Electronic Music Learning Projects:

Electronic Music Learning Projects Roy Bebbington, 1993 Music making by electronics is now immensely popular and these learning projects offer constructors both sides of this invaluable coin *Electronic Music School* Will Kuhn, Ethan Hein, 2021 *Electronic Music School A Contemporary Approach to Teaching Musical Creativity* is a practical blueprint for teachers wanting to begin teaching music technology to secondary age students Will Kuhn and Ethan Hein inspire classroom music teachers to expand beyond traditional ensemble based music education offerings to create a culture of unique creativity and inclusivity at their schools Part One offers an overview of the philosophical and institutional aspects of starting a music technology program with a particular focus on the culture of electronic music surrounding digital music creation tools Part Two dives deep into curricula for music lab classes including several lesson examples and techniques This section also includes abbreviated project plans for teachers who have fewer contact hours with their students Part Three discusses how music technology courses can grow into a larger media creation program how such a program can contribute to the broader school culture and how project based music learning effectively prepares students for careers in media *Electronic Music School* also includes narratives from music technology students themselves who often have an intuitive understanding of the future directions music technology programs can take **The Music Learning Profiles Project** Radio

Cremata, Joseph Pignato, Bryan Powell, Gareth Dylan Smith, 2017-11-22 *The Music Learning Profiles Project Let's Take This Outside* uses ethnographic techniques and modified case studies to profile musicians active in a wide range of musical contexts not typically found in traditional music education settings The book illuminates diverse music learning practices in order to impact music education in classrooms It goes on to describe the Music Learning Profiles Project a group of scholars dedicated to developing techniques to explore music learning which they call flash study analysis Twenty musicians were interviewed invited to talk about what they do how they learned to do it and prompted to Identify key learning experiences Discuss their involvement in formal learning environments Predict how they see musicking practices passing to a future generation The Music Learning Profiles Project offers a nuanced understanding of the myriad approaches to music learning that have emerged in the early part of the twenty first century **The Routledge Research Companion to Electronic Music: Reaching out with Technology** Simon Emmerson, 2018-05-16 The theme of this Research Companion is

connectivity and the global reach of electroacoustic music and sonic arts made with technology The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years The definitions of the field itself are now broader there is no clear boundary between electronic music and sound art Also what was previously an apparently simple divide between art and popular practices is now not easy or helpful to make and there is a rich cluster of streams of practice with many histories including world music traditions This leads in turn to a steady undermining of a primarily Euro American enterprise in the second half of the twentieth century Telecommunications technology most importantly the

development of the internet in the final years of the century has made materials practices and experiences ubiquitous and apparently universally available though some contributions to this volume reassert the influence and importance of local cultural practice Research in this field is now increasingly multi disciplinary Technological developments are embedded in practices which may be musical social individual and collective The contributors to this companion embrace technological scientific aesthetic historical and social approaches and a host of hybrids but most importantly they try to show how these join up Thus the intention has been to allow a wide variety of new practices to have voice unified through ideas of reaching out and connecting together and in effect showing that there is emerging a different kind of global music

Scratch Music Projects Andrew R. Brown,s. Alex Ruthmann,2020-08-03 In this practical project based book music students educators and coders receive the necessary tools to engage with real world experiences in computation and creativity using the programming language Scratch Designed to teach students the fundamental concepts of computational thinking through interactive music sound and media projects vary in complexity and encourage readers to make music through playing and creating music This book introduces readers to concepts in computational thinking and coding alongside parallel concepts in music creative sound and interaction The book begins with a gentle introduction to the Scratch 3 0 programming environment through hands on projects using a computer keyboard and mouse to make music and control sounds creating original sounds and performing them as an instrument The next chapters introduce programming musical sequences melodies and structures and assembling them into a virtual band that can be performed live or automated through algorithms The final chapters explore computational thinking and music in the contexts of making games with sound effects teaching the computer to generate music using algorithms and rules interacting with music using live video finishing with a chapter on musical live coding where readers will create and manipulate computer code to perform improvise and create original music live

Performing Electronic Music Live Kirsten Hermes,2021-12-28 Performing Electronic Music Live lays out conceptual approaches tools and techniques for electronic music performance from DJing DAWs MIDI controllers traditional instruments live sound design hardware setups custom software and hardware to live visuals venue acoustics and live show promotion Through case studies and contrasting tutorials by successful artists Kirsten Hermes explores the many different ways in which you can create memorable experiences on stage Featuring interviews with highly accomplished musicians and practitioners readers can also expand on their knowledge with hands on video tutorials for each chapter via the companion website performingelectronicmusic live Performing Electronic Music Live is an essential all encompassing resource for professionals students of music production courses and researchers in the field of creative focused performance technology

Music, Technology, and Education Andrew King,Evangelos Himonides,2016-06-10 The use of technology in music and education can no longer be described as a recent development Music learners actively engage with technology in their music making regardless of the opportunities afforded to them in formal settings This volume draws together critical

perspectives in three overarching areas in which technology is used to support music education music production game technology musical creation experience and understanding The fourteen chapters reflect the emerging field of the study of technology in music from a pedagogical perspective Contributions come not only from music pedagogues but also from musicologists composers and performers working at the forefront of the domain The authors examine pedagogical practice in the recording studio how game technology relates to musical creation and expression the use of technology to create and assess musical compositions and how technology can foster learning within the field of Special Educational Needs SEN In addition the use of technology in musical performance is examined with a particular focus on the current trends and the ways it might be reshaped for use within performance practice This book will be of value to educators practitioners musicologists composers and performers as well as to scholars with an interest in the critical study of how technology is used effectively in music and music education

Live Electronic Music Friedemann Sallis,Valentina Bertolani,Jan Burle,Laura

Zattra,2017-11-20 During the twentieth century electronic technology enabled the explosive development of new tools for the production performance dissemination and conservation of music The era of the mechanical reproduction of music has rather ironically opened up new perspectives which have contributed to the revitalisation of the performer s role and the concept of music as performance This book examines questions related to music that cannot be set in conventional notation reporting and reflecting on current research and creative practice primarily in live electronic music It studies compositions for which the musical text is problematic that is non existent incomplete insufficiently precise or transmitted in a nontraditional format Thus at the core of this project is an absence The objects of study lack a reliably precise graphical representation of the work as the composer or the composer performer conceived or imagined it How do we compose perform and study music that cannot be set in conventional notation The authors of this book examine this problem from the complementary perspectives of the composer the performer the musical assistant the audio engineer the computer scientist and the musicologist

The

Oxford Handbook of Sound and Image in Digital Media Carol Vernallis,Amy Herzog,John Richardson,2013-11-15 The Oxford Handbook of Sound and Image in Digital Media surveys the contemporary landscape of audiovisual media Contributors to the volume look not only to changes brought by digital innovations but to the complex social and technological past that informs and is transformed by new media This collection is conceived as a series of dialogues and inquiries by leading scholars from both image and sound based disciplines Chapters explore the history and the future of moving image media across a range of formats including blockbuster films video games music videos social media digital visualization technologies experimental film documentaries video art pornography immersive theater and electronic music Sound music and noise emerge within these studies as integral forces within shifting networks of representation The essays in this collection span a range of disciplinary approaches film studies musicology philosophy cultural studies the digital humanities and subjects of study Iranian documentaries the Twilight franchise military combat footage and Lady Gaga videos
