Einsteins Greatest Mistake Abandonment Of The Aether:

Einstein's Greatest Mistake Sid Deutsch, 2006-02 If a child wants proof we can think of 10 different ways to show that we are surrounded by air but we are of course normally unaware that we live at the bottom of an ocean of air It is claimed in this book that we are unaware similarly that we are surrounded by an atmosphere of aether There is one major difference however We have not been able to detect the aether Nevertheless the aether provides a solution to the following mystery How can light or any electromagnetic wave travel for billions of years across the vastness of the Universe without losing any energy The answer is that the Universe is filled with a light transmitting medium The Aether The proof that there is an aether **Critics and alternative theories** Nikolay Chavarga, The word dissident is used in a is the subject of the present book broad sense It includes scientists proposing not fully accepted ideas within the Relativity Quantum Mechanics paradigm as well as opponents to some aspects of these theories The Worldwide List of Alternative Theories and Critics Jean de Climont, 2020-11-01 This Worldwide List of Alternative Theories and Critics only avalailable in english language includes scientists involved in scientific fields The 2023 issue of this directory includes the scientists found in the Internet The scientists of the directory are only those involved in physics natural philosophy The list includes 9700 names of scientists doctors or diplome engineers for more than 70% Their position is shortly presented together with their proposed alternative theory when applicable There are nearly 3500 authors of such theories all amazingly very different from one another The main categories of theories are presented in an other book of Jean de Climont THE ALTERNATIVE THEORIES Scientific The Aether-Cosmic Computer Structure and Function Alfy Sourial, 2021-05-04 The author has American, 2005 worked on the thesis of the Material Aether since 1981 The author is a retired surgeon and an amateur physicist physics is his hobby A free thinker putting up a sincere effort to find the truth both in its totality as well as its minutest possible detail a tall order This book is expected to supplement and or modify most updates in physics establish the existence of the aether identify the aether as the Cosmic Computer suggest and propose the aether Cosmic Computer structure make an educated guess at the modus operandi of its function and its expected future behavior using illustrations and logistic intuition Through patience diligence perseverance in my old age and mere luck it has exceeded my expectations In assessing the blame if any for not recognizing the Aether as the cosmic computer CC the Author puts much more blame on the current Scientific Community as a whole than on Einstein in particular Let us remember that Computers were not known throughout Einstein s life They were first introduced during his last few years By contrast the current Scientific Community as a whole has lived for the past 70 years with computers It is about time they consider a few dozen serious propositions at the core of physics which may end up being accepted by default within the next ten to twenty years Etnosains dan Etnomatematik Alam Melayu (Penerbit UM) Mat Rofa Ismail, Apakah sumbangan orang Melayu dalam sains dan matematik Persoalan ini dibincangkan di bawah istilah etnosains dan etnomatematik seperti yang diterokai oleh gabungan pengarang dalam buku ini Sumbangan

etnosains dan etnomatematik di Alam Melayu berakar umbi bersama sejarah dan budaya yang membentuk acuan ilmu yang penuh dengan sistem nilai tempatan dan serantau Apabila rantau Melayu terjajah oleh kolonialisme Barat maka penulisan sejarah telah berubah paradigma daripada rantau yang mempunyai tamadun yang agung kepada rantau jajahan yang menjulang tinggi budaya Barat yang memisahkan ilmu daripada nilai Ilmu tradisi umat Melayu terpinggir dalam penulisan acuan kolonialisme kerana secara beransur ansur penjajahan bukan sahaja berlaku terhadap fizikal dan geografi tetapi juga sejarah pemikiran dan minda Ilmu yang berteraskan sains dan matematik yang lahir daripada budaya Melayu Islam seperti mantik penghujahan pemikiran kefalsafahan perdebatan sufisme pelayaran seni perubatan pengiraan takwim kalendar dan musim seni bina retorik dan ketatabahasaan pancalogam persenjataan tenunan dan warisan yang lain semakin terpinggir dalam penulisan umat Melayu Pendokumentasian yang dilakukan penjajah diwarnakan oleh sistem nilai mereka di bawah paradigma kolonialisme yang lebih memetik aspek khurafat atau kelemahan berbanding pemikiran mantik yang lebih saintifik Hingga kini keagungan pemikiran etnosains dan etnomatematik Melayu masih tersorok dalam lipatan sejarah Maka menerusi tulisan beberapa tokoh ilmuwan tempatan sebahagian aspek tersebut dihuraikan dalam buku ini sebagai percubaan pentakrifan domain kajian dan diharapkan akan menjadi bidang yang penting dalam epistemologi etnografi Melayu pada masa akan datang Unified Field Theory And Occam's Razor: Simple Solutions To Deep Ouestions Andras Kovacs, Giorgio Vassallo, Paul O'hara, Francesco Celani, Antonino Oscar Di Tommaso, 2022-06-20 Unified Field Theory was an expression first used by Einstein in his attempt to unify general relativity with electromagnetism Unified Field Theory and Occam s Razor attempts to provide real answers to foundational questions related to this unification and should be of high interest to innovative scientists A diverse group of contributing authors approach an old problem with an open mindedness that presents a new and fresh perspective The following topics are discussed in detail in the hope of a fruitful dialogue with all who are interested in this subject This highly original book brings together theoretical researchers and experimentalists specialized in the areas of mathematics and epistemology theoretical and experimental physics engineering and technology For years they have worked independently on topics related to the foundations and unity of physics and have had numerous overlapping ideas in terms of using Clifford algebra and spinors Within the book new technology applications are outlined The Decline Effect Dean and theoretical results are complemented by interpretations of experimental data Brooks, 2023-01-31 A crisis is coming for everyone who uses math and science For decades now the classical model of probability the indifference principle and the Gaussian distribution has been breaking down and revealing its limitations in fields from economics to epidemiology Now a new approach has revealed the underlying non classical principle behind all these anomalous laws Pareto s law of elite incomes Zipf s law of word frequencies Lotka s law of scientific publications Kleiber's law of metabolic rates the Clausewitz Dupuy law of combat friction Moore's law of computing costs the Wright Henderson cost law Weibull's law of electronics failures the Flynn Effect in IQ scores Benford's law of digit frequencies Farr

The general law behind all these particular laws and countless others is the decline effect As a system ages or grows in size the rules of probability subtly change Entropy increases rare items become rarer and average performance measures decline The human meaning of a decline may be positive decreasing costs falling epidemic mortality or negative lower customer loyalty decreasing efficiency but the mathematical pattern is always the same The implications are enormous as these examples show All epidemic diseases decline in infectiousness and in lethality HIV AIDS went from a highly infectious 95 percent fatal disease to a survivable condition with a latency of decades COVID 19 went from a death rate of 7 percent in early 2020 to under 2 percent in 2022 Hereditary dynasties around the world declined smoothly in lifespan from hundreds of years to tens of years When democracies replaced monarchies the decline in spans of party control continued Encyclopaedia Britannica, 1929 Who's Who in Science and Engineering 2008-2009 Who's Who Marguis, Marguis Who's Who, 2007-12 The Encyclopædia Britannica James Louis Garvin, Franklin Henry Hooper, Warren Earle Cox, 1929 The Encyclopaedia Britannica James Louis Garvin, Franklin Henry Hooper, Warren E. **The Devolution of Man** Loren Psaltis, 2015-03-14 The question Where do we come from may never be Cox, 1929 answered But Why do we exist that is my interest Humanity has become a tribe of production and consumption But for a small percentage of enlightened thinkers through history the likes of Albert Einstein Mahatma Gandhi Martin Luther King Jr Leonardo da Vinci Fibonacci Isaac Newton Rumi Nikolai Tesla Socrates Jesus Mohammed Siddhartha Gautama and their peers for the greater part of human history we have steadily devolved into a race of slavery to a system that has led us to disease depression debt war and poverty for the majority of the world's population I have a theory after many years of studying what ancient cultures knew to the systems we now have devolved to create that happiness health wealth good fortune long life love and joy are easily achieved Our birthright in fact And there is a way back accessible to all It is time to know why we exist **Personal Knowledge** Michael Polanyi, 2012-06-25 First published in 2012 Routledge is an imprint of Taylor Francis an informa company **Encyclopædia Britannica** Walter Yust, 1956 The Encyclopædia Britannica Franklin Henry Hooper, 1937 Encyclopædia Britannica ,1951 **An Introduction to Optics** Francis Weston **Encyclopædia Britannica: Sars to Sorc** Walter Yust, 1947 Sears, 1935 **Did Einstein Get It Wrong?** Michael J. Kelly, 2004 Einstein spent the last 25 years of his life looking for a theory that would explain and unite the fundamentals of physics in a simple and elegant way He called it his Theory of Everything Alas he never found it I believe that I have My book Did Einstein Get It Wrong is essentially about this illusive Theory of Everything which I have found and is so simple that anyone can understand it This new theory is based on two simple axioms In the Big Bang matter and antimatter were formed in equal amounts The axioms are that matter attracts antimatter and that antimatter is self repelling wanting to expand indefinitely Antimatter fills the void of space and is the so called aether of Sir Isaac Newton s time and which was believed in

up to Einstein s time but Einstein abandoned the idea of an aether after the famous Michelson an event expected by American scientists within the next 20 years Historic and planetary evidence for this periodic catastrophe is considered in detail
