities LGBTQ students single parents and first generation and other non traditional student groups Sometimes these special student groups are visible to educators however quite often they are hidden in plain sight which makes it difficult for educators to work effectively and meaningfully with these student groups This book uses the framework of critical intercultural communication pedagogy to generate a discussion about pedagogical issues surrounding students who are categorized as special populations focusing on culturally sensitive pedagogical methods to educate all students

Making Teaching and Learning Matter Judith Summerfield,Cheryl C. Smith,2010-12-09 This volume captures the spirit of collaboration and innovation that its authors bring into the classroom as well as to groundbreaking undergraduate programs and initiatives Coming from diverse points of view and twenty different disciplines the contributors illuminate the often perplexing debates about what matters most in higher education today Each chapter tells a unique story about creating vital pedagogical arenas that have the potential to transform teaching and learning for both faculty and students These exploratory spaces include courses under construction cross college and interdisciplinary collaborations general education reform initiatives and fresh perspectives on student support services faculty development freshman learning communities writing across the curriculum on line degree initiatives and teaching and learning centers All these spaces lend shape to an over arching system wide project bringing together the often disconnected silos of undergraduate education at The City University of New York CUNY

America's largest urban public university system Since 2003 the University's Office of Undergraduate Education has sponsored coordinated efforts to study and improve teaching and learning for the system's 260 000 undergraduates enrolled at 18 distinct colleges The contributors to this volume present a broad spectrum of administrative and faculty perspectives that have informed the process of transforming the undergraduate experience Combined the voices in these chapters create a much needed exploratory space for the interplay of ideas about how teaching and learning need to matter in evolving notions of higher education in the twenty first century In addition the text has wider social relevance as an in depth exploration of change and reform in a large public institution More Like Life Itself Cory Wright-Maley, 2018-10-01 John Dewey wrote in multiple places that education should be an experience of the content and processes of life itself Too often social studies is taught in a way that tells students about real life but fails to engage them in the process of life for which Dewey advocated The core purpose of simulations is to reflect the processes events and phenomena expressed in a variety of real life domains They engage students in these reflections of real life meaningfully as active agents who have the power to make decisions that impact the direction of events and that lead to both intended and unintended consequences Because of the nature of simulations students who participate in them are able to build their capacities to think in complex and critical ways Today despite the growing evidence that simulations have an important role to play in the teaching of social studies they remain an underutilized and undervalued approach to the discipline One of the key obstacles to their widespread adoption is the limited availability of training resources available to social studies teachers Teachers need support to develop a new vision of social studies teaching and learning coupled with practical guidance necessary to implement simulations effectively This volume provides teachers with both When teachers are able to weave simulations effectively into the fabric of social studies teaching and learning they help to promote social studies experiences that are both powerful and purposeful They offer students an experience of the discipline that is indeed More Like Life Itself
