Social Disparities John Stillwell, Paul Norman, Claudia Thomas, Paula Surridge, 2010-06-14 Inequality is one of the major problems of the contemporary world. Significant geographical disparities exist within nations of the developed world as well as between these countries and those referred to as the South in the Brundtland Report. Issues of equity and deprivation must be addressed in view of sustainable development. However, before policymakers can remove the obstacles to a fairer world, it is essential to understand the nature of inequality both in terms of its spatial and socio-demographic characteristics. This second volume in the series contains population studies that examine the disparities evident across geographical space in the UK and between different individuals or groups. Topics include demographic and social change, deprivation, happiness, cultural consumption, ethnicity, gender, employment, health, religion, education, and social values. These topics and the relationships between them are explored using secondary data from censuses, surveys, or administrative records. In volume 1, the findings of research on fertility, living arrangements, care, and mobility are examined. Volume 3 will focus on ethnicity and integration.

Buying your Way into Heaven, 2019-02-11 Education is commonly thought to be a haven for the young No matter how unstable the polity no matter how dismal the prospects for the economy education investments are often treated as sacrosanct This is one reason for the popularity of education as part of foreign aid Who could object to providing more opportunity for young people to study Recently however it has been discovered that education systems can be as corrupt as other parts of government and the economy and that values of fairness and impartiality once thought to be universal characteristics of education systems can be supplanted by the interests of specific individuals families and ethnic groups Education corruption has now been found in all regions of the world but it manifests itself in different ways How do these differ from one region to another What should be done to minimize education corruption And what should be done to protect universities and employers in areas situated where there is little corruption from the products of those parts of the world where education corruption is the norm This book will explain the meaning of education corruption and how it works it will provide illustrations from Asia Africa Southeastern Europe and the former Soviet Union and it will propose actions and policies on the part of regional and international agencies to counter act what is now likely to become a new and unexpected global crisis

Environmental Education in a Climate of Reform Sylvia Christine Almeida, 2015-10-29 India is grappling with serious environmental issues that have been largely sparked by its galloping economy As a measure of its seriousness to reduce the environmental impacts it has spearheaded numerous policy initiatives One of the major thrusts of the proposed initiatives to curb environmental degradation has been to create an informed and well educated citizenry The federal mandates have triggered new curriculum policies and the compulsory teaching of environmental and sustainability education at all levels in all education institutions This volume examines the policy practice conundrum It looks at how national and international policy reforms reach practitioners in this case teacher educators Furthermore it unravels how teacher educators understand environmental education the ways in which they negotiate its demands on their busy schedules what helps them in determining relevant issues within this and finally how they implement these policies in their everyday practices It is evident from this book that while there have been some really well meaning development of policies their impact on teacher educators practice and therefore student teachers learning about Environmental Education is limited The study showed that while these teacher educators had a clear understanding of the environment and saw the need importance of incorporating Environmental Education in their daily practices they had very little scope to do so There were numerous factors that constrained implementation The book provides inputs on global policy practice gaps It offers valuable insights to a global audience grappling with understanding the ways in which environmental education policies are put into practice in emerging economies like India The final argument is thesis that while policy reforms are a step in the right direction they

need to be backed up with strong implementation systems in order to be successful
